Underwater Acoustic Modelling and Simulation, Third Edition P.C. Etter, 2003-12-08 Underwater Acoustic Modeling and Simulation examines the translation of our physical understanding of sound in the sea into mathematical models that can simulate acoustic propagation noise and reverberation in the ocean These models are used in a variety of research and operational applications to predict and diagnose the performance of complex sonar systems operating in the undersea environment Previous editions of the book have provided invaluable guidance to sonar technologists acoustical oceanographers and applied mathematicians in the selection and application of underwater acoustic models Now that simulation is fast becoming an accurate efficient and economical alternative to field testing and at sea training this new edition will also provide useful guidance to systems engineers and operations analysts

interested in simulating sonar performance Guidelines for selecting and using available propagation noise and reverberation models are highlighted Specific examples of each type of model are discussed to illustrate model formulations assumptions and algorithm efficiency Instructive case studies demonstrate applications in sonar simulation **The Climate Near the Ground** Rudolf Geiger,Robert H. Aron,Paul Todhunter,2003-04-09 This revised and updated edition of Rudolf Geiger s classic text provides a clear and vivid description of the surface microclimate its physical basis and its interactions with the biosphere The book explains the principles of microclimatology and illustrates how they apply to a wide array of subfields Those new to the field will find it especially valuable as a guide to understanding and quantifying the vast and ever increasing literature on the subject Designed as an introductory text for students in environmental science this book will also be an essential reference for scientists seeking a clear understanding of the nature and physical basis of the climate near the ground and its interactions with the biosphere **Field Engineers Bulletin ...** U.S. Coast and Geodetic Survey,1934
