The scope of research in the IMF is defined by the purposes and functions of the institution. In order to foster innovation and ensure quality control the IMF makes much of its research available outside the institution and encourages staff to interact with academia and other research organizations through conferences seminars and occasional joint research projects. The visiting scholar's program has also enhanced the quality of research done in the IMF. This program brings in leading members of the economics profession from around the world to assist in the preparation of papers for the Executive Board and to conduct research on IMF related issues.

Exchange Rate Regimes Atish R. Ghosh, Anne-Marie Gulde, Holger C. Wolf, 2002 An empirical study of exchange rate regimes based on data compiled from 150 member countries of the International Monetary Fund over the past thirty years. Few topics in international economics are as controversial as the choice of an exchange rate regime. Since the breakdown of the Bretton Woods system in the early 1970s countries have adopted a wide variety of regimes ranging from pure floats at one extreme to currency boards and dollarization at the other. While a vast theoretical literature explores the choice and consequences of exchange rate regimes the abundance of possible effects makes it difficult to establish clear relationships between regimes and common macroeconomic policy targets such as inflation and growth. This book takes a systematic look at the evidence on macroeconomic performance under alternative exchange rate regimes drawing on the experience of some 150 member countries of the International Monetary Fund over the past thirty years. Among other questions it asks whether pegging the exchange rate leads to lower inflation whether floating exchange rates are associated with faster output growth and whether pegged regimes are particularly prone to currency and other crises. The book draws on history and theory to delineate the debate and on standard statistical methods to assess the empirical evidence and includes a CD ROM containing the data set used.

Nonperforming Loans in Sub-Saharan Africa Hippolyte Fofack, 2005 This paper investigates the leading causes of nonperforming loans during the economic and banking crises that affected a large number of countries in Sub-Saharan Africa in the 1990s. Empirical analysis shows a dramatic increase in these loans and extremely high credit risk with significant differences between the CFA and non CFA countries and substantially higher financial costs for the latter sub panel of countries. The results also highlight a strong causality between these loans and economic growth real exchange rate appreciation the real interest rate net interest margins and interbank loans consistent with the causality and econometric analysis which reveal the significance of

macroeconomic and microeconomic factors The dramatic increase in these loans is largely driven by macroeconomic volatility and reflects the vulnerability of undiversified African economies which remain heavily exposed to external shocks Simulated results show that macroeconomic stability and economic growth are associated with a declining level of nonperforming loans whereas adverse macroeconomic shocks coupled with higher cost of capital and lower interest margins are associated with a rising scope of nonperforming loans These results are supported by long term estimates of nonperforming loans derived from pseudo panel based prediction models World Bank web site Rules-Based Fiscal Policy in Emerging Markets G. Kopits,2004-09-21 Inspired by the experience of some advanced economies a number of emerging market economies have recently adopted rules limiting the budget deficit expenditure level or indebtedness of the public sector while others consider them for eventual adoption This volume brings together policy analysts to discuss the rationale suitability and usefulness of fiscal policy rules in emerging market economies Grouped under three main parts political economy and macroeconomic setting design issues at the national level design issues at the subnational level the chapters have a practical orientation based on conceptual grounding **Global Financial Crises and Reforms** B. N. Ghosh,2000-12-14 This is an innovative collection of papers written by a panel of highly respected academics and financial experts Whilst providing an insight into the phenomenology of the financial crises of the 1990s in Asia and Latin America the book also explores possibilities for their solution **IMF Survey** International Monetary Fund,2002 Fiscal Adjustment for Stability and Growth Mr.James Daniel,2006-08-17 The pamphlet which updates the 1995 Guidelines for Fiscal Adjustment presents the IMF s approach to fiscal adjustment and focuses on the role that sound government finances play in promoting macroeconomic stability and growth Structured around five practical questions when to adjust how to assess the fiscal position what makes for successful adjustment how to carry out adjustment and which institutions can help it covers topics such as tax policies debt sustainability fiscal responsibility laws and transparency
