Users & Machine Learning-based Curation Systems Hendrik Heuer, 2020-09-03 Users are increasingly interacting with machine learning ML based curation systems YouTube and Facebook two of the most visited websites worldwide utilize such systems to curate content for billions of users Contemporary challenges such as fake news filter bubbles and biased predictions make the understanding of ML based curation systems an important and timely concern Despite their political social and cultural importance practitioners framing of machine learning and users understanding of ML based curation systems have not been investigated systematically This is problematic since machine learning as a novel programming paradigm in which a mapping between input and output is inferred from data poses a variety of open research questions regarding users understanding The first part of this thesis provides the first in depth investigation of ML based curation systems as socio technical systems The second part of the thesis contributes recommendations on how ML based curation systems can and should be explained and audited The first part analyses practitioners framing of ML by examining how the term machine learning ML applications and ML algorithms are framed in tutorials The thesis also investigates the beliefs that users have about YouTube and introduces a user belief framework of ML based curation systems Furthermore it demonstrates how limited users capabilities for providing input data for ML based curation systems are The second part evaluates different explanations of ML based systems This evaluation uncovered an explanatory gap between what is available to explain ML based curation systems and what users need to

understand such systems Informed by this explanatory gap the second part of this thesis demonstrates that audits of ML systems can be an important alternative to explanations This demonstration of audits also uncovers a popularity bias enacted by YouTube s ML based curation system Based on these findings the thesis recommends performing audits to ensure that ML based systems act in the public s interest Keywords Algorithmic Bias Algorithmic Experience Algorithmic Transparency Algorithms Fake News Human Centered Machine Learning Human Computer Interaction Machine Learning Artificial Intelligence Recommender Systems Social Media Trust User Beliefs User Experience Video Recommendations YouTube

ICT Systems and Sustainability Milan Tuba,Shyam Akashe,Amit Joshi,2025-04-14 This book proposes new technologies and discusses future solutions for ICT design infrastructures as reflected in high quality papers presented at the 8th International Conference on ICT for Sustainable Development ICT4SD 2024 held in Goa India on 8 9 August 2024 The book covers the topics such as big data and data mining data fusion IoT programming toolkits and frameworks green communication systems and network use of ICT in smart cities sensor networks and embedded system network and information security wireless and optical networks security trust and privacy routing and control protocols cognitive radio and networks and natural language processing Bringing together experts from different countries the book explores a range of central issues from an international perspective Novel Metathesis Chemistry: Well-Defined Initiator Systems for Specialty Chemical Synthesis, Tailored Polymers and Advanced Material Applications Y. Imamoglu,L. Bencze,2012-12-06 A comprehensive discussion of the theory practice and application of catalytically active transition metal species and their application in the production of specialist polymeric materials The material is presented in a progressive manner suitable for non experts and those seeking an introduction to the field The bibliographies supplied are complete and up to date making the book an indispensable guide to the primary literature for the more theoretical background to the topics discussed After a comprehensive discussion of initiating systems for speciality chemical synthesis the book goes on to deal with a wide range of topics in materials science including alkenamers polyacetylenes industrial applications and liquid rocket engine fuels

**Intelligent Industrial Alarm Systems** Jiandong Wang,Wenkai Hu,Tongwen Chen,2024-11-04 This book fills a gap in existing literature by providing a comprehensive academic perspective on industrial alarm systems offering systematic methodologies practical techniques and visual analytic tools for engineers to improve system performance and design Modern industrial plants rely on computerized monitoring systems to track hundreds of process variables in real time enabling operators to maintain safe and efficient conditions Automatic industrial alarm systems play a crucial role in alerting operators to abnormalities such as high vessel levels that could lead to unsafe conditions if left unaddressed While contemporary alarm systems can be plagued with issues like nuisance alarms recent academic research has introduced advanced methodologies like Markov chain theory and Bayesian estimation to optimize alarm parameters and enhance system performance By integrating these theoretical advancements into practical applications the goal is to develop

intelligent industrial alarm systems that leverage historical data and process knowledge to predict and prevent alarm floods ultimately ensuring safer and more efficient plant operations
