This book is a comprehensive introduction to text forming resources in English along with practical procedures for analysing English texts and relating them to their contexts of use It has been designed to complement functional grammars of English building on the generation of discourse analysis inspired by Halliday and Hasan s Cohesion in English The analyses presented were developed within three main theoretical and applied contexts i educational linguistics especially genre based literacy programmes ii critical linguistics as manifested in the development of social semiotics and iii computational linguistics in dialogue with the various text generation projects based on systemic approaches to grammar and discourse English Text s major contribution is to outline one way in which a rich semantically oriented functional grammar can be systematically related to a theory of discourse semantics including deconstruction of contextual issues i e register genre and ideology The chapters have been organized with the needs of undergraduate students in theoretical linguistics and postgraduate students in applied linguistics in mind Uses of Intertextuality in Classroom and Educational Research Nora Shuart-Faris,David Bloome,2004-11-01 *Relations and Functions within and around Language* David Lockwood,Michael Cummings,Peter Fries,William Spruiell,2005-05-01

Currently there is a movement in linguistics towards careful use of corpora in linguistic and text analysis which has involved both written and spoken corpora and those which combine spoken and written text Most text analyses address written texts often literary works but detailed discussion of the language of a single oral text from multiple perspectives has rarely been published This book is among the first to integrate the analysis of the language of spoken and written texts It describes language as a network of functional relations involving a context which is also a network of functional relations The essays in Part One present several perspectives on the theory of language as functional relations those in Part Two discuss a single oral text using a variety of functional perspectives All of the essays are by linguists interested in oral and written texts who have achieved international recognition in their fields Illustrated in this book are cognitive social construction social praxis and anthropological approaches to the description of text
