Taas Coach 4th Grade Mathematics:

Taas Coach 4th Grade Mathematics Caleb E. Crowell, 1991-06-01 **The TAAS Coach** Caleb E. Crowell, Frank Steele, 1990 Provides help in preparation for the TAAS test in Mathematics *Kill the Messenger* Richard Phelps, 2017-09-04

In response to public demand federal legislation now requires testing of most students in the United States in reading and mathematics in grades three through eight Many educators parents and policymakers who have paid little attention to testing policy issues in the past need to have better information on the topic than has generally been available *Kill the Messenger* now in paperback fills this gap This is perhaps the most thorough and authoritative work in defense of educational testing ever written Phelps points out that much research conducted by education insiders on the topic is based on ideological preference or profound self interest It is not surprising that they arrive at emphatically anti testing conclusions Much if not most of this hostile research is passed on to the public by journalists as if it were neutral objective and independent *Kill the Messenger* explains and refutes many of the common criticisms of testing describes testing opponents strategies through case studies of Texas and the SAT illustrates the profound media bias against testing acknowledges testing s limitations and suggests how it can be improved and finally outlines the consequences of losing the war on standardized testing Mathematics Education at Highly Effective Schools That Serve the Poor Richard S. Kitchen, Julie DePree, Sylvia Celedón-Pattichis, Jonathan Brinkerhoff, 2017-09-25 This book presents research findings about school level and district level practices and successful strategies employed in mathematics education by highly effective schools that serve high poverty communities It includes both the theory and practice of creating highly effective schools in these communities In 2002 nine schools were selected in a national competition to participate in the Hewlett Packard High Achieving Grant Initiative As part of this Initiative these schools participated in the research study this book reports The study employed both qualitative and quantitative methodologies to examine school and classroom level factors that contributed to high achievement particularly in mathematics The goals of the study were twofold 1 to investigate the salient characteristics of the highly effective schools in which the research was conducted and 2 to explore participating teachers conceptions and practices about mathematics curriculum instruction and assessment The schools described have much to teach about creating powerful learning environments that empower all students to learn challenging mathematics Given the pressures of the accountability measures of the No Child Left Behind legislation this book is extremely timely for those seeking school models that serve high poverty communities and have demonstrated high performance on high stakes examinations and other assessments Mathematics Education at Highly Effective Schools That Serve the Poor Strategies for Change is particularly relevant for teacher educators researchers teachers and graduate students in the fields of mathematics education and school policy and reform and for school administrators and district coordinators of mathematics education *The TAAS Coach* Vivienne Hodges, 1995 *Educational Equity and Accountability* James Joseph

Slavin, Margarita Calderon, Margarita Calderon, 2012-11-12 Latino or Hispanic children are one of the fastest growing groups in U S schools today On average these students perform worse than Anglo students on measures of academic achievement and other measures of academic success and their drop out rate is high There are schools of excellence among those serving Latino children but the majority of these children are placed at risk by schools and community institutions unable to build on the cultural personal and linguistic strengths these children are likely to bring with them to school Schools serving Latino students need programs based on high quality research capable of being replicated and adapted to local circumstances and needs The purpose of this book is to present the current state of the art with respect to research on effective instructional programs for Latino students in elementary and secondary grades Surprisingly this has not been done before there are many books on the situation of Latino students in U S schools but none so far have reviewed research on the outcomes of programs designed to enhance the academic achievement of these students The chapters represent a broad range of methodologies from experimental to correlational to descriptive and the solutions they propose are extremely diverse Each examines in its own way programs and practices that are showing success Together they present a rich array of research based effective programs that are practical widely available and likely to make a profound difference What binds the chapters together is a shared belief that Latino students can succeed at the highest levels if they receive the quality of instruction they deserve and a shared belief that reform of schools serving many Latino students is both possible and essential This is a book filled with statistics description and reviews of research but even more it is filled with optimism about what schools for Latino students can be and what these students will achieve It is a highly relevant and useful resource for educators policymakers and researchers who want to use research to inform the decisions they make about how to help Latino students succeed in elementary and secondary schools and beyond **Jsl Vol 4-N3** JOURNAL OF SCHOOL LEADERSHIP, 1994-05-01 The Journal of School Leadership is broadening the conversation about schools and leadership and is currently accepting manuscripts We welcome manuscripts based on cutting edge research from a wide variety of theoretical perspectives and methodological orientations The editorial team is particularly interested in working with international authors authors from traditionally marginalized populations and in work that is relevant to practitioners around the world Growing numbers of educators and professors look to the six bimonthly issues to deal with problems directly related to contemporary school leadership practice teach courses on school leadership and policy use as a quality reference in writing articles about school leadership and improvement **Index to 35mm Educational Filmstrips** ,1975 **Ulrich's International Periodicals Directory** Carolyn Farquhar Ulrich, 1988 Volume for 1947 includes A list of
