Resources in Education, 1995 **Using the Agricultural, Environmental, and Food Literature** Barbara S. Hutchinson, Antoinette Paris-Greider, 2002-07-17. This text discusses a wide range of print and electronic media to locate hard to find documents, navigate poorly indexed subjects and investigate specific research topics and subcategories. It includes a chapter on grey and extension literature covering technical reports and international issues. Bibliography of Agriculture with Subject Index, 1995 *Special Reference Briefs*, 1983 HortIdeas, 2000 **Bibliography of Agriculture with Subject Index**, 1997 **Facilitating Sustainable Agriculture** N. G. Roling, M. A. E. Wagemakers, 2000-09-21. A move towards more flexible sustainable agricultural practices is increasingly being seen as the way to address or avoid environmental and economic problems associated with existing predominantly intensive farming systems. Through case studies taken from around the world, this book examines the implications of adopting more ecologically sound agricultural practices both at the level of individual farmers and at the level of larger scale agro ecosystems such as water catchments. The emphasis of the book is on human and social aspects rather than on agronomic or economic considerations, focusing on the learning processes necessary for change to be implemented and in turn on the facilitation of that learning through participatory approaches and appropriate institutional support and policy structure. Subject Guide to Books in Print, 1991

The Living Land Jules N. Pretty, 1999. First Published in 1999. Routledge is an imprint of Taylor Francis, an information company. Annual Report, 1997 **Subject Guide to Children's Books in Print 1997** Bowker Editorial Staff, R R Bowker Publishing, 1996-09 Agroecological Innovations Norman Uphoff, 2013-06-17. The world's food supply needs to rise significantly yet both arable land and water supplies per capita are decreasing. Not only are modern agricultural methods beyond the reach of those suffering the greatest food insecurity but they are also ecologically damaging, relying upon fossil energy and chemical inputs. This volume offers a collection of innovative and diverse approaches to agricultural development. Documented in 12 case studies, these approaches are reliant upon greater knowledge, skill and labour input rather than larger capital expenditure. They are shown to increase yield substantially, sometimes doubling or tripling output. This volume presents the concepts and operational means for reorienting agricultural efforts towards these more environmentally friendly and socially desirable approaches in the developed as well as developing world.
