Sustainable Development In Western Europe Coming To Terms With Agenda 21:

Sustainable Development in Western Europe Timothy O'Riordan, Heather Voisey, 1997 The transition to sustainable development will test government democracy in a radical way These essays look at the three elements of sustainable development reliable growth stewardship and empowerment in terms of the institutional challenge they pose It provides the view of five European Union Member States

Sustainable Communities in Europe William M. Lafferty, 2014-05-14 A presentation of detailed comparative research into the implementation in 11 European countries of Local Agenda 21 the action plan for sustainable development at community level Overviews of implementation in each country are accompanied by analysis of positive and negative changes as well as a comparative analysis with high academic and policy relevance Numerous practical examples are included of best cases and crucial barriers

Climate Change and European Leadership J. Gupta, M.J. Grubb, 2013-06-29 The issue of climate change is now widely recognised as one of the major challenges for mankind in the 21st century not only because it may ultimately affect many areas of our environment nature and human activity but also because its mitigation may have far reaching consequences for almost all sectors of the economy where energy conversion takes place Although climate change is firmly positioned on the political agenda and some initial targets have been agreed within a global framework we are still far away from a mature political and practical policy which may deliver timely and appropriate results to turn the tide This is partly due to the complex nature of a possible global climate change regime the still early stage of the development of effective and efficient instruments and the wide variety of possible ramifications for individual countries and economic sectors But it is also due to the complexity of the negotiation process and the lack of effective international or even global governance and leadership to tackle a multi dimensional problem of this size and nature This book is the first broad attempt to address the issue of leadership by one of the major parties to the UN Framework Convention on Climate Change in the ongoing international debate and negotiations towards such a policy which inevitably has to be constructed on a global scale

A New Agenda for Sustainability Mr Bo Elling, Mr Erling Jelsøe, Ms Maria Figueroa, Professor Kurt Aagaard Nielsen, 2012-11-28 Two decades after the Brundtland Commission's Report Our Common Future adopted the concept of sustainable development this book provides a renewal of the concept exploring the potential for new practices and fields for those involved in sustainability activity The book addresses a number of themes concerning firstly the provision of a next generation perspective which was a central and still unresolved notion of the original Brundtland definition and secondly the provision of new milestones for policy and research that can expand the discussion on this second generation concept on sustainability The material dealt with in the book offers a wide variety of perspectives on sustainability and reflects the importance of interdisciplinary and transdisciplinary work in the field Suggesting targets for future analytical and political efforts in achieving global sustainability this book offers new analytical opportunities for holistic politics and research at a general and sector level

Local Governance in the New

Urban Agenda Carlos Nunes Silva, Anna Trono, 2020-10-19 The book explores and discusses some of the changes challenges and opportunities confronting local governance in the context of the new urban paradigm associated with the HABITAT III New Urban Agenda a 20 year strategy for sustainable urbanization adopted in October 2016 in Quito Ecuador The chapters included in the book address public policy issues from different theoretical perspectives and methodological approaches written by authors from different academic disciplines within the broad area of social sciences Geography Political Science Public Administration Spatial Planning Law Regional Science among other fields and offer an inter disciplinary vision of these issues The chapters are written by members of the International Geographical Union IGU Commission on Geography of Governance

Politics and the Environment James Connelly, Graham Smith, 2003 This textbook is at the forefront of its field and is an invaluable resource for undergraduates studying politics and environment studies The most comprehensive book on the subject this new edition has been expanded and revised

Reclaiming Local Democracy Ines Newman, 2014-05-07 Austerity has left local government struggling to meet the demands for local services In this context this book asks what are the fundamental principles that should guide decision making by local councillors and officers It seeks to move the agenda from what works to what should local government do and how will its policies impact on social justice and local democracy Reclaiming local democracy examines the politics of human need and argues that local government should provide a voice for those that lack power It avoids the dry familiar debate about what structures and powers local government should have instead seeking to energise all concerned to re engage with a political and ethical approach Written in a persuasive and accessible way the book examines how local government can develop active citizens and make a difference to the well being of those in disadvantaged areas truly reclaiming local democracy Combining theory and international practice it will be relevant for councillors policy officers and activists in the third sector as well as academics and students in politics and social policy

Institutional Change for Sustainable Development Robin Connor, Stephen Dovers, 2004-01-01 this book makes an interesting and worthwhile contribution to the ever expanding body of literature on sustainable development and therefore is to be recommended Karen Scott Journal of Environmental Law this is an essential text for the study of sustainability and institutional change an invaluable professional development text for the practitioner and a text to ponder slowly in all its complexities for an academic study of sustainability Kate Crowley Australian Journal of Environmental Management Does the road to sustainable development run through institutional reform or better yet institutional learning In this well argued book Robin Connor and Stephen Dovers draw on a range of case studies to demonstrate the critical role that institutions play in determining the course of human environment relations Oran R Young University of California Santa Barbara US Connor and Dovers correctly argue that achieving sustainability is a long term process In this context they analyze broad institutional innovations toward sustainability to date from Europe to New Zealand from sustainability councils to property rights to suggest how the historical process might be improved and accelerated This

is among the most constructive efforts I have read Richard B Norgaard University of California Berkeley US It is clear that the transition to ecologically sustainable patterns of development requires significant institutional change yet we face a paradox Although institutions are the primary means of driving reform they are themselves a root cause of unsustainable development and a barrier to positive change This volume moves beyond the current debate by advancing our understanding of the nature of institutional change the features of more appropriate institutional settings and the manner in which change can be enabled Institutional Change for Sustainable Development presents a flexible accessible yet robust conceptual framework for comprehending institutional dimensions of sustainability emphasising the complexity of institutional systems and highlighting the interdependence between policy learning and institutional change This framework is applied and developed through the analysis of five significant arenas of institutional and policy change environmental policy in the EU New Zealand s landmark Resource Management Act strategic environmental assessment emerging National Councils for Sustainable Development and transformative property rights instruments From these explorations key principles for institutional change are identified including the institutional accommodation of a sustainability discourse the interdependence of normative and institutional change reiteration and learning integration in policy and practice subsidiarity and legal change Institutional Change for Sustainable Development will be of interest to researchers policymakers and practitioners concerned with sustainability resource management and environmental policy

Regulation, Enforcement and Governance in Environmental Law Richard Macrory Hon KC, 2014-10-09 Regulation Enforcement and Governance in Environmental Law is an updated edition of Richard Macrory s most influential writings Spanning his entire career these are all works which have helped shape contemporary environmental law and policy The book includes the full text of his 2006 Cabinet Office Review on Regulatory Sanctions new chapters on the Climate Change Act 2008 the Environment Tribunal and analysis of recent leading cases The book is divided into five thematic sections Regulatory reform Institutional Reform and Change the Dynamics of Environmental Law the Courts and the Environment and Europe and the Environment Reviews of the first edition This book is surely destined to become a must read for anyone academic practitioner or student interested in the development of regulation enforcement and environmental governance P Bishop IUCN Academy of Environmental Law Journal An excellent reference work on environmental law an extremely important and valuable edition to the environmental lawyer s bookshelf C Abbot Journal of Environmental Law It is a rare to find a volume which consumes one s attention for 765 pages and rarer still that such a blockbuster be a law book This book is not solely for environmental enthusiasts it should be essential reading for anyone concerned with the institutional reform transparency and accountability in the UK and EU C MacKenzie Cambridge Law Journal

The Nordic Model of Social Democracy N. Brandal, Ø. Bratberg, D. Thorsen, 2013-02-21 Social Democracy has long been prominent in Nordic politics through the dominant parties and ideological hegemony of the centre left This book explores the growth of social democracy and the policy dilemmas that

social democrats face today It breaks new ground by relating recent literature on social democracy in Europe to Scandinavia

Dilemmas of Transition Susan Baker,Petr Jehlicka,2015-02-12 This volume explores the impact of democratization and marketization on the environment in East Central Europe The essays investigate how the twin processes of change affect the physical environment the expression of environmental interest and environmental management policies

Environmental Movements Christopher Rootes,2014-06-23 Despite growing evidence of the universality of environmental problems and of economic and cultural globalization the development of a truly global environmental movement is at best tentative The dilemmas which confront environmental organizations are no less apparent at the global than at national levels This volume is a collection of 1990s research on environmental movements in western and southern Europe the US and the global arena

Ecological Modernisation Around the World Arthur P.J. Mol,David A. Sonnenfeld,2014-04-08 The idea of ecological modernisation originated in Western Europe in the 1980s gaining attention around the world by the late 1990s At the core of this social scientific and policy oriented approach is the view that contemporary societies have the capability of dealing with their environmental crises Experiences in some countries demonstrate that modern institutions can incorporate environmental interests into their daily routines Elsewhere economic and political interests dominate development trajectories and environmental deterioration continues challenging the premises of ecological modernisation This volume brings together research on ecological modernisation practices around the world Studies on Western Central and Eastern Europe the USA and Southeast Asia examine the applicability of this approach to advanced industrial countries transitional economies and developing countries respectively Authors critically examine the premises of ecological modernisation theory assess its value for understanding past and present environmental transformations and outline paths for designing future sustainable development Taken together the studies in collected this volume offer significant refinements extensions and critiques of ecological modernisation theory and suggest important directions for future research on social and policy dimensions of environmental change

Implementing Sustainable Development William M. Lafferty,James Meadowcroft,2000-11-30 At the Rio Earth Summit in 1992 political leaders from more than a hundred countries made a formal commitment to intensify efforts to resolve global environment and development problems and to strive for sustainable development This volume examines how governments in the developed industrial world have responded to the challenge of sustainable development since it was catapulted into the international stage It focuses on the central government engagement with sustainable development in Australia Canada Japan Norway the Netherlands Sweden the United Kingdom the United States and the European Union The study shows that sustainable development has been integrated into governmental idiom in most jurisdictions and has come to be associated with a series of changes to the structures and approached deployed to manage environmental problems Yet it also reveals significant differences of interpretation and priority and in enthusiasm with which sustainable development has been received
