Syntax Of Subordination Linguistische Arbeiten S:

The Syntax of Subordination Dagmar Haumann, 2011-04-20 This study is concerned with the categorial status of subordinating conjunctions and the internal and external structure of subordinate clauses Starting out from the categorizations of subordinating conjunctions that prevail in recent generative linguistic theory namely complementizers and prepositions and from the division of syntactic categories into lexical and functional ones the author investigates the lexical and grammatical properties of subordinating conjunctions which are held to account for both the distribution and the architecture of subordinate clauses Central to this study is the relation between the category subordinating conjunction the licensing of its projection and the licensing of its complement and specifier position Part I is concerned with subordination in early Generative Grammar the rise of the category C and the categorization of subordinating conjunctions Part II focuses on recent conceptions of phrase structure the inventory of syntactic categories the lexical functional dichotomy and syntactic movement Part III is concerned with the lexical properties of complementizers C prepositions P and a third category of subordinating conjunctions Subcon which conflates properties of Cs and Ps This categorization of subordinating conjunctions is arrived at on the basis of the distribution of the phrases they head and the mechanisms by which these elements license their complement and specifier Cs as typical functional heads license both their complement and their specifier on the basis of feature checking mechanisms Ps as typical lexical heads license these positions by theta marking them Within SubconP the complement is licensed by feature checking as within CP and the specifier is licensed by theta marking as within PP

'Subordination' Versus 'coordination' in Sentence and Text Cathrine Fabricius-Hansen, Wiebke Ramm, 2008 The papers collected in this volume including a comprehensive introduction investigate semantic and discourse related aspects of subordination and coordination in particular the relationship between subordination coordination at the sentence level and subordination coordination or hierarchical non hierarchical organization at the discourse level The contributions in part I are concerned with central theoretical questions part II consists of corpus based cross linguistic studies of clause combining and discourse structure involving at least two of the languages English German Dutch French and Norwegian part III contains papers addressing specific predominantly semantic topics relating to German English or French and the papers in part IV approach the topic of subordination coordination and rhetorical relations from a diachronic Old Indic and Early Germanic perspective The book aims to contribute to a better understanding of information packaging on the sentence and text level related within a particular language as well as cross linguistically **Perspectives on Prepositions** Hubert

Cuyckens, Günter Radden, 2013-07-31 In the past two decades the study of prepositions has grown steadily The papers collected in this volume bring together the multifaceted perspectives on prepositions that have been developed in contemporary linguistics Some papers mainly discuss syntactic and morphological aspects of prepositions other papers predominantly focus on cognitive aspects All the papers are however concerned with the semantics of prepositions This

volume evolved from a workshop on prepositions held at Hamburg University on June 26 and 27 1998 Modality in Syntax, Semantics and Pragmatics Werner Abraham, 2020-09-17 An innovative survey that covers the linguistic questions of modality and mood offering a new model for the phenomenon Handbuch der deutschen Konnektoren Renate Pasch, 2003 Geboten wird eine syntaktische Klassifikation der ca 300 Konnektoren des Deutschen Ausdrücke wie und aber weil sodass auch deshalb hingegen die fundiert wird durch eine detaillierte Beschreibung der systematischen Züge in den formalen Gebrauchsbedingungen solcher Satzverknüpfungen Stellung Intonation Format der verknüpfungen Sätze **Verbal Projections** Hero Janßen, 2011-04-20 This collection of articles examines lexical and grammatical aspects of verbal elements and phrases in the context of recent generative research General questions concern definitions of grammatical categories classifications of auxiliaries and particles as functional categories and problems of economy Lexical matters range from affixation and category change participles gerunds to semantic representations of specific verb classes possessive phrasal and intransitive verbs The syntactic analyses focus on positional arrangements of aspectual and verbal units V2 Verb Raising The data are mainly drawn from English perspectives on other Germanic languages are included *Handbuch der deutschen Konnektoren 1* Renate Pasch, Ursula Brauße, Eva Breindl, Ulrich Hermann Waßner, 2009-02-26 Geboten wird eine syntaktische Klassifikation der ca 300 Konnektoren des Deutschen Ausdrücke wie und aber weil sodass auch deshalb hingegen die fundiert wird durch eine detaillierte Beschreibung der systematischen Züge in den formalen Gebrauchsbedingungen solcher Satzverknüpfungen Stellung Intonation Format der verknüpfungen Sätze *Studies in German Grammar* Jindrich Toman, 2017-03-06 No detailed description available for Studies in German Grammar *Co- and subordination in German and other languages* Augustin Speyer, 2018-09-17 Fragen der Koordination und der Subordination stehen seit langer Zeit im Fokus sprachwissenschaftlicher Forschung Während in den 70er und auch noch in den 80er Jahren die Analyse der als kanonisch zu bezeichnenden Fälle im Vordergrund stand drängten sich in den letzten 30 Jahren vor allem Grenzfälle wie weil V2 Sätze abhängige V2 Sätze selbständige und weiterführende VL Sätze etc in das Zentrum des Interesses Die Beiträge zum vorliegenden Band bauen auf den Erkenntnissen dieser Arbeiten auf ergänzen sie aber systematisch um eine breit angelegte Diskussion typologischer diachroner und erwerbstheoretischer Aspekte Ein weiteres zentrales Anliegen der Arbeiten besteht darin die theoretischen Konzepte zur Modellierung relevanter Strukturbedeutungen z B V2 zu präzisieren Linguistic research has focussed on issues related to coordination and subordination for a long time Whereas in the 1970s and 1980s the main concern was the analysis of canonical clause structure the interest shifted towards non canonical phenomena such as weil verb second clauses dependent verb second clauses independent and continuative verb final clauses etc The contributions to this issue build on findings of these studies at the same time systematically adding a broad discussion of typological diachronic and acquisition related aspects A further central concern of the studies is to make precise theoretical concepts of modelling the semantics of relevant structural configurations such as verb second *Functional Categories in Language*

Acquisition Annette Hohenberger, 2011-04-20 This study investigates the acquisition of Functional Categories e.g. INFL AGR TNS DET COMP from the perspective of self organization in generative grammar Language is conceived of as a dynamical system which evolves in time and bifurcates when critical thresholds are reached The emergence of syntax as evidenced by the acquisition of Functional Categories is the major bifurcation in child language acquisition Target values of syntactic parameters are attractors which children approach on individual trajectories A proposed tripartite scenario of change from a simple stable state A via symmetry breaking in a liminal phase B characterized by variation to a new complex stable state C accounts for the dynamics in early grammatical development Traditional generative issues such as the acquisition of case marking finiteness V2 and wh questions are discussed as well as new issues such as functional neologisms and sentential blends Dynamical notions like precursor oscillation symmetry breaking and trigger are important explanatory tools The growing child phrase marker is a fractal mental object which represents syntactic information by way of self similar extended projections The book addresses researchers in language acquisition from various theoretical camps generative functional connectionist by giving new answers to old questions in the light of a novel challenging theory self organization

Computational Issues in Fluid Construction Grammar Luc STEELS, 2012-10-30 This state of the art survey documents the Fluid Construction Grammar FCG a new formalism for the representation of lexicons and grammars which has been used in a wide range of case studies for different languages both for studying specific grammatical phenomena and design patterns as for investigating language learning and language evolution The book focuses on the many complex computational issues that arise when writing challenging real world grammars and hence emphasises depth of analysis rather than broad scope The volume contains 13 contributions organized in 5 parts from Basic and Implementation over Case Studies and Formal Analysis up to 3 papers presenting a Conclusion

To be or not to be? The Verbum Substantivum from Synchronic, Diachronic and Typological Perspectives Michail L. Kotin, Richard Whitt, 2015-10-13 The verbs of the to be group also called verba substantiva belong to the most enigmatic phenomena of the human language Combining a distinct suppletivity of their conjugational forms in most languages with a striking semantic and functional ambiguity as well as unique syntactic capabilities they form a very specific class of linguistic entities They can be referred to without exaggeration as one of the conceptually gravest and most symptomatic language formations Typologically the be verbs demonstrate on the one hand a set of similar features in almost

every language which is excellent evidence of their universal validity On the other hand the differences between these verbs in various language groups and even in particular languages are remarkable proof of language relativism Historically the be verbs show a sequence of relevant stages in their formal semantic and syntactic developments which in many aspects coincide with their typological and individual idioethnic features and properties One can trace among other things paths and mechanisms of their development and salient changes of their functions in language systems of different types Especially important are also changes in the form and function of the be verbs arising from language contact for they indicate essential tendencies in the evolution of these entities accelerated by the influence of language interaction triggers The contribution of to be verbs to the morphology semantics and syntax of the majority of the languages of the world is substantial from a number of perspectives and these verbs belong to the most complex and simultaneously central entities of human language For this reason their analysis must continually be synchronized with the newest results of general linguistic research This volume hence describes and interprets the to be verbs and constructions in the broad context of contemporary linguistic research including synchrony diachrony diatopy language contrast and typology

Clause Linkage in Cross-Linguistic Perspective Volker Gast, Holger Diessel, 2012-10-01 The volume is a collection of thirteen papers given at the Third Syntax of the World s Languages conference complemented with four additional papers as well as an introduction by the editors All contributions deal with clause combining focusing on one or both of the following two dimensions of analysis properties of the clauses involved types of dependency The studies are data driven and have a cross linguistic or typological orientation In addition to survey papers the volume contains in depth studies of particular languages mostly based on original data collected in recent field work

Reported Discourse Tom Gldemann, Manfred von Roncador, 2002-09-24 The present volume unites 15 papers on reported discourse from a wide genetic and geographical variety of languages Besides the treatment of traditional problems of reported discourse like the classification of its intermediate categories the book reflects in particular how its grammatical semantic and pragmatic properties have

repercussions in other linguistic domains like tense aspect modality evidentiality reference tracking and pronominal categories and the grammaticalization history of quotative constructions Almost all papers present a major shift away from analyzing reported discourse with the help of abstract transformational principles toward embedding it in functional and pragmatic aspects of language Another central methodological approach pervading this collection consists in the discourse oriented examination of reported discourse based on large corpora of spoken or written texts which is increasingly replacing analyses of constructed de contextualized utterances prevalent in many earlier treatments The book closes with a comprehensive bibliography on reported discourse of about 1 000 entries

Studies on Old High German Syntax Katrin Axel, 2007 Printbegr nsninger Der kan printes 10 sider ad gangen og max 40 sider pr session Language Change at the Interfaces Nicholas Catasso, Marco Coniglio, Chiara De Bastiani, 2022-04-15 This volume offers an up to date survey of linguistic phenomena at the interfaces between syntax and prosody information structure and discourse with a special focus on Germanic and Romance and their role in language change The contributions set within the generative framework discuss original data and provide new insights into the diachronic development of long burning issues such as negation word order quantifiers null subjects aspectuality the structure of the left periphery and extraposition The first part of the volume explores interface phenomena at the intrasentential level in which only clause internal factors seem to play a significant role in determining diachronic change The second part examines developments at the intersentential level involving a rearrangement of categories between at least two clausal domains The book will be of interest for scholars and students interested in generative accounts of language change phenomena at the interfaces as well as for theoretical linguists in general

Restructuring and Functional Heads Guglielmo Cinque, 2006-02-02 This volume collects the recent published articles of Guglielmo Cinque of the University of Venice one of the world s top linguists The book is divided into two sections the first on restructuring a central topic in Romance syntax and with connections to other language groups as well The second part focuses on the consequences of treating clausal functional heads as members of a universal hierarchy in the domain of morphsyntax offering a new perspective on many intricate problems arising in a variety of natural languages
