Labour Law and Sustainable Development Valentina Cagnin,2020-06-05

Labour Law and Sustainable Development is a detailed reconstruction of the regulatory framework and jurisprudential findings of sustainable development at the international European and national level The global crisis of the past decade has underlined the social unsustainability of the ultra liberalistic theories through which the labour law deregulation represents the precondition for social and economic development coherent with the globalization imperatives It is no exaggeration to assert that the existing foundations of labour law have been irreversibly compromised It is essential to find a way out of the crisis at the same time defining the founding values of new sustainable labour law In linking labour law with the sustainability paradigm this provocative book promises to widen the scope and terms of the reconciliation of interests taking into account the multiplicity of the stakeholders interested in economic social and environmental issues and in particular to practise an approach that achieves intergenerational equity What s in this book In an unprecedented comparative study including case law of the network of principles agreements practices and norms concerning sustainable development and its different economic and social implications the author examines such facets as the following sustaining solidarity and equality of opportunity in current and emerging work situations enhancing individual autonomy in the current world of subordinate but independent labour reconciling personal needs flexible organization of companies and reduction of external and internal costs to companies collective action for the regulation of labour relations allowing for the exercise of individual autonomy involving entire populations that have been so far excluded in the world scene developing a sustainable pension system to promote intergenerational solidarity implementing flexicurity policies positively social clauses of international trade treaties undoing the profound contradiction of gender and wage inequalities and promoting corporate social responsibility The objective of this book is to provide the reader with a reasoning basis to assess whether the choice to elect sustainable development as a new paradigm of reference for labour law is feasible and if in particular this choice can be useful in order to define the founding values of a new sustainable labour law How this will help you Using an interdisciplinary approach the author emphasizes the need to consider the various dimensions of sustainability together not only the original environmental but also the economic and social dimensions This book offers a real strategic leap for both legislators and social actors in particular leading the way to avoiding a fracture of the generational pact that has held together modern societies Although the book presents a profound academic contribution to the analysis of labour law realities and trends it will also be welcomed by corporate lawyers judges human rights experts trade unionists business managers entrepreneurs and consultants interested in the issues of labour sustainable development and social rights American Book Publishing Record ,2001

The Contingent Valuation of Environmental Resources David J. Bjornstad,James R. Kahn,1996 Economic valuation obtained through the survey measurement of consumer preferences is central to their discussion **Contingent Valuation** R. Carson,2012-01-01 This major reference work the first of its kind provides a comprehensive and authoritative introduction to the large and growing literature on contingent valuation It includes entries on over 7 500 contingent valuation papers and

studies from over 130 countries covering both the published and grey literatures This book provides an interpretive historical account of the development of contingent valuation the most commonly used approach to placing a value on goods not normally sold in the marketplace The major fields catalogued here include culture the environment and health application This bibliography is an ideal starting point for researchers wanting to find other studies that have valued goods or used techniques similar to those they are interested in For those wanting to conduct meta analyses the book will serve as an invaluable guide to source material For those wanting to conduct meta analyses the book will serve as an invaluable guide to source material In addition to the print edition we offer access for purchasers of the book to a website providing the contents of as a searchable Word document and in a variety of standard bibliographic database forms Contingent Valuation is an indispensable reference source for researchers scholars and policymakers concerned with survey approaches to the problem of environmental valuation

Encyclopedia of Global Change Andrew S. Goudie,2002 Mapping the relationship between human society and the Earth the Encyclopedia of Global Change is the first general reference guide to the impact of politics population economics and technology on the planet Containing over 300 original signed articles by distinguished scholars it is the comprehensive work for this multi discipline high profile field The Encyclopedia synthesizes current knowledge on natural and human made changes in the Earth s physical chemical and biological systems and the effects of these changes on society Areas such as altered ecosystems climate change food supply water production and consumption population and the political impact of global change are covered in detail And the clearly written articles also include responses to global modification agreements and associations institutions policies biographies and case studies Enhanced by 1 500 illustrations extensive cross references bibliographies and an index the Encyclopedia of Global Change links essential knowledge across many fields geography geology geophysics atmospheric science political science economics technology and others in a resource that is both accessible and authoritative The jargon free language makes it an excellent work for the professional scholar as well as the interested general reader

Sustainable Development in a Dynamic World Zmarak Shalizi,2003 TheWorld Development Report 2003addresses how to lift from poverty the three billion people now living in severe deprivation It also explores how to improve the quality of life for everybody today and for the two billion more who will join mankind in the next thirty years Substantial increases in growth and productivity will be necessary to achieve this goal The current scale of economic activity and speed of change is such that ecosystem and social structures cannot keep up TheReportputs forth two main messages the first point is that enhancing prosperity and reducing poverty requires better care of the planet s ecosystem and social fabric And secondly that stronger collective action at all levels from local to global is essential for generating and scaling up the institutions that can transform growth

Science & Technology in China: A Roadmap to 2050 ,2009-09-30 China s modernization is viewed as a transformative revolution in the human history of modernization As such the Chinese Academy of Sciences CAS decided to give higher priority to the research on the science

and technology S T roadmap for priority areas in China s modernization process What is the purpose And why is it Is it a must I think those are substantial and significant questions to start things forward Significance of the Research on China s S T Roadmap to 2050 We are aware that the National Mid and Long term S T Plan to 2020 has already been formed after two years hard work by a panel of over 2000 experts and scholars brought together from all over China chaired by Premier Wen Jiabao This clearly shows that China has already had its S T blueprint to 2020 Then why did CAS conduct this research on China s S T roadmap to 2050 In the summer of 2007 when CAS was working out its future strategic priorities for S T development it realized that some issues such as energy must be addressed with a long term view As a matter of fact some strategic researches have been conducted over the last 15 years on energy but mainly on how to best use of coal how to best exploit both domestic and international oil and gas resources and how to develop nuclear energy in a discreet way Renewable energy was of course included but only as a supplementary energy
