Sustainable Architecture In Japan The Green Buildings Of Nikken Sekkei:

Sustainable Architecture in Japan Anna Ray-Jones, 2000-08-29 The concept of sustainable architecture has a high profile at present as we are becoming increasingly aware of our responsibilities towards the preservation of our planet Nikken Sekkei is an architectural firm known for its consideration of the environmental consequences of its buildings and this will be the first book to give a comprehensive coverage of this aspect of their work to date

Sustainable Architecture and Urbanism Dominique Gauzin-Müller, 2002-07-01 Since the mid 1980s and in particular the 1992 environmental summit in Rio de Janeiro sustainability has become a global issue and the subject of international debate In the context of architecture sustainability implies the use of intelligent technology innovative construction methods ecologically friendly materials and use of environmentally friendly energy resources This book begins with an overview of the various approaches and developments in sustainable architecture followed by an in depth section on urbanism looking at several European towns In the third section the technologies materials and methods of ecological architecture are examined Concluding the volume are 23 sophisticated and innovative European case studies The author and architect Dominique Gauzin Müller has specialised on energy and environmental issues and ecological architecture for over 15 years

Sustainable Buildings in Practice George Baird, 2010-01-29 Current assessment methods of sustainable buildings do not adequately account for the users needs Given that over the life of a building total salary costs far outweigh both operating costs and combined capital and rental costs the occupants needs are not something which should be sensibly ignored This book presents an unbiased evaluation of thirty of the most cutting edge sustainable buildings in the world in terms of the users perceived comfort health and productivity The author has visited the buildings interviewed the design teams and examined the findings of a sixty question standardized user questionnaire The book provides thirty case studies covering mixed mode passive and environmentally sustainable commercial and institutional buildings detailed insights into the principles underlying the design of sustainable buildings worldwide over several climatic zones and eleven countries together with clear explanations and illustrations of innovative design practice a discussion of common issues and the lessons that may be learnt from a study of the performance of sustainable buildings in practice from the point of view of the people who use them This important book will be of great benefit to architects and engineers facility managers of commercial and institutional buildings as well as developers and researchers academics and students in these fields

The Architectural Expression of Environmental Control Systems George Baird, 2003-09-02 The Architectural Expression of Environmental Control Systems examines the way project teams can approach the design and expression of both active and passive environmental control systems in a more creative way Using seminal case studies from around the world and interviews with the architects and environmental engineers involved the book illustrates innovative responses to client site and user requirements focusing upon elegant design solutions to a perennial problem This book will inspire architects building scientists and building services engineers to take a more

creative approach to the design and expression of environmental control systems whether active or passive whether they influence overall building form or design detail , Frontiers of Green Building, Materials and Civil Engineering III Jimmy Chih Ming Kao,Wen Pei Sung,Ran Chen,2013-08-30 Selected peer reviewed papers from the Second International Conference on Green Building Materials and Civil Engineering GBMCE 2013 August 21 23 2013 Taiwan Project Japan Graham Cooper,2009 Project Japan is the product of a long journey by author Graham Cooper A sustained rolling programme relating to contemporary art and architecture in Japan this project involved over a decade of commitment more than a dozen research and documentation Portugal SB07. Sustainable Construction, Materials and Practices Luis Bragança,Manuel D. Pinheiro,Said Jalali,Ricardo Mateus,Rogério Amoêda,Manuel Correia Guedes,2007-08-15 The construction industry is a vibrant and active industry The building sector is responsible for creating modifying and improving the living environment of humanity On the other hand construction and buildings have considerable environmental impacts consuming a significant proportion of limited resources of the planet including energy raw material water and land Therefore the sustainability of the built environment the construction industry and the related activities is a pressing issue facing all stakeholders in order to promote Sustainable Development The new millennium is challenging practitioners and researchers with the sustainability of the built environment and the construction industry Hence the main purpose of this publication is to discuss these challenges and present solutions that actively facilitate and promote the adoption of policies methods and tools to accelerate the movement towards a global sustainable built environment The issues presented include Building sustainability assessment tools Indoor environment quality and benchmarks Sustainable resources and materials use Use of non conventional materials Use of industrial waste Eco materials and technologies Sustainable management of existing building stock Innovative sustainable construction systems and Design *A Handbook on Low-Energy Buildings and District-Energy Systems* L.D. Danny Harvey,2012-08-21 Winner of Choice Magazine Outstanding Academic Titles for 2007 Buildings account for over one third of global energy use and associated greenhouse gas emissions worldwide Reducing energy use by buildings is therefore an essential part of any strategy to reduce greenhouse gas emissions and thereby lessen the likelihood of potentially catastrophic climate change Bringing together a wealth of hard to obtain information on energy use and energy efficiency in buildings at a level which can be easily digested and applied Danny Harvey offers a comprehensive objective and critical sourcebook on low energy buildings Topics covered include thermal envelopes heating cooling heat pumps HVAC systems hot water lighting solar energy appliances and office equipment embodied energy buildings as systems and community integrated energy systems cogeneration district heating and district cooling The book includes exemplary buildings and techniques from North America Europe and Asia and combines a broad holistic perspective with technical detail in an accessible and insightful manner Design and Ethics Emma Felton,Oksana Zelenko,Suzi Vaughan,2013-06-19 The value of design for contributing to environmental solutions and a sustainable future is increasingly recognised It spans many spheres

of everyday life and the ethical dimension of design practice that considers environmental social and economic sustainability is compelling Approaches to design recognise design as a practice that can transform human experience and understanding expanding its role beyond stylistic enhancement The traditional roles of design designer and designed object are therefore redefined through new understanding of the relationship between the material and immaterial aspects of design where the design product and the design process are embodiments of ideas values and beliefs This multi disciplinary approach considers how to create design which is at once aesthetically pleasing and also ethically considered with contributions from fields as diverse as architecture fashion urban design and philosophy The authors also address how to teach design based subjects while instilling a desire in the student to develop ethical work practices both inside and outside the studio The Transformable House Jonathan Bell, Sally Godwin, 2000-12-27 For modern architects experimentation with space and the house plan provides the most fertile area of innovation allowing them to push established boundaries and question received conventions in domestic design As we enter the 21st century the incorporation of greater flexibility into housing has become a matter of urgency The traditional notion of the family unit is being exploded Small domestic groupings have become dispersed with the fragmentation of families and more people choosing to live alone At the same time the pressure put on space by multiple marriages and extended families means that the requirements for our home are never still as they constantly expand and contract The conventional layout for suburban housing can no longer sustain or cater for changing social needs This Architectural Design title fully explores the concept of transformability in house design Through a set of introductory essays by Iain Borden Catherine Croft James Gallie Dennis Sharp Stefan Muthesius and Miles Glendinning the roots of this phenomenon are examined in 20th century design It is however through the eleven case studies of contemporary architects projects that the concept of transformability is stretched to its full It is revealed to mean many things the integration of technology into the home the use of modular systems to facilitate construction and planning and the development of complex devices for modifying and customising architectural space on a day to day basis *Urban Ecology* Richard T. T. Forman, 2014-02-13 The first richly illustrated worldwide portrayal of urban ecology tying together organisms built structures and the physical environment around cities **The Importance of Greenery in Sustainable Buildings** Ali Sayigh, Antonella Trombadore, 2021-07-23 This book covers the important aspects of greenery in buildings both in the landscape and within buildings examining how greenery improves comfort and appeal in sustainable buildings The book is part of the World Renewable Energy Network's drive to encourage architects and builders to use greenery as much as possible in their design to reduce energy consumption and provide a pleasant appearance and pleasing aspect to their buildings It shows and demonstrates how widespread the use of greenery is in buildings and the book's 17 chapters were chosen from 12 different countries representing a truly global look at the use and benefit of using greenery in buildings This book is aimed at architects building construction authorities urban planners and policymakers to encourage the use of

greenery in their future buildings and explain why it is important to do so **Energy Manual** Manfred Hegger, Matthias Fuchs, Thomas Stark, Martin Zeumer, 2012-12-10 While the efficiency and sustainability offensive is in full swing in most sectors of the economy in the construction sector it is still in its very beginnings economically as well as ecologically However politicians and policymakers at the global European and national levels have begun to address this deficit and are seeking to correct it with legal requirements and laws like EnEV building certifications and competitions Following the proven model of earlier manuals in the series the Energy Manual presents a comprehensive look at the constructional parameters of energy efficiency and sustainability It offers an advance look at the legal regulations being planned by the EU and as a tool ready for immediate use by architects engineers and designers in their daily work it points the way toward the efficient and sustainable construction and operation of buildings With its focus on the entire lifecycle of a building it provides an integrated perspective a necessary prerequisite for sustainable economic management **Housing** ,2002 □□□□□□□□ ,2006 CSTB STDPC PEXE *G.K. Hall Bibliographic Guide to East Asian Studies* ,2000 **Biomimetic and Biophilic Design as a Model for Regenerative Redevelopment of the Post-industrial San Francisco Bay Edge** Mara Baum,2005 Experimental Green Strategies ,2011 *Architectural Publications Index* ,2000
