

A GUIDE TO STARTING A LABORATORY FOR CHEMICAL ANALYSIS

GENTECH SCIENTIFIC

WRITING A BUSINESS PLAN

The first and perhaps the most vital step in starting a laboratory for chemical analysis is writing a thorough and detailed business plan. A comprehensive guide isn't only essential for securing funding for a new lab; it will act as an accurate road map throughout the start-up process.

LAB START-UP CONSIDERATIONS

State Incubator Facilities: A new lab should consider applying for a state incubator facility. A state business incubator is a government organization that helps new businesses with start-up costs by providing affordable, sometimes free, workspaces, mentorships, and potentially even funding.

Hire Multi-Faceted Personnel: One way to increase a lab's efficiency and productivity is to hire talented personnel with various duties and responsibilities. Employees who can complete multiple functions make a leaner, more efficient staff.

Purchase Refurbished Equipment: One of the larger aspects of a start-up lab's initial budget will be the equipment. Acquiring all the necessary equipment is costly, but a lab can't sacrifice the quality of its resources to save a few bucks.
