## **Sustainable Business Challenge A Briefing For Tomorrow's Business Leaders:**

*The sustainable business challenge* World Business Council for Sustainable Development, 1997      **The Sustainable Business Challenge** Jan-Olaf Willums, 2017

Two decades ago in the late 1970s environmental concerns were only beginning to surface in the world's boardrooms. Today environmental stewardship is part of every board member's vocabulary. So what issues will be on the corporate board agenda twenty years from now? How fully will environmental and social questions be integrated into the fabric of an enterprise? That depends on those entering the corporate world now. By the time today's business students have gained senior positions, concepts such as eco efficiency and the social licence to operate should be common currency. Therefore environmental concerns will be high on the list of recruitment and career development requirements of 21st century corporations. So how well prepared are today's business students?

The Sustainable Business Challenge began with a collaboration between the WBCSD and the international student organization AISEC to discover precisely that. Environmental staff from the WBCSD's member companies, business professors and members of environmental NGOs were asked to help compile a document of what every student should know. A version was posted on the Internet along with a certificated exam, The Sustainable Business Challenge Exam, and was greeted with much enthusiasm from around the world. This success prompted great demand for an accompanying book. Based on the original Internet background document, The Sustainable Business Challenge is now available.

The Sustainable Business Challenge is the most comprehensive and up to date primer available on issues of corporate sustainability and of environmental issues that affect business. All the key topics are addressed thoroughly and succinctly. What does sustainable development mean and what are its implications? What are the important issues for business regarding climate, water, fisheries, agriculture, forestry, biodiversity, energy, transport and waste? What are the key topics on today's board agenda? What do businesses need to know about emerging themes such as product stewardship, sustainable consumption, global trade and risk and uncertainty? What are the tools for managing the sustainable corporation? What about concepts for the next century such as eco efficiency by product synergy, the triple bottom line? In order to put these issues and many more in context, they are all viewed from the perspective of the fictional SDX Corporation, a US multinational manufacturing corporation, as they get to grips with the policy implications of environmental issues throughout 1999. We eavesdrop on an imagined dialogue as a large corporation questions its future via board papers, internal memoranda, letters and press clippings. This takes The Sustainable Business Challenge above the realm of an environmental management textbook, presenting instead the story of a corporation's search for sustainability. A final chapter takes us to 2020 and imagines what will be on the board's agenda by then. The Sustainable Business Challenge is unique in the breadth of its scope yet doesn't oversimplify the issues. It is thoroughly revised and up to date; it includes discussion on the implications of the Kyoto negotiations and includes contributions from John Elkington, SustainAbility, Rick Bunch, World Resources Institute and numerous others. Anyone, business students, managers, heads of SMEs looking for a single resource

that presents all the key environmental issues as they affect business now and into the next century need look no further than The Sustainable Business Challenge Provided by publisher The Sustainable Business Challenge Jan-Olaf Willums, 1998

**Stakeholder Thinking in Marketing** Michael Jay Polonsky, 2005 Stakeholder thinking in marketing Stakeholder thinking is becoming a core part of marketing as well as other business related disciplines A search of the business source primer database found that prior to 1995 there are 58 articles using the term stakeholder in their title and 27 academic marketing related articles with stakeholder as a key term The interest in stakeholder theory has however grown rapidly between January 2000 and November 2004 there were 228 articles using stakeholder theory in the title and 140 academic marketing related journal articles that examined stakeholder issues In fact the American Marketing Association's AMA 2004 new definition of marketing expressly incorporates our responsibility to consider how marketing activities impact stakeholders Marketing is an organizational function and a set of processes for creating communicating and delivering value to customers and for managing customer relationships in ways that benefit the organization and its stakeholders Thus the AMA has recognised the core role of stakeholder thinking While there is an increased interest in stakeholder thinking in marketing an examination of the literature would seem to suggest that there is no unified view of how stakeholder thinking can be or should be integrated into theory or practice Many of the stakeholder works marketing and in other disciplines still focus on the social and ethical impacts of stakeholders This may have been where much of stakeholder thinking initially gained its prominence but it is a broader strategic tool that can benefit a range of areas and was in fact the focus of Freeman's 1984 original work in the area This is not to suggest that the general strategic implications of stakeholder thinking are not being considered as an increasingly number of works are looking at stakeholder implications in regards to exchange networks relationship marketing and other issues related to strategy development The papers in this special issue have considered a range of varying perspectives including corporate social responsibility the impact of interacting with stakeholders relationship issues and broader discussions of stakeholder theory as a strategic tool These papers have taken a diverse range of perspectives including conceptual works case studies qualitative approaches and various empirical approaches to examining the issues of interest within various pieces The scope of papers included in the special as well as those not included identifies the breadth of relevance stakeholder thinking has for the application of all aspects of marketing theory and practice The question of how stakeholders and stakeholder theory can be considered in organisational activities and

marketing theory is an issue that most certainly seems to warrant further consideration. The works in this special issue have advanced this debate and identified some directions that could be considered. Stakeholder thinking is, however, not necessarily a paradigm shift in marketing thinking although some might believe it is but rather it broadens existing concepts such as relationship marketing, network theory, organisational social responsibility and other areas. Hopefully the papers presented in this special issue will encourage others to consider the inclusion of stakeholders into broader areas of marketing. Any special issue editor has to thank a range of people for assistance with developing the special issue. I would like to thank Audrey Gilmore and David Carson, editors of EJM, for allowing the special issue to be developed. Their input through the process has been invaluable. I would also like to thank the many authors of unsuccessful papers for submitting their work. It was, of course, impossible to include all papers in the special issue but the breadth of coverage in regards to topics and geographic areas would seem to demonstrate the growing interest in stakeholder thinking within marketing. Lastly, it is imperative that I thank the reviewers without their assistance the special issue would not have been possible. The following people reviewed papers for the special issue: Anupam Jaju, Gorge Mason University; Bill Kilbourn, Clemson University; Bob Heiser, New Mexico State University; Catherine Elder, eabode visi net; Cathy L Hartman, Utah State University; David Waller, University of Technology Sydney; David Stewart, Monash University; Devashish Pujari, McMaster University; Dr Russell Casey, Clayton State University; Duane Windsor, Rice University; Edwin R Stafford, Utah State University; Felix Mavondo, Monsah University; Frank de Bakker, University of Amsterdam; Hamish Ratten, University of Queensland; J Tomas Gomez Arias, St Mary's College of California; Jeanne M Logsdon, University of New Mexico; John F Mahon, University of Maine; John Stanton, University of Western Sydney; Kamal Ghose, University of South Australia; Kelly Strong, Iowa State University; Kirk Davidson, Mount St Mary's University; Kim E Schatzel, University of Michigan Dearborn; Les Carlson, Clemson University; Linda McGilvray, Massey University; Marie Louise Fry, University of Newcastle, Australia; Mary McKinley, ESCM School of Business and Management; Michael Beverland, Monsah University; Michael Hyman, New Mexico State University; Mike McCardle, Western Michigan University; Mike Reid, Monash University; Nick Grigoriou, Royal Melbourne Institute of Technology; Peter Scholem, Monash University; Rita Ferreira, University of Navarra, Spain; Garma Victoria, University of Australia; Ruhi Yahan, Victoria University, Australia; Rujirutana Mandhachitara, Long Island University; Sabrina Helm, Heinrich Heine University, Duesseldorf; Scott Vitell, The University of Mississippi; Sema Sakarya, Bogazici University; Srikanth Beldona, University of Delaware; Stacey Hills, Utah State University; Taras Danko, National Technical University, Ulrich Orth, Oregon State University and William E Martello, St Edwards University. A Thousand Shades of Green Peter Winsemius, Ulrich Guntram, 2013-06-17. What does it mean for the environment is a strategic corollary of almost any significant business decision today and companies must take seriously their responsibilities to regulators, customers, employees and the wider society. A Thousand Shades of Green is aimed at business

leaders in need of a clear understanding of the key corporate environmental challenges and the insight and vision to meet them imperatives such as engaging stakeholders and developing partnerships understanding the policy making process forming corporate responses and drafting environmental management strategies with the promise of genuine competitive advantage for their companies Drawing on their extensive consultancy experience with some of the most progressive companies around the world the authors examine why and how businesses must confront the rapidly developing agenda set by environmental constraints and social and regulatory pressure They identify the corporate environmental challenge with that of change management and advocate a recognition that there is no single strategy or endgame applicable to all companies there are a thousand shades of green Only by pursuing thorough reflective consistent competitive and proactive strategies will businesses be able to avoid being embroiled in costly and complex reactive approaches
