Preventing Violence in Schools Joan N. Burstyn, Geoff Bender, Ronnie Casella, Howard W. Gordon, Domingo P. Guerra, 2001-04-01 School violence is a burning issue these days This book provides an in depth analysis of violence prevention programs and an assessment of their effectiveness using data from observations individual interviews and focus groups as well as published data from the schools It is distinguished by its focus on the cultural and structural context of school violence and violence prevention efforts Where most other researchers use quantitative measures such as surveys to assess the effectiveness of violence prevention programs the authors of this book use qualitative research and ethnography to study the environment where such programs take place Thus this work one of only a few ethnographic studies of violence prevention programs in schools links previous quantitative research on the topic and critical ethnography Preventing Violence in Schools A Challenge to American Democracy includes voices of school students accused of practicing violence who have been participants in violence prevention programs analyzes a citywide peer mediation program who benefits and who does not who is mediated and who mediates and what the implications of these findings may be examines the kinds of violence recognized in schools and the ways schools themselves may perpetuate violence and describes a violence prevention program for students at an alternative school Preventing Violence in Schools A Challenge to American Democracy is highly relevant for students in courses on urban education foundations of education education and social policy youth and the law and qualitative research and for teachers administrators and other professionals such as school psychologists and guidance counselors at the middle and high school levels

Screwed-Up School Reform Bruce S. Cooper, Richard G. Shear, 2012-09-11 The unspoken American promise is that each generation will lead a better more successful life than the previous one In earlier times it was an education that provided the next generations a better life For today's children though decades of failed school reform have left a generation

wondering if this promise has been broken Despite policies programs and resources American education does not live up to its expectations In Screwed Up School Reform Richard G Shear and Bruce S Cooper reveal that generations of school reforms have actively worked to cure the symptoms of broken schools but not the overarching fundamental problems that permeate the system Virtually an entire society has failed to understand the main problem with American education children are rejecting its practices and conditions But the screwed up education system is fixable and it can be fixed now If reformers focus instead on changing education s foundation then children will instead succeed at school and in their personal lives

School Violence in Context Rami Benbenishty,Ron Avi Astor,2005-02-10 Drawing on one of the most comprehensive and representative studies of school violence ever conducted Benbenishty and Astor explore and differentiate the many manifestations of victimization in schools providing a new model for understanding school violence in context The authors make striking use of the geopolitical climate of the Middle East to model school violence in terms of its context within as well as outside of the school site This pioneering new work is unique in that it uses empirical data to show which variables and factors are similar across different cultures and which variables appear unique to different cultures This empirical contrast of universal with culturally specific patterns is sorely needed in the school violence literature The authors innovative research maps the contours of verbal social physical and sexual victimization and weapons possession as well as staff initiated violence against students presenting some startling findings along the way When comparing schools in Israel with schools in California the authors demonstrate for the first time that for most violent events the patterns of violent behaviors have the same relationship for different age groups genders and nations Conversely they highlight specific kinds of violence that are strongly influenced by culture They reveal for example how Arab boys encounter much more boy to boy sexual harassment than their Jewish peers and that teacher initiated victimization of students constitutes a significant and often overlooked type of school violence especially among certain cultural groups Crucially the authors expand the paradigm of understanding school violence to encompass the intersection of cultural ethnic neighborhood and family characteristics with intra school

factors such as teacher student dynamics anti violence policies student participation grade level and religious and gender divisions It is only by understanding the multiple contexts of school violence they argue that truly effective prevention programs interventions research agendas and policies can be implemented In an age of heightened concern over school security this study has enormous implications for school violence theory research and policy throughout the world The patterns that emerge from the authors analysis form a blueprint for the research agenda needed to address new and exciting theoretical and practical questions regarding the intersections of context and school victimization The unique perspective on school violence will undoubtedly strike a chord with all readers informing scholars and students across the fields of social work psychology education sociology public health and peace conflict studies Its clearly written and accessible style will appeal to teachers principals policy makers and parents interested in the authors practical discussion of policy and intervention implications making this an invaluable tool for understanding preventing and handling violence in schools throughout the world
