Life's Jungle S. Finelli, 2021-01-28 Every creature on earth depends on another to survive. This reliance extends to all aspects of an ecosystem and ultimately our planet. Human beings have a tremendous responsibility for supporting the health of the environment and the survival of all that exists. We can feel good about doing our part and showing that we care. Understanding the circle of life helps us recognize our connection with others. As with the animals in a jungle, we can learn to respect the diversity of humankind. Knowing that all lives are precious highlights the unique qualities that each person brings to the world. When we can celebrate our similarities and differences, we'll more fully appreciate how we share the human experience.

Surviving the Extremes Kenneth Kamler, 2004-01-20 Surgeon explorer and masterful storyteller Kenneth Kamler takes us to the farthest reaches of the earth as well as into the uncharted territory within the human brain *Surviving the Extremes* is a scientific nail biter no reader will forget Physiological constraints confine our bodies to less than one fifth of the earth's surface Beyond that fraction lie the extremes What happens when we go to them Dr Kenneth Kamler has spent years observing exactly what happens A vice president of the legendary Explorers Club he has climbed dived sledded floated and trekked through some of the most treacherous and remote regions in the world A consultant for NASA Yale University and the National Geographic Society he has explored undersea caves crossed the frozen Antarctic wastelands and stitched a boy's hand back together while kneeling in knee deep Amazonian mud He was the only doctor on Everest during the tragic expedition documented in Jon Krakauer's *Into Thin Air* and helped treat its survivors Kamler has devoted his life to investigating how our bodies respond to environmental insults a nice way of saying the things that can kill us and watched while some succumbed to them and others sometimes miraculously overcome them Words like extreme and survival have lost some of their value from overuse and media hype By showing us what happens when life itself is at stake and the body's capacities put to their greatest test this book reminds us what they truly mean Divided into six sections jungle open sea desert underwater high altitude and outer space *Surviving the Extremes* uses first hand testimony and documented accounts to illustrate what happens in environments where our instinctive survival strategies must become fully engaged These stories reveal how infinitely complex are the workings of the human body and also how heartbreakingly fragile At the heart of this book is a quest for the source of our will to survive and the haunting question of why some can and others cannot summon its awesome and nearly mystical power at their moment of greatest need

Lost in the Amazon David Breithaupt, 2024-12-17 What started as just an ordinary day for Pete Wilson turned into an adventure of a lifetime as he tried to survive a plane crash in the Amazon jungle He had to find his way back home but after losing his compass he knew he was in big trouble For the next twelve months he had to live by his wits to survive At eighteen years of age he faced many difficult challenges and disappointments The jungle was full of animals whose main diet is meat and he had several close calls There were also a lot of dangers in the jungle from nature such as quicksand forest fires flooding and major storms The Amazon basin is a huge area with wide fast moving rivers to cross steep cliffs to climb and headhunters It seemed that there was some kind of life threatening difficulty to overcome every day He used his wits to find food when it was scarce to make weapons and to find a way home But more than his own ingenuity he relied on his God and Savior Jesus Christ and this story is a testament to the
