Tahiti Report 2003:

Tahiti Report 2003 Austin Peterson, Islands of Inquiry Geoffrey Richard Clark, Sue O'Connor, Bryan Foss Leach, 2008-06-01 Many of the papers in this volume present new and innovative research into the processes of maritime colonisation processes that affect archaeological contexts from islands to continents Others shift focus from process to the archaeology of maritime places from the Bering to the Torres Straits providing highly detailed discussions of how living by and with the sea is woven into all elements of human life from subsistence to trade and to ritual Of equal importance are more abstract discussions of islands as natural places refashioned by human occupation either through the introduction of new organisms or new systems of production and consumption These transformation stories gain further texture and variety through close examinations of some of the more significant consequences of colonisation and migration particularly the creation of new cultural identities A final set of papers explores the ways in which the techniques of archaeological sciences have provided insights into the fauna of the islands and the human history of such places Provided by publisher *Insect Conservation and Islands* Tim R. New, 2008-06-19 A series of original papers and reviews dealing with the peculiarities of island insects and their conservation in many parts of the world Contributions to this special issue of *Journal of Insect Conservation* range from biogeographical analyses and ecological features of island insects and their evolution to the variety of concerns for their wellbeing and practical conservation through a variety of sometimes novel approaches They provide a valuable and up to date resource for entomologists and conservation practitioners Paul Gauguin Yvonne Muchitsch, Discover two previously unknown works by Paul Gauguin *Nue tahitienne assise avec fleur rouge recto* and *Chambre avec vue d'une fenetre ouverte verso* This book blends art historical analysis advanced technological investigations and provenance research to provide fresh insights into Gauguin's genius With contributions from Dr Yvonne Muchitsch and Dr Elpida Vouitsis the research offers compelling evidence for the authenticity of these works placing them within Gauguin's extraordinary oeuvre Perfect for art enthusiasts and historians this book unveils the mysteries of two lost masterpieces enriching the artist's legacy A must read for anyone fascinated by art history and the enduring allure of the Tahitian imagination **The Mecyclothorax beetles (Coleoptera, Carabidae, Moriomorphini) of Tahiti, Society Islands** James K. Lieberr, 2013-08-09 The 101 Mecyclothorax carabid beetle species of Tahiti French Polynesia comprise a very diverse adaptive radiation Given Tahiti's surface area of only 1 045 km² the island's Mecyclothorax fauna represents the densest most diverse radiation of species on Earth Speciation of Tahitian Mecyclothorax has also occurred very rapidly with closely related species allopatrically distributed across geographic ranges defined by Tahiti's incredibly complex geological topography Such high levels of endemism are useful for conservation management as continuing presence of these beetles in small areas of Tahitian forest can signify good health of the native biota in those areas This taxonomic revision includes dichotomous keys and diagnostic photographs supporting identification of all 101 species over one quarter newly described

in this publication Each species treatment includes ecological and geographical information This monograph illuminates an important component of Tahitian biodiversity in support of ongoing efforts to conserve Tahiti s biological resources

Pacific Magazine ,2005 *Marketing Plan 2005* Fidschi Visitors Bureau,2005 **Natural Hazards in the Asia-Pacific Region** James P. Terry,James Rodney Goff,2012 Even a cursory glance at any map of the Asia Pacific region makes a striking impression in addition to the large continental landmass the region encompasses a truly vast expanse of ocean dispersed over which are thousands of islands Many might say that it could not be a worse time to live in this region In the past few years we have experienced not only a number of devastating tsunamis Indonesia Solomon Islands Samoa Japan but should not forget either the seemingly endless list of other natural hazards such as tropical cyclones and typhoons volcanic eruptions river floods and wildfires amongst numerous others *Tuna Fishery Yearbook ...* ,2001 **State of the World's Minorities 2006** Richard Green,2005-12-22 The way in which we treat minorities is the measure of civilization of a society Mahatma Gandhi In the era of globalization societies are becoming more diverse Every country around the globe exhibits some ethnic religious or cultural diversity Instead of an asset to be celebrated however governments too often treat this as a threat States in every world region repress the rights of their minorities or even deny their existence For some minorities or indigenous peoples their very survival is at stake In addition to the war in Iraq which remained the focus of intense media attention over 20 further major armed conflicts were ongoing in other parts of the world in 2005 as well as a range of lower intensity conflicts In three quarters of these armed conflicts violence was targeted at specific ethnic or religious groups Yet many of these conflicts could have been prevented if minority and indigenous rights had been respected This first edition of the State of the World s Minorities looks at key developments over the last year affecting the human rights and security of ethnic religious or linguistic minorities and indigenous peoples It includes a Preface by the UN Special Adviser on the Prevention of Genocide Juan E M ndez analysis of trends and legal developments by leading authorities on minority rights an overview by world region highlighting main developments and areas of concern statistical data on Peoples under Threat 2006 ratification tables for the main minority rights treaties and extracts from recently concluded treaties This major new reference work provides an objective analysis of how minorities and indigenous peoples are treated around the globe and with it a measure of the civilization of our societies **Fenua and Fare, Marae and Mana** Jennifer G. Kahn,2025-05-31 In 1767 the shores of Tahiti first appeared in the sights of Captain Samuel Wallis and ever since this tropical locale has captured the imagination of explorers merchants missionaries historians anthropologists archaeologists and others Fenua and Fare Marae and Mana brings readers back to the time before European contact starting with the settlement of the archipelago by Polynesian voyagers or the M ohi some 1 000 years ago From the massive stone ruins of chiefly households agricultural terraces and religious temples marae to sacred foods clothing and war cults Jennifer G Kahn delves into every aspect of M ohi life Drawing on current anthropological and archaeological research and data from her own

field research and that of others Kahn explores the development of M ohi politics economies religion and social relationships and their connections to the local environment Anthropologists and archaeologists have previously investigated how ecology and natural resources demographic growth and cultural factors such as status rivalry religion and ideology spurred sociopolitical changes in the Society Islands But how did M ohi settlements coalesce into the powerful chiefdoms encountered by Captain Cook in the late 1700s Synthesizing a vast amount of archaeological data oral histories and historical accounts Kahn traces changes in M ohi material culture land use diet subsistence agriculture settlement patterns environment and residential and ritual architecture to present the first authoritative cultural sequence for the pre contact Society Islands She also addresses a long standing debate in historical anthropology by arguing that M ohi society had multiple tiers of chiefs and settlement hierarchies prior to European contact thus forming a complex chiefdom Integrating anthropology archaeology indigenous history and theory Kahn lays out a new model for interpreting complex chiefdoms that blends bottom up and top down perspectives on social change With special attention to inequality and environmental change Fenua and Fare uses collective action theory to develop a more nuanced political history of social change offering fresh insight on the lives and interactions of commoners land managers high chiefs and secondary chiefs Readers will come away with a new appreciation for how social inequality blooms and grows not just in the Society Islands but elsewhere in Polynesia and beyond
