Mathematical Economics of Multi-Level Optimisation Sardar M.N. Islam,2012-12-06 Since there exists a multi level policy making system in the market economies choices of decision makers at different levels should be considered explicitly in the formulation of sectoral plans and policies To support the hypothesis a theoretical energy planning approach is developed within the framework of the theory of economic policy planning policy systems analysis and multi level programming The Parametric Programming Search Algorithm has been developed On the basis of this theoretical model an Australian Energy Policy System Optimisation Model AEPSOM has been developed and is used to formulate an Australian multi level energy plan Sustainable Practices in the Built Environment Craig A.
