Sustainable Dryland Farming Combining Farmer Innovation And Medic Pasture In A Mediterranean Climate:

Sustainable Dryland Farming Lynne Chatterton, Brian Chatterton, 1996-02-22 Sheep and wheat are the staples of dryland farms in the Mediterranean zone of the Northern Hemisphere The commonly used dryland farming system introduced in the 1950s is proving unsustainable Erosion has reached a critical level and pastures have all but disappeared Experts advise more cropping forage crops for instance and more fertiliser Yet intensification of the present system will only hasten erosion Is there an alternative system that is both environmentally sustainable and within the means of most farmers in the region Innovative farmers in a similar climate in Australia discovered a sustainable rotation using annual medics as both fertiliser and pasture Attempts to transfer their knowledge have often foundered Why is this so How much do the experts know about this system This book pulls apart the warp and weft of development on dryland farms to try to find some answers to these questions

Drought and the Human Story R.L. Heathcote, 2016-05-13 Drought has been a long companion in the human story Mythologised as the devastating Bull of Heaven in one of the earliest heroic legends to come out of Mesopotamia drought has continued to wreak havoc upon societies in many cases playing a significant role in their final demise For societies in the 21st Century drought hovers on all horizons the ultimate drought proofing of society long sought remains elusive This study of the human conceptualization of drought in a global setting examines the historical record from early human society through to present day concerns to explore how and why attitudes to drought have changed and why the mitigation of its impacts has become more difficult To offer a more lasting strategy for protection against drought the author argues that physical scientists need to combine their skills in understanding global ecology and their technological expertise with the social scientists awareness of the socio economic political and cultural contexts in which modern societies operate Both will have to ensure that their cooperative strategies for drought management will be understood and supported by the public If this cooperation can be achieved the future rampages of the Bull of Heaven may be contained

The Water-Energy-Food Nexus in the Middle East and North Africa Martin Keulertz, Eckart Woertz, 2017-10-02 This book discusses key issues concerning water energy and food in the Middle East and North Africa MENA region It provides an interdisciplinary account of current developments in the most water scarce and conflict torn region in the world Key analysts on MENA water agriculture and energy affairs have been drawn together to compile one of the first edited volumes dedicated to the crucial role of water energy and food security in the 21st century MENA region It will be of interest to decision makers analysts and students of the future of the Middle East from a broad range of disciplines including the physical and social sciences This book was previously published as a special issue of the International Journal of Water Resources Development

Combining Economic and Political Development Giacomo Luciani, 2017-01-23 Since 2011 democratic transitions in the Middle East and North Africa have mostly failed to consolidate and have been hindered by the difficult economic heritage of previous authoritarian governments Yet newly established democratic governments must

deliver on the expectations of their people especially the poorer strata otherwise disillusionment may open the door to restoration of authoritarian rule Can democracy succeed Various ideas for economic policies that may help consolidate the early democratisation process are proposed in this volume while major obstacles on the way to democratic success are also highlighted Contributors include Alissa Amico Laura El Katiri Philippe Fargues Bassam Fattouh Steffen Hertog Giacomo Luciani Samir Makdisi Adeel Malik Bassem Snaije Robert Springborg and Eckart Woertz

The Water We Eat Marta Antonelli, Francesca Greco, 2015-04-11 This book pursues a comprehensive multidisciplinary approach in order to analyze the relationship between water and food security It demonstrates that most of the world's economies lack sufficient water resources to secure their populations food requirements and are thus virtual importers of water One of the most inspiring cases which this book is rooted in is Italy the third largest net virtual water importer on earth The book also shows that the sustainability of water depends on the extent to which societies recognize and take into account its value and contribution to agricultural production Due to the large volumes of water required for food production water and food security are in fact inextricably linked Contributions from leading international experts and scholars in the field use the concepts of virtual water and water footprints to explain this relationship with an eye to the empirical examples of wine tomato and pasta production in Italy This book provides a valuable resource for all researchers professionals policymakers and everyone else interested in water and food security

Droughts Donald A. Wilhite, 2016-09-17 Drought draws together contributions from over 75 leading international researchers in the field to present the most comprehensive body of research on the physical and social dimensions of drought to date Including an extensive range of case studies covering the most drought prone and most affected countries the contributors examine new technology planning methodologies and mitigation actions from recent drought experiences worldwide Following a discussion of the critical concepts of drought the work is divided into the following additional parts causes and predictability monitoring and early warning techniques impacts and assessment methodologies links between drought and other global issues conclusions and future challenges

,1997 **The Meat Crisis** Joyce D'Silva,John Webster,2017-08-23 Meat and dairy production and consumption are in crisis Globally 70 billion farm animals are used for food production every year It is well accepted that livestock production is a major contributor to greenhouse gas emissions The Food and Agriculture Organization of the United Nations FAO predicts a rough doubling of meat and milk consumption in the first half of the 21st century with particularly rapid growth occurring in the developing economies of Asia What will this mean for the health and wellbeing of those animals of the people who consume ever larger quantities of animal products and for the health of the planet itself The new edition of this powerful and challenging book explores the impacts of the global growth in the production and consumption of meat and dairy including cultural and health factors and the implications of the likely intensification of farming for both small scale producers and for animals Several chapters explore the related environmental issues from resource use of water cereals and soya to the impact of livestock production on global warming and issues concerning biodiversity land use and the impacts of different farming systems on the environment A final group of chapters addresses ethical and policy implications for the future of food and livestock production and consumption Since the first edition published in 2010 all chapters have been updated three original chapters re written and six new chapters added with additional coverage of dietary effects of milk and meat antibiotics in animal production and the economic political and ethical dimensions of meat consumption The overall message is clearly that we must eat less meat to help secure a more sustainable and equitable world The Journal of Developing Areas ,1995

Global Technology Transfer John Chumack,2002 Governments the world over fret continuously about the low level of transfer of technology especially within their own countries The general problem is military to industry although the variations are numerous Problems of presentation offering and support complicate an already byzantine world Yet somewhere within this dilemma lie the seeds of tomorrow s economic uptick Besides the nontrivial problems involved here the reluctance of the people having the technology to share it with someone who can profit from it stands out This book
