Tail Of The Storm:

Albatrosses, Petrels and Shearwaters of the World Derek Onley, Paul Scofield, 2019-11-14 Famous for their size and elegance in flight albatrosses are familiar to anyone who has travelled through the southern oceans and are a flagship family of conservation concern. However albatrosses are just one of several groups of pelagic birds those that visit land only to breed and spend the rest of their lives far from the coast soaring from ocean to ocean in a never ending search for food. Mysterious and graceful these birds can present a formidable identification challenge to even the most experienced birder. This book provides the answer the first comprehensive guide to pelagic birds the albatrosses petrels shearwaters storm petrels and diving petrels. A total of 46 spectacular colour plates highlight key ID criteria of the birds in flight with close ups of diagnostic regions of the plumage. The plates are accompanied by accurate distribution maps while the sparkling text brings the world of these amazing birds to life. Several extremely rare species such as Beck's Petrel are illustrated for the first time while the New Zealand Storm petrel rediscovered as recently as 2004 is also included. Sea watchers all around the world will find this superb field guide indispensable.

Field Guide to the Birds of East Asia Mark Brazil, 2020-01-23 This is the first single volume guide ever devoted to the eastern Asian avifauna. The eastern Asian region centring especially on the major islands off the continental coast including Japan and Taiwan and the immediately adjacent areas of the Asian continent from Kamchatka in the north and including the Korean Peninsula are an important centre of endemism. Birds endemic to this region include representatives of many of the major families from the world's largest eagle Steller's Sea Eagle to the tiny Formosan Firecrest. The east Asian continental coast and the offshore islands also form one of the world's major international bird migration routes especially for waterfowl shorebirds and raptors while the east Asian continental mainland itself is home to a wide range of species little known to western ornithologists such as Scaly-sided Merganser Oriental Stork and Mugimaki Flycatcher. The guide features the most up to date text available which in conjunction with extensive colour plates throughout facilitates the field identification of all of the species known from the region. Colour distribution maps enhance the text by providing a visual analysis of the summer winter and migratory ranges of all species.
