is essential reading for all students of the press with comprehensive and critical coverage of the most important debates in the study of newspaper journalism from ethics and investigative journalism to political economy and the future of the industry. Given the shifting boundaries and central importance of newspapers it will be of interest to all students of journalism and the media. Praise for the Journalism Studies Key Texts series: It is easy to describe a good textbook for a specific journalistic format. The ideal book has to satisfy a list of requirements that are also bullet pointed in journalism assignment outlines. A text has to synthesize the existing body of knowledge, explain concepts clearly, have a logical order of topics and provide enough information and directions to pursue further study. One may also hope it would include real life examples and be lucid, vivid and a pleasure to read. Hard to find. Not anymore. The new SAGE series Journalism Studies Key Texts satisfies the main requirements on the list. Carefully planned and meticulously edited by Martin Conboy, David Finkelstein and Bob Franklin, the textbook series is a welcome contribution to the literature of journalism studies. All three books follow the same structural template: an overview of historical development, explication of the political and economic frameworks within particular types of journalism, a review of contemporary practices, social demographics, a comparative analysis of practices around the world, a summary of main conceptual approaches, an indication of future directions, recommendations for further reading. This strong organization resembles a template for a course outline. This is intentional because the series is aimed both at students and their practice based lecturers who often come straight from industry and need time to adjust to the academic environment. The series achieves its aim to bridge the sometimes too evident dissonance between journalism theory and practice. They successfully situate discussions about journalism in social and historical contexts. We see the faces of individual journalists, the circumstances of news production, the relationship with owners, the battle between the public service and the profit nature of news, the relevance of journalism work. The detailed account of the conditions under which newspaper, radio and alternative journalism is produced and performed make the Journalism Studies Key Texts series mandatory reading for both journalism students and their lecturers. **Proximization** Piotr Cap, 2013-06-15. This book proposes a new theory, proximization theory, in the area of political public legitimization discourse. Located at the intersection of Pragmatics, Cognitive Linguistics and critical approaches, the theory holds that legitimization of broadly consequential political public policies such as pre-emptive interventionist campaigns is best accomplished by forced construals of virtual external threats encroaching upon the speaker and her audience's home territory. The construals which proceed along spatial, temporal and axiological lines are forced by strategic deployment of lexico-grammatical choices drawn from the three domains. This proposal is illustrated primarily in the in-depth analysis of the 2001-2010 US discourse of the War on Terror and secondarily in a number of pilot studies pointing to a wide range of further applications: environmental discourse, health communication, cyber threat discourse, political party representation. The theory and the empirical focus of the book will appeal to researchers working on interdisciplinary projects in Pragmatics, Semantics

Cognitive Linguistics Critical Discourse Studies as well as Journalism and Media Studies      *The Handbook of Journalism Studies* Karin Wahl-Jorgensen, Thomas Hanitzsch, 2019-06-20 This second edition of *The Handbook of Journalism Studies* explores the current state of research in journalism studies and sets an agenda for future development of the field in an international context. The volume is structured around theoretical and empirical approaches to journalism research and covers scholarship on news production, news content, journalism and society, journalism and culture, and journalism studies in a global context. As journalism studies has become richer and more diverse as a field of study, the second edition reflects both the growing diversity of the field and the ways in which journalism itself has undergone rapid change in recent years. Emphasizing comparative and global perspectives, this new edition explores key elements, thinkers, and texts. Historical context, Current state of the field, Methodological issues, Merits and advantages of the approach, Area of study, Limitations and critical issues of the approach, Area of study, Directions for future research. Offering broad international coverage from world leading contributors, this volume is a comprehensive resource for theory and scholarship in journalism studies. **Key Concepts in Media and Communications** Paul Jones, David Holmes, 2011-11-10 A sprightly critical and intelligent guided tour around the mansion of media and communications cultural research, enormously useful for students and researchers. James Curran, Goldsmiths University of London. A highly comprehensive guide to core concepts in media theory and criticism. Andrew Goodwin, University of San Francisco. A great resource for new undergrads and something I urge my students to buy and use as a handy first port of call throughout their studies. Paul Smith, De Montfort University. This book covers the key concepts central to understanding recent developments in media and communications studies. Wide ranging in scope and accessible in style, it sets out a useful, clear map of the important theories, methods, and debates. The entries critically explore the limits of a key concept as much as the traditions that define it. They include clear definitions, are introduced within the wider context of the field, and each one is fully cross-referenced, is appropriately illustrated with examples, tables, and diagrams, provides a guide to further reading. This book is an essential resource for students of media and communications across sociology, cultural studies, creative industries, and of course media and communications courses.

*The Sacred in the Modern World* Gordon Lynch, 2012-02-17 It is often claimed that we live in a secular age. But we do not live in a desecrated one. Sacred forms, whether in religious or secular guise, continue to shape social life in the modern world, giving rise to powerful emotions, polarized group identities, and even the very concept of moral society. Analyzing contemporary sacred forms is essential if we are to be able to make sense of the societies we live in and think critically about the effects of the sacred on our lives, for good or ill. *The Sacred in the Modern World* is a major contribution to this task. Reinterpreting Durkheim's theory of the sacred and drawing on the strong program in cultural sociology, Gordon Lynch sets out a theory of the sacred that can be used by researchers across a range of humanities and social science disciplines. Using

vividly drawn contemporary case material including the abuse and neglect of children in Irish residential schools and the controversy over the BBC's decision not to air an appeal for aid for Gaza the book demonstrates the value of this theoretical approach for social and cultural analysis The key role of public media for the circulation and contestation of the sacred comes under close scrutiny Adopting a critical stance towards sacred forms Lynch reflects upon the ways in which sacred commitments can both serve as a moral resource for social life and legitimate horrifying acts of collective evil He concludes by reflecting on how we might live thoughtfully and responsibly under the light and shadow that the sacred casts asking whether society without the sacred is possible or desirable

**Media Discourse** Mary Talbot, 2007-09-15 This lively and accessible study of media and discourse combines theoretical reflection with empirical engagement and brings together insights from a range of disciplines Within media and cultural studies the study of media texts is dominated by an exclusive focus on representation This book adds long overdue attention to social interaction The book is divided into two sections The first outlines key theoretical issues and concepts including informalisation genre hybridisation positioning dialogism and discourse The second is a sustained interrogation of social interaction in and around media Re-examining issues of representation and interaction it critically assesses work on the para-social and broadcast sociability then explores distinct sites of interaction production communities audience communities and interactivity with audiences

**Poor News** Steven Harkins, Jairo Lugo-Ocando, 2017-11-15 Poor News examines the way discourses of poverty are articulated in the news media by incorporating specific narratives and definers that bring about certain ideological worldviews This happens the authors claim because journalists and news editors make use of a set of information strategies while accessing certain sources within specific social and political dynamics The book looks at the case of the news media in Britain since the industrial revolution and produces a historical account of how these media discourses came into play The main thesis is that there have been different historical cycles that reflect particular hegemonic ideas of each period Consequently the role of mainstream journalism has been a subservient one for existing elites when it comes to the propagation of dominant ideas

### **Social Movement Discourse**

Teun A. van Dijk, 2023-12-22 This is both the first systematic introduction to Discourse Studies for students and scholars of social movements and a study of discourses on the European refugee crisis by leading theorist Teun A van Dijk Concrete examples of different kinds of discourse are vital for the study of social movements because their activities are not limited to such well known forms of contention as marches occupations or strikes but also daily discursive activities such as meetings assemblies interviews press conferences manifestos pamphlets banners graffiti websites blogs social media posts and everyday talk This book proposes that empirical analyses of these discourses should go beyond the popular but vague notion of frame and engage in more detailed and explicit analyses of the text and talk of social movements This is a much needed introduction to the most important structures of discourse and a detailed theoretical account of the notion of solidarity defining the Refugees Welcome movement

### **Moral Panics, Social Fears, and the Media** Siân Nicholas, Tom

O'Malley, 2013-09-02 The media have always played a central role in organising the way ideas flow through societies But what happens when those ideas are disruptive to normal social relations Bringing together work by scholars in history media and cultural studies and sociology this collection explores this role in more depth and with more attention paid to the complexities behind conventional analyses Attention is paid to morality and regulation empire and film the role of women authoritarianism wartime and fears of treachery and fears of cultural contamination The book begins with essays that contextualise the theoretical and historiographical issues of the relationship between social fears moral panics and the media The second section provides case studies which illustrate the ways in which the media has participated in or been seen as the source of the creation of threats to society Finally the third section then shows how historical research calls into question simple assumptions about the relationship between the media and social disruption
