Huber,2013-06-29 Since the publication in 1950 of Vol I Spectra of Diatomic Molecules of Molecular Spectra and Molecular Structure much progress has

been made in the field While there have been some important refinements in the theory of diatomic molecular spectra most of the advances have been in the further exploration of individual spectra Not only has the number of molecules about which some spectroscopic data are available been increased by a factor of 2 to 3 but also the spectroscopic information about the molecules known in 1950 has been vastly extended This is due to the observation of new electronic states about three times as many as known before the enormous improvements in the accuracy of the constants of the states known in 1950 and the determination of higher order constants In view of the increasing use of spectroscopic information on diatomic molecules in other fields of physics in chemistry and in astrophysics it appeared desirable to prepare an up to date version of the table of molecular constants in the appendix of Vol I This updating proved to be far more time consuming than originally anticipated and it is only now 10 years that we are able to present such a table which instead after its initiation of the original 80 pages plus 30 pages of bibliography now fills a volume of 700 pages In the interest of economy and unlike the original version the new table has been produced by photo offset from the final manuscript Proceedings of the Eighteenth General Assembly

Richard M. West, 2012-12-06 The XVIIIth General Assembly of the International Astronomical Union was held in Patras Greece from 17–26 August 1982 It was marked by the tragic death of the President of the IAU Professor M K V Bappu on August 19 1982 This sad event without precedent in the history of the Union posed serious problems to the organization of the General Assembly which could only be overcome by the full collaboration of all members the organizers and the Executive Committee A tribute to the memory of Prof Bappu was paid during a plenary meeting on 23 August 1982 The full texts of the speeches are published in Chapter I of this volume The excellent scientific programme in Patras was organized by the Presidents of the 40 IAU Commissions and coordinated by the IAU General Secretary 1979–1982 Professor P A Wayman The local arrangements were taken care of by Professor C Goudas and his collaborators from the Patras University Due to the unexpected withdrawal in 1979 of another invitation to host the 1982 IAU General Assembly the organizers in Greece had less than two years available for the extensive preparations and our hearty thanks are due to them for their persistent efforts which made this General Assembly an outstanding success International Compendium of Numerical Data Projects
