Sustainable Public Sector Finance in Latin America, 1999 *Downsizing the State* Dag MacLeod, 2010-11-01 Beginning in 1983 the Mexican government implemented one of the most extensive programs of market oriented reform in the developing world *Downsizing the State* examines a key element of this reform program the privatization of public firms Drawing upon interviews with government officials business executives and labor leaders as well as data from government archives and corporate documents MacLeod highlights the difficulties of linking market reforms to improved public welfare Privatization failed to live up to its promise of raising living standards or decentralizing the economy Indeed privatization actually increased the concentration of wealth in Mexico while redirecting the economy toward foreign markets These findings contribute to theoretical debates regarding state autonomy and the embeddedness of economic action MacLeod calls into question the autonomy of the Mexican state in its privatization program He shows that the creation of markets where public firms once dominated has involved both the destruction of social relations and the construction of new relations and institutions to regulate the market *World Development Report 2017* World Bank Group, 2017-02-02 Why are carefully designed sensible policies too often not adopted or implemented When they are why do they often fail to generate development outcomes such as security growth and equity And why do some bad policies endure *World Development Report 2017 Governance and the Law* addresses these fundamental questions which are at the heart of development Policy making and policy implementation do not occur in a vacuum Rather they take place in complex political and social settings in which individuals and groups with unequal power interact within changing rules as they pursue conflicting interests The process of these interactions is what this Report calls governance and the space in which these interactions take place the policy arena The capacity of actors to commit and their willingness to cooperate and coordinate to achieve socially desirable goals are what matter for effectiveness However who bargains who is excluded and what barriers block entry to the policy arena determine the selection and implementation of policies and consequently their impact on development outcomes Exclusion capture and clientelism are manifestations of power asymmetries that lead to failures to achieve security growth and equity The distribution of power in society is partly determined by history Yet there is room for positive change This Report reveals that governance can mitigate even overcome power asymmetries to bring about more effective policy interventions that achieve sustainable improvements in security growth and equity This happens by shifting the incentives of those with power reshaping their preferences in favor of good outcomes and taking into account the interests of previously excluded participants These changes can come about through bargains among elites and greater citizen engagement as well as by international actors supporting rules that strengthen coalitions for reform Generating public sector resources to finance sustainable development Stefano Pagiola, 2002 Annotation This specific objective of this book is to explore potential avenues for generating more resources for the public sector to invest in sustainable development *Democracy and Public*

Management Reform Luiz Carlos Bresser-Pereira, 2004-10-07 Building the Republican State is an insightful analysis of the new state and the new public management that is emerging in the twenty first century It presents the historical stages that led to the modern state identifies a crisis of the nation state and its origins in a fiscal crisis and in globalization and situates public management in the last phase the social liberal and republican state To understand such stages the author develops the theory of republican rights as a fourth type of citizenship right after the civil the political and the social rights The book contains an original model of reform in which the roles of the state the forms of ownership the types of public administration and the organizational institutions indicated in each situation are put together Additionally the book discusses the political theories behind the reform and its political implications Throughout the book the author underlines the complementary roles of markets and the state and the importance of building state capacity to assure administrative efficiency always having in count the democratic constraint i e the prevalence of the political over the economic realm This is essential reading both for those studying political theory and government reform as well as for anyone interested in state politics and globalization

Economic Review ,2001 Taking the State Back Out? Dag MacLeod, 2001 **Labor Issues in Infrastructure Reform** Public-Private Infrastructure Advisory Facility, 2004 Fears of job loss and changes in employment status have often led workers and unions to oppose privatization and to take actions that delay or block reforms Many developing country governments have been reluctant to undertake reforms because of labor opposition and the political costs involved Such difficulties are often compounded by concerns about the social impact of reforms particularly in countries where social safety nets and labor markets are lacking The objective of the Toolkit which includes a CD ROM is to provide practical tools and information to help policy makers and practitioners deal with these sensitive issues The Toolkit helps governments identify and select appropriate strategies and approaches offers guidelines for design and implementation based on best practice and actual experience and indicates the factors influencing the choice of strategy and options The Toolkit is illustrated with examples checklists and templates that walk decision makers through best practice methodologies *Development Banks and Sustainability in the Andean Amazon* Rebecca Ray, Kevin P. Gallagher, Cynthia A. Sanborn, 2019-10-10 This book explores what development banks governments and communities have learned in the last decade of careful negotiation between social and environmental protections in the Andean Amazon and the pressures of a surging infrastructure and development boom While mega dams highways and ports are filling up the pipelines of planners the national governments of Andean and Amazon basin countries and major development banks have enacted ambitious social and environmental protections The book traces the development of social and environmental protections after years of struggle by affected communities going beyond official policies to discover how these reforms work in practice and ultimately whether they are enough to stem the risks of infrastructure mega projects As Chinese public banks play an increasingly important role in the region the book also demonstrates that there is a risk of governments undercutting their own standards By contrast this book shows that making

infrastructure work for everyone involved requires mutually reinforcing networks of support and accountability among communities governments and development banks This book led by an expert multi disciplinary international team will be of considerable interest to researchers in the fields of development and development economics geography anthropology and ecology as well as practitioners in development banks and in government regulatory and foreign aid agencies

Contemporary Issues in Development Finance Joshua Yindenaba Abor, Charles Komla Delali Adjasi, Robert Lensink, 2020-12-29 Contemporary Issues in Development Finance provides comprehensive and up to date coverage of theoretical and policy issues in development finance from both the domestic and the external finance perspectives and emphasizes addressing the gaps in financial markets The chapters cover topical issues such as microfinance private sector financing aid FDI remittances sovereign wealth trade finance and the sectoral financing of agricultural and infrastructural projects Readers will acquire both breadth and depth of knowledge in critical and contemporary issues in development finance from a philosophical and yet pragmatic development impact approach The text ensures this by carefully integrating the relevant theoretical underpinnings empirical assessments and practical policy issues into its analysis The work is designed to be fully accessible to practitioners with only a limited theoretical economic background allowing them to deeply engage with the book as useful reference material Readers may find more advanced information and technical details provided in clear concise boxes throughout the text Finally each chapter is fully supported by a set of review questions and by cases and examples from developing countries particularly those in Africa This book is a valuable resource for both development finance researchers and students taking courses in development finance development economics international finance financial development policy and economic policy management Practitioners will find the development impact policy and conceptual analysis dimensions insightful analysing and designing intervention strategies The New Bryant & Stratton Counting-House Book-Keeping Silas Sadler Packard, Henry Beadman Bryant, 2022-10-27 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant APAIS 1992: Australian public affairs information service , **World Investment Report 2007 Transnational Corporations, Extractive Industries and Development** United Nations, 2008 The Statesman's Yearbook 2017 Palgrave Macmillan, 2017-02-28 Now in its 153rd edition The Statesman s Yearbook continues to be the reference work of choice for accurate and reliable information on every country in the world Covering political economic social and cultural aspects the Yearbook is also available online for subscribing institutions www.statesmansyearbook.com

Getting Organized in Vietnam Ben J Tria Kerkvliet, 2003-08-01 From the late 1950s in the north to the 1970s until the mid 1980s in the south there was little room or opportunity to form non state voluntary organizations and associations in Vietnam With few exceptions only those established by the Communist Party and other state agencies were permitted The picture has changed considerably since doi moi From proactive self help associations for the disabled to mass semi state or non governmentale organizations the Vietnamese people are getting together to voice their collective and specific interests vis a vis the state The process of getting together voicing ideas acting in concert and attempting to influence policy in some cases is ongoing and in constant flux This book presents original case studies of the gamut of organizations in Vietnam today and analyses their relationships with umbrella state organizations which are themselves evolving Getting Organized in Vietnam also constitutes an enquiry into the term e civil societye itself The contributors examine current thinking about the nature of the state in Vietnam in particular Included here are the first attempts to provide a framework for assessing and categorizing the bewildering array of small organizations in Vietnam which ones are weakly connected to the state which ones are independent of the state but perhaps dependent on outside funding agencies This book is a must for scholars policymakers journalists and others interested in understanding political and social change in Vietnam and other transitional economies

Re-envisioning Sovereignty Trudy Jacobsen, 2016-04-08 Sovereignty as a concept is in a state of flux In the course of the last century traditional meanings have been worn away while the limitations of sovereignty have been altered as transnational issues compete with domestic concerns for precedence This volume presents an interdisciplinary analysis of conceptions of sovereignty Divided into six overarching elements it explores a wide range of issues that have altered the theory and practice of state sovereignty such as human rights and the use of force for human protection purposes norms relating to governance the war on terror economic globalization the natural environment and changes in strategic thinking The authors are acknowledged experts in their respective areas and discuss the contemporary meaning and relevance of sovereignty and how it relates to the constitution of international order

Falling Long-Term Growth Prospects M. Ayhan Kose, Franziska Ohnsorge, 2024-02-29 A structural growth slowdown is under way across the world at current trends the global rate of potential growth is expected to fall to a three decade low over the remainder of the 2020s Nearly all the forces that have powered growth and prosperity since the early 1990s have weakened

In addition a series of shocks has affected the global economy over the past three years A persistent and broad based decline in long term growth prospects imperils the ability of emerging market and developing economies to combat poverty tackle climate change and meet other key development objectives The challenges presented by this potential inability call for an ambitious policy response at the national and global levels This book presents the first detailed analysis of the growth slowdown and a rich menu of policy options to deliver better growth outcomes This book presents a sobering analysis of the secular growth slowdown based on the most comprehensive database of potential growth estimates available to date With nearly all the forces that have driven growth and prosperity in recent decades now weakened the book argues that a prolonged period of weakness is under way with serious implications for emerging market and developing economies The authors call for bold policy actions at both the national and global levels to lift growth prospects The book is essential reading for policy makers economists and anyone concerned about the future of the global economy Beatrice Weder di

Mauro Professor of International Economics Geneva Graduate Institute and President of the Centre for Economic Policy Research CEPR Economic policy making is becoming increasingly complicated in the 2020s In addition to tackling traditional trade offs in aggregate demand management and improving efficiency on the supply side policy makers need to address new priorities and challenges from addressing climate change and its impacts to improving income distribution all in the context of lower growth rates waning productivity growth and flattening of the globalization process that has brought unprecedented prosperity across the globe and lifted more than a billion people out of poverty In *Falling Long Term Growth Prospects* the authors do a phenomenal job of assessing these trends at the global and regional levels identifying and unpacking salient twenty first century policy challenges and providing thoughtful and evidence based policy prescriptions for leaders in advanced emerging market and developing economies Importantly the book underscores that these challenges tend to be global and hence global cooperation at all levels is necessary to achieve optimal results Alas we seem to be going in the opposite direction this book offers a road map to put us back on the path to creating a more integrated prosperous and equitable global community Michael G Plummer Director SAIS Europe and ENI Professor of International Economics The Johns Hopkins University
