Christopher de Sousa, 2008-03-03 Examines the role that brownfields redevelopment is playing and can play in our quest for sustainability focusing on efforts in the US and Canada This book looks at how brownfields are used as spaces for developing an array of residential recreational and employment oriented projects that have breathed new life into the urban environment

Advances in the Leading Paradigms of Urbanism and their Amalgamation Simon Elias Bibri, 2020-06-20 This book explores the recent advances in the leading paradigms of urbanism namely compact cities eco cities and data driven smart cities and the evolving approach to their amalgamation under the umbrella term of smart sustainable cities It addresses these advances by investigating how and to what extent the strategies of compact cities and eco cities and their merger have been enhanced and strengthened through new planning and development practices and are being supported and leveraged by the applied solutions pertaining to data driven smart cities The ultimate goal is to advance sustainability and harness its synergistic effects on multiple scales This entails developing and implementing more effective approaches to the balanced integration of the three dimensions of sustainability as well as to producing combined effects of the strategies and solutions of the prevailing approaches to urbanism that are greater than the sum of their separate effects in terms of the tripartite value of sustainability Sustainable urban development is today seen as one of the keys towards unlocking the quest for a sustainable world And the big data revolution is set to erupt in cities throughout the world heralding an era where instrumentation datafication and computation are increasingly pervading the very fabric of cities and the spaces we live in thanks to the IoT Big data and the IoT technologies are seen as powerful forces that have tremendous potential for advancing urban sustainability Indeed they are instigating a massive change in the way sustainable cities can tackle the kind of special conundrums wicked problems and significant challenges they inherently embody as complex systems They offer a multitudinous array of innovative solutions and sophisticated approaches informed by groundbreaking research and data driven science As such they are becoming essential to the functioning of sustainable cities Besides yet knowing to what extent we are making progress towards sustainable cities is problematic adding to the fragmented conflicting picture that arises of change on the ground in the face of the escalating rate and scale of urbanization and in the light of emerging ICT and its novel applications In a nutshell new circumstances require new responses This timely and multifaceted book is intended for a wide readership As such it will appeal to researchers academics urban scientists urbanists planners designers policy makers and futurists as well as all readers interested in sustainable cities and their ongoing and future data driven transformation

DayWater Daniel R. Thevenot, 2008-03-15 The European DayWater project has developed a prototype of an Adaptive Decision Support System ADSS related to urban stormwater pollution source control The DayWater ADSS greatly facilitates decision making for stormwater source control which is currently impeded by the large number of stakeholders involved and by the necessary multidisciplinary knowledge This book presents the results of this project

providing new insights into both technical and management issues The main objectives of its technical chapters are pollution source control modelling risk and impact assessment and evaluation and comparison of best management practices It also covers management aspects such as the analysis of the decision making processes in stormwater source control at a European scale and stormwater management strategies in general The combination of scientific technical and socio managerial knowledge with the strong cooperation of numerous end users reflects the innovative character of this book which includes actual applications of the ADSS prototype in significant case studies DayWater an Adaptive Decision Support System for Urban Stormwater Management contains 26 chapters collectively prepared by DayWater scientific partners and end users associated with this European Research and Development project It includes A general presentation of the DayWater Adaptive Decision Support System ADSS structure and operation modes A detailed description of the major components of this ADSS prototype The assessment of its components in significant case studies in France Germany and Sweden The proceedings of the International Conference on Decision Support Systems for Integrated Urban Water Management held in Paris on 3 4 November 2005 The book presents the ADSS prototype including a combination of freely accessible on line databases guidance documents road maps and modelling or multi criteria analysis tools As demonstrated in several significant case studies the challenge for stormwater managers is to make the benefits of urban stormwater management visible to society resulting in active co operation of a diversity of stakeholders Only then will sustainable management succeed DayWater an Adaptive Decision Support System for Urban Stormwater Management advances this cause of sustainable urban management through Urban stormwater management and makes achievable by means of risk and vulnerability tools which are included the goal of integrated urban water management IUWM

The Environmental Brief
Richard Hyde, Steve Watson, Wendy Cheshire, Mark Thomson, 2007-01-24 The built environment is responsible for an estimated forty five per cent of all greenhouse gas emissions As the greatest opportunities for reducing these emissions occur during the briefing and design processes the pathway to better design lies in preparing environmental briefs and using these to drive building design and produce buildings of high environmental performance This process driven book looks at the theoretical issues involved in an environmental brief and outlines methods by which architects can approach the writing of a brief that considers all aspects of the natural and the built environment and relates these concepts to a number of case studies from around the world
