Trade Policy, Inequality and Performance in Indian Manufacturing Kunal Sen, 2009 The relationship between trade policy and economic performance is one of the oldest controversies in economic development In recent years there has been a revival of interest in the debate on the implications of trade reforms for productivity growth and domestic pricing behaviour due in part to the current phase of wide spread trade liberalisation in developing countries and in part to developments in economic theory notably endogenous growth theories and theories of imperfect competition Also there has been considerable interest in whether trade reforms can lead to higher wage inequality and regional inequality in developing countries Both in academic and policy arenas the interest in international trade as a powerful positive force for reducing poverty in low income countries has increased In this book the author examines the implications of trade reforms with specific reference to the Indian manufacturing sector In particular it explores the evolution of regional and wage inequality employment productivity and prices from the import substitution phase of the 1970s to the period of radical reforms of the 1990s The strength of the book is the careful and systematic examination of the various aspects of the trade development nexus using rigorous empirical methods and a detailed data set of Indian industries from 1975 to 2000 Economists in general and South Asian scholars in particular will find this thorough study interesting and useful

Regional Patterns of Industrial Growth in India Dinesh Narain Awasthi, 1991

Textile Chemistry Thomas Bechtold, Tung Pham, 2023-04-03 Textile and fibre chemistry form the theoretical basis to understand production and properties of textile based products In this 2nd edition fundamentals of textile chemistry and theoretical and applicatory aspects of colour chemistry are interconnected to draw detailed picture of chemical reactions occurring during production

and modification of textile products An overview about chemical modification finishing operations is given to explain how to impart special functionalities into functional products Examples for technical scale processes and representative machinery used therein give insight into the technical reality of a dyehouse A new chapter about circularity of textiles highlights the interlinkage between product design including dyes and finishes and the requirements to develop future fibre to fibre recycling The work covers all relevant aspects of a textile product from fibre production coloration finishing consumer use and fibre to fibre recycling The content of the book allows a first entry into this multi disciplinary field Through its comprehensive character the authors explain the interdependence between textile and fibre processing and aspects of recycling which makes the work a valuable source of information to design future textiles for circularity
