

Defining and measuring sustainability

by Steve Cohen, Earth Institute, Columbia University

Back in 2009 when I was completing my book Sustainability Management and preparing it for publication by Columbia University Press in 2010, I was also working with colleagues at Columbia's Earth Institute and School of Continuing Education (now Professional Studies) to develop a new master's program in Sustainability Management. I remember struggling to provide a meaningful and bounded definition for sustainability, and in the end, we decided our focus would be on "environmental" sustainability. It's difficult to believe that a decade has passed since that time, but not hard to believe that we continue to struggle with boundaries and definitions. What was common to our thinking then and at least as typical today, was our desire to ensure that we were focusing on substance rather than symbols.

Sustainability is the mantra of the moment, a word used by many people for many purposes. Over a decade ago I was at an Earth Institute meeting with Jeff Sachs and Bill Gates, whose foundation had helped fund the Millennium Villages Project, and we discussed the concepts of "sustainability and sustainable development." Mr. Gates did not like the concept of "sustainability" since he thought we ought to be about improving our conditions, not simply sustaining them. In other settings, I've participated in intense discussions contrasting the concepts of sustainability with sustainable development. The term sustainability seems to be a word in search of a modifier. Development is preferred by some. I've been leaning toward "environmental sustainability". Or "sustainability management": The practice of organizational management that has the goal of sustaining our environment so that future generations have the land, air, water and food they need to live.

In our Sustainability Management Master's program, we require three courses on "the physical dimensions of sustainability." The rest of the program is an environmentally focused management degree, but for "physical dimensions," we require our students to study energy, pollution, water, food, green architecture, ecology and climate science. Sustainability requires a deeper understanding of our physical world: its resources and the impact of human technology on its natural systems. We are trying to bound the definition of sustainability by the topics we include in the curriculum.

Of course, not everyone agrees with this emphasis on the physical environment. In this view, human rights, labor practices, gender and race biases and a range of social justice issues must be included because, without them, organizations and places cannot truly be considered sustainable. In my view, all of these definitions are legitimate and worthy of discussion and I suspect that under the broad umbrella of "sustainability" we will see a number of subfields and more bounded definitions. We are already seeing the emergence of fields devoted to social sustainability, financial sustainability and risk assessment, organizational sustainability and environmental sustainability. All of this, I consider to be substantive sustainability. All can be carefully defined and measured.

Research into Design for Communities, Volume 2 Amaresh Chakrabarti, Deb Kumar Chakrabarti, 2017-04-13 This book showcases cutting edge research papers from the 6th International Conference on Research into Design ICoRD 2017, the largest in India in this area, written by eminent researchers from across the world on design process, technologies, methods, and tools, and their impact on innovation for supporting design for communities. While design traditionally focused on the development of products for the individual, the emerging consensus on working towards a more sustainable world demands greater attention to designing for and with communities so as to promote their sustenance and harmony within each community and across communities. The special features of the book are the insights into the product and system innovation process and the host of methods and tools from all major areas of design research for the enhancement of the innovation process. The main benefit of the book for researchers in various areas of design and innovation is access to the latest quality research in this area with the largest collection of research from India. For practitioners and educators, it is exposure to an empirically validated suite of theories, models, methods, and tools that can be taught and practiced for design-led innovation. The contents of this volume will be of use to researchers and professionals working in the areas of industrial design, manufacturing, consumer goods, and industrial management

Housing and Social Change Ray Forrest, James Lee, 2003 The aim of this book is to provide a benchmark statement of key issues on housing and to emphasise the need to embed our understanding of housing issues in an international and multidisciplinary setting

Education for Sustainability Stephen Sterling, John Huckle, 2014-08-07 Now with new Introduction and additional new chapter At a time when polls suggest that a majority of young British people believe that the future will offer a worse quality of life than the present it is becoming imperative that children are introduced to principles of sustainability through the educational system from an early age and that these principles are regularly reinforced and built upon The government s own Panel on Sustainable Development has called for a comprehensive strategy for environmental and training and NGOs frequently point to education as a key policy instrument in the transition to sustainable development This is the first book published in Britain to provide

an overview of the theory and practice of these issues It brings together contributions from environmental educators working in the formal and informal sectors and in continuing education and provides perspectives on the philosophy politics and pedagogy of education for sustainability as well as case studies and pointers towards good practice Part I establishes some initial perspectives on sustainability education and the role of NGOs the potential for education for sustainability in the formal and informal sectors is assessed in Parts II and III Part IV discusses its development as part of the greening of business and local government and Part V looks at the way forward

Integrated Power And Desalination Plants Asghar. Husain, 2003-10-15 Application of advanced computer oriented techniques are necessary in the synthesis design analysis and operation of a complex integrated plant to produce power and freshwater by desalting seawater or brackish water at higher efficiency and lower cost These are the two vital commodities to maintain sustainability of life particularly in the arid regions where natural freshwater supply is either totally lacking or has become scarce Even in the regions with polluted water resources such a system is required to support life At the same time the available energy should be put to maximum use and life cycle analysis is essential to ensure sustainability of the systems The contributors of this book experts in their own respective fields outline the various techniques enriched by their experience The contents of the book would therefore be of great interest not only to designers and operators of dual purpose power desalination plants but also to educators and researchers as well serve as a valuable source of information to those engaged in other areas of processing industry The book is motivated by the growing importance of integrated power and desalination plants in general and in their respective regions in particular and the long felt need for an authoritative book on the subject After a long gap of more than two decades following the publication of Principles of Desalination Spiegler and Laird in 1980 this book would be a welcome addition to the literature in the field to serve as a valuable guide and reference to all those who are concerned with the integration of power and desalination plants It will also serve as a valuable source of information to those in the processing industry in general

Managing Sustainable Development Michael Carley, Ian Christie, 2017-09-25 In a world where environmental problems spill across political administrative and disciplinary boundaries there is a pressing need for a clear understanding of the kinds of organizations management structures and policy making approaches required to bring about socially equitable and ecologically sustainable development In this second edition the authors incorporate lessons from a decade of work on the conditions of sustainability in both developed and developing countries They prescribe action networks partnerships of flexible achievement oriented actors and present new case studies demonstrating the success of organizations that have applied this approach They also introduce case studies on action networks that work simultaneously on international national and local levels

Eco Targets, Goal Functions, and Orientors Felix Müller, Maren Leupelt, 1998-04-08 This volume comprises the proceedings of the International Workshop on Eco logical Goal Functions held at the Schleswig Holstein Cultural Center of Salzac August 30 September 4 1996 The conference first in a series intended to

be convened at Salza at 12 year intervals to address various aspects of theoretical and application oriented ecology was initiated organized and carried out under the auspices of the Ecology Center of the Kiel University It featured key note addresses invited lectures submitted papers and posters 32 contributions written by authors from eight countries were selected to be presented in this book From the very rich discussions of the workshop some general characteristics emerged which might become important for a deeper understanding of the nature of evolving systems or in other words systems with a history described by variables with a high degree of interdependence These characteristics include the following Speaking of goal functions is a convenient *fa on de parler* since a logical analysis of the formal structure of teleological and causal explanations shows that both are analogous with regard to the inherent structural typology and the basic mode of explanation Teleological interpretations introduce motives or objectives of actors into the set of antecedens conditions relevant for system evolution and are consequently a subset of causal interpretations

Sustainability on Campus Peggy F. Barlett, Geoffrey W. Chase, 2004 Stories both practical and inspirational about environmental leadership on campus These personal narratives of greening college campuses offer inspiration motivation and practical advice Written by faculty staff administrators and a student from varying perspectives and reflecting divergent experiences these stories also map the growing strength of a national movement toward environmental responsibility on campus Environmental awareness on college and university campuses began with the celebratory consciousness raising of Earth Day 1970 Since then environmental action on campus has been both global in research and policy formation and local in efforts to make specific environmental improvements on campuses The stories in this book show that achieving environmental sustainability is not a matter of applying the formulas of risk management or engineering technology but part of what the editors call the messy reality of participatory engagement in cultural transformation In Sustainability on Campus campus leaders recount inspiring stories of strategies that moved eighteen colleges and universities toward a more sustainable future This book is for faculty students administrators staff and community partners whether hesitant or committed knowledgeable or newcomer Scholars and activists have recognized the crucial role that higher education can play in the sustainability effort and each chapter in the book is full of ideas about how to get started revitalize efforts and overcome roadblocks Human and at times joyful these stories illustrate many forms of leadership in new courses and faculty development green buildings and administrative policies student programs residential life and collaborations with local communities
