In the realm of ichthyological literature it would be hard to find more fascinating creatures than the football fishes pugnose dreamers mischievous dreamers and snaggletooth seadevils not to mention triplewart needlebeard and whipnose seadevils but they re all here in Oceanic Anglerfishes In this comprehensive study you will learn that most of the species are smaller than your hand most have a bioluminescent lure that may be employed to attract prey into gobbling range and that the relatively tiny males affix themselves to the females assuring permanent sexual contact in the blackness of the depths This is a brilliantly illuminated viewing port into the world of deep sea creatures bringing into sharp focus fishes whose weird appearance habits and lifestyles stretch the imagination to the point of near unbelievability Richard Ellis author of The Book of Sharks and Encyclopedia of the Sea Ceratioid anglerfishes are classical deep sea fishes that display a vast array of bizarre and wonderful behaviors and associated morphological adaptations that are almost beyond our ability to imagine Their first dorsal fin spine has been modified into a fishing rod the illicium ending in a fleshy bait the esca and they show extreme sexual dimorphism with tiny males with huge nostrils and modified pincer like jaws to attach themselves to a female sometimes permanently Ted Pietsch describes in great detail the 11 families 35 genera and 160 known species of deep sea anglerfishes in his splendidly illustrated monograph based on research that began with finding the first ceratioid washed ashore in Greenland in 1833 and continues through Pietsch s 40 year career of studying these fascinating fishes Bruce B Collette National Marine Fisheries Service Systematics Laboratory National Museum of Natural History Smithsonian Institution
