Beyond Sweatshops Theodore H. Moran, 2004-05-13 Images of sweatshop labor in developing countries have rallied opponents of globalization against foreign direct investment FDI The controversy is most acute over the treatment of low skilled workers producing garments footwear toys and sports equipment in foreign owned plants or the plants of subcontractors Activists cite low wages poor working conditions and a variety of economic physical and sexual abuses among the negative consequences of the globalization of industry In *Beyond Sweatshops* Theodore Moran examines the impact of FDI in manufacturing on growth and welfare in developing countries and explores how host governments can take advantage of the contributions of foreign investment while avoiding the hazards to lower skilled workers He traces case studies of countries that have managed to produce steady improvement in worker treatment at plants exporting garments footwear and other labor intensive products The first part of the book examines multilateral proposals designed to place a floor under the treatment of workers around the world contrasting a WTO based system to enforce labor standards with voluntary arrangements including corporate codes of conduct certification organizations and sweatshop free labeling It explores the pros and cons of adding a living wage requirement to the ILO's core labor standards The second part of the book presents data that significantly broadens our understanding of FDI By analyzing the evidence from a variety of developing countries in Asia Latin America and Africa Moran demonstrates that most FDI goes to industrial sectors that employ trained workers who are not easily exploited The flow of FDI to plants that produce electronics auto parts industrial equipment chemicals pharmaceuticals and medical equipment paying production workers two to five times more than what is found in lower skilled operations is twenty five times the flow to garment textile and footwear
