## **Sustainability Of Rice In The Global Food System:**

*Sustainability of Rice in the Global Food System* Noreen G. Dowling, Stanley Marshall Greenfield, K. S. Fischer, International Rice Research Institute, 1998      *Sustainability of Rice in the Global Food System*, 1998 Food security Food system Rice production systems challenges for rice research in Asia Rice production systems biodiversity Economic considerations Case studies      **Sustaining Global Food Security** Robert Zeigler, 2019-10-09 Population growth alone dictates that global food supplies must increase by over 50% in coming decades Advances in technology offer an array of opportunities to meet this demand but history shows that these can be fully realised only within an enabling policy environment Sustaining Global Food Security makes a compelling case that recent technological breakthroughs can move the planet towards a secure and sustainable food supply only if new policies are designed that allow their full expression Bob Zeigler has brought together a distinguished set of scientists and policy analysts to produce well referenced chapters exploring international policies on genetic resources molecular genetics genetic engineering crop breeding and protection remote sensing the changing landscape of agricultural policies in the world's largest countries and trade Those entering the agricultural sciences and those who aspire to influence public policy during their careers will benefit from the insights of this unique set of experiences and perspectives      *Towards Sustainable Global Food Systems* Ruerd Ruben, Jan Verhagen, 2019-04-30 One of the major knowledge challenges in the domain of Resilient and Sustainable Food Systems refers to the integration of perspectives on consumption patterns that support public health inclusive value chains and environmentally sustainable food production While there is a long record of the analysis of separate interventions this special issue generates integrated insights provides cross cutting perspectives and outlines practical and policy solutions that address these global challenges The collection of papers promotes the view that sustainable food systems require thorough insights into the structure and dynamics of agri food production systems the drivers for integrating food value chains and markets and key incentives for supporting healthier consumer choices On the production side potential linkages between agricultural commercialization and intensification and their effects for food security and nutritional outcomes are analyzed Value Chains are assessed for their contribution to improving exchange networks and markets for food products that simultaneously support efficiency circularity and responsiveness Individual motives and market structures for food consumption need to be understood in order to be able to outline suitable incentives to enhance healthy dietary choice The contributed papers focus on interfaces between food system activities and processes of adaptive change that are critical for overcoming key constraints and trade offs between sustainable food and healthy diets      **Roots and Tubers in the Global Food System** Consultative Group on International Agricultural Research. Committee on Inter-Centre Root and Tuber Crops Research, Gregory J. Scott, 2000 In 1995 TAC commissioned an Inter Centre Review of Root and Tuber Crops Research in the CGIAR and that group's final report was submitted in April 1996 Among its findings the review recommended that the

Centers working on these crops prepare in consultation with non CGIAR members a comprehensive documented text that sets out a vision for root and tuber research employing inter Centre collaborations and institutional partnerships TAC 1997 At International Centers Week 1996 representatives of CIAT CIP IFPRI IPGRI and IITA met formed an informal committee and established a task force to prepare such a report with CIP and CIAT representatives acting as co convenors This document synthesizes the principal findings of the subsequent work Roots and tuber crops have myriad and complex roles to play in feeding the world in the coming decades Far from being one sort of crop that serves one specific purpose they will be many things to many very many people Cropping Systems Anil Shrestha,2004-02-13 Learn the fundamentals as well as in depth details of agricultural cropping systems from around the globe Cropping Systems Trends and Advances is a comprehensive review of past and present research efforts in North America and other parts of the world It brings together biological economic sociological and technical aspects of cropping systems in a single source to provide a reference unlike any other on the subject that is available today This valuable book also points to future directions that cropping systems research needs to take in order to increase sustainable agriculture and feed the growing world population Charts tables and illustrations make the information easy to access and understand An ideal textbook for graduate and undergraduate courses in agronomy as well as a comprehensive reference for professionals involved in cropping systems research Cropping Systems Trends and Advances is a book you ll refer to again and again Topics covered in this well referenced and thoughtfully indexed book include emerging trends in cropping systems research designing resource efficient cropping systems soil quality and fertility tillage root dynamics water quality concerns nitrogen use efficiency precision agriculture agricultural biotechnology weed biology and management integrated pest management the important role that cover crops can play key indicators for assessing nitrogen use efficiency in cereal based agroecosystems the implications of elevated carbon dioxide induced changes in agroecosystem productivity and a great deal more Achieving sustainable cultivation of rice Volume 2 Prof. Takuji Sasaki,2017-05-22 Summarises advances in cultivation practices to close yield gaps including more efficient irrigation and nutrition techniques Discusses innovative methods of climate smart cultivation such as integrated crop management and the system of rice intensification SRI Reviews the latest research on insect pests weeds and integrated pest management

**Food Systems Evaluation Methods and Sustainability Assessment** Bradley George Ridoutt,Aida Turrini,2024-03-08 The food system is responsible for some of society s most pressing sustainability challenges Diets are currently unsustainable in many countries as evidenced by the growing burden of malnutrition degradation of natural resources contributions to climate change and unaffordability of healthy diets There is an urgent need to address the gaps in understanding of what a sustainable food system means across varying populations and geographies and how we can better measure these systems while identifying how dietary choices impact on human health and the environment However decision makers and experts are questioning whether it is possible to meet environmental social and economic goals simultaneously or whether trade offs

are necessary Thus the development of better measurements and indicators to clearly understand the benefits and considerations for healthy and sustainable food systems is needed
