Systematic Thinking for Social Action Alice M. Rivlin, 2015-03-24 In January 1970 Alice M Rivlin spoke to an audience at the University of California Berkeley The topic was developing a more rational approach to decisionmaking in government If digital video YouTube and TED Talks had been inventions of the 1960s Rivlin s talk would have been a viral hit As it was the resulting book Systematic Thinking for Social Action spent years on the Brookings Press bestseller list Is is a very personal and conversational volume about the dawn of new ways of thinking about government As deputy assistant secretary for program coordination and later as assistant secretary for planning and evaluation at the Department of Health Education and Welfare from 1966 to 1969 Rivlin was an early advocate of systems analysis which had been introduced by Robert McNamara at the Department of Defense as PPBS planning programming budgeting system While Rivlin brushes aside the jargon she digs into the substance of systematic analysis and a quiet revolution in government In an evaluation of the evaluators she issues mixed grades pointing out where analysts had been helpful in finding solutions and where because of inadequate data or methods they had been no help at all Systematic Thinking for Social Action offers important insights for anyone interested in working to find the smartest ways to allocate scarce funds to promote the maximum well being of all citizens

Fararo, 2001-09-30 Fararo studies general theoretical sociology as a time extended tradition with three phases classical postclassical and recent Employing a process philosophical approach the author seeks to examine these three phases in an effort to provide a synthesis of the theories that seek to lay the foundations of theoretical sociology The author especially focuses on the work of Talcott Parsons and George Homans two contemporary theorists whose common aspiration was to

forge a theoretical foundation for sociology that would serve to unify and integrate all theories growing out of sociological research in much the same way that the theory of evolution guides and integrates all other biological theories To begin the author provides a history and overview of the key classical theoretical frameworks from the perspective of process philosophy which he applies to all three phases of the study Fararo then carefully analyzes two major postclassical bodies of general theory namely the evolving and intertwined frameworks of Parsons and Homans from their early theories of social systems to their later divergent perspectives on foundation and synthesis in sociological theory Finally the discussion turns to the recent phase of general theoretical sociology where more recent foundation strategies rational choice theory and generative structuralism are analyzed in relation to the postclassical phase of the tradition This important and sophisticated new work is essential for all those interested in sociological theory in particular and sociology in general *Systematic*
