Tactics Conversations F Deux:

Code-Switching in Conversation Peter Auer, 2013-07-04 Code Switching the alternating use of two or more languages in conversation has become an increasingly topical and important field of research Now available in paperback Code Switching in Conversation brings together contributions from a wide variety of sociolinguistics settings in which the phenomenon is observed It addresses not only the structure and the function but also the ideological values of such bilingual behaviour The contributors question many views of code switching on the empirical basis of many European and non European contexts By bringing together linguistics anthropological and socio psychological research they move towards a more realistic conception of bilingual conversation action

The great conversation Robert Maynard Hutchins, 1952 A massive set of classic books includes the most influential works of literature philosophy and science in the history of the West *Once More Unto the Speech, Dear Friends: The comedies* William Shakespeare, 2006 Applause Books There has been a great change in the last twenty years to actor auditions which now require the demonstration of enormous flexibility The actor is often expected to show more range than ever before and often several shorter audition speeches are asked for instead of one or two longer ones To stay at the top of his or her game the Shakespearean actor needs more knowledge of what makes the play tick especially since the early plays demand a different style from the later ones Each genre comedy history tragedy has different requirements No current monologue book deals directly with the bulk of these concerns One More unto the Speech Dear Friends now fills that gap This three volume set will help actors discover the extra details of humanity that the original folio texts automatically offer Of Shakespeare's 37 plays only Pericles is not included In the trilogy of books there are over 900 separate audition possibilities This represents about 600 more monologues than are available in any other series There are four parts to each speech A background giving context and approximate timing A modern text version The original folio version Commentary to explain the differences between the two texts including full discussion of the devices peculiar to that speech's genre the age and gender of the character and more

Utopia's Discontents Faith Hillis, 2021-04-16 Utopia's Discontents provides the first synthetic treatment of the Russian revolutionary emigration before the Revolution It argues that neighborhoods created by Russian exiles became sites of revolutionary experimentation that offered their residents a taste of their anticipated utopian future

Confronting Vietnam Ilya V. Gaiduk, 2003 Based on extensive research in the Russian archives this book examines the Soviet approach to the Vietnam conflict between the 1954 Geneva conference on Indochina and late 1963 when the overthrow of the South Vietnamese president Ngo Dinh Diem and the assassination of John F Kennedy radically transformed the conflict The author finds that the USSR attributed no geostrategic importance to Indochina and did not want the crisis there to disrupt détente The Russians had high hopes that the Geneva accords would bring years of peace in the region Gradually disillusioned they tried to strengthen North Vietnam but would not support unification of North and South By the early 1960s however they felt obliged to counter the American embrace of an

aggressively anti Communist regime in South Vietnam and the hostility of its former ally the People s Republic of China Finally Moscow decided to disengage from Vietnam disappointed that its efforts to avert an international crisis there had failed
