*A System of Ethics* Friedrich Paulsen, 2015-06-15 Excerpt from *A System of Ethics* Of all the treatise on either that have appeared in recent years none is in my opinion so admirably fitted for introducing the beginner to this study as the remarkable work of Professor Paulsen which I here present to the English speaking public in their native tongue As the author expressly declares the book was not written for philosophical experts but for all those who are interested in the problems of practical philosophy and who are in need of some one to guide them in solving the same It discusses the fundamental questions of ethics in a manner that cannot fail to attract the student and encourage him to reflect upon moral matters which is after all the greatest service that any book can hope to render him Many of our ethical treatises have a tendency to repel the average intelligent reader and to deaden instead of quickening his thought they make him feel that the subjects under discussion have absolutely no connection with life at least not with his life they often speak to him of things about which he knows nothing and cares less in language which he cannot understand This is a misfortune for if any science has a message to deliver to the people of our country and age it is certainly the science of conduct Professor Paulsen divides his work into four books The
