The Web of Violence Jennifer E. Turpin, Lester R. Kurtz, 1997 An excellent representation of the interdisciplinary thrust of peace studies Paul Joseph Tufts University Violence is a topic of concern everywhere in the media in churches in the halls of governments In every land and in every culture violence is considered by most to be taboo a last resort Yet under certain conditions from the level of the family to the level of nations violence is used as a mechanism of social control Various rationalizations thus emerge to distinguish between legitimate and illegitimate violence The Web of Violence explores the interrelationship among personal collective national and global levels of violence This unique collection brings together a number of internationally known contributors to address the genesis and manifestations of violence in the search for a remedy for this confounding social problem As the global community becomes more intimate we must better understand the nature of violence The Web of Violence supports this aim by examining the dangerous human phenomenon from many perspectives at different levels and using multiple methodologies CONTRIBUTORS Robert Jay Lifton Christopher G Ellison John P Bartkowski Yuan Horng Chu Philip Smith Robert Elias Birgit Brock Utne Riane Eisler Johan Galtung

A Culture of Second Chances David M. Newman, 2019-12-12 This book examines the iconic presence of second chances in everyday life David Newman explores its various iterations in popular culture commercial marketplaces religion intimate relationships education criminal justice and human bodies He analyzes how this concept as a cultural aspiration driver of policy and lived personal experience has become part and parcel of our individual sense of self and our collective national identity While the rhetoric of redemption is familiar and ubiquitous Newman uncovers the costs and constraints of second chances paying particular attention to the factors that affect judgments of deservedness Informed by an array of data sources including personal interviews mission statements of nonprofit recovery agencies images in popular culture stories from the news plot summaries of novels and scriptural texts

Newman frames the second chance experience as the quintessential cultural paradox a concept that simultaneously represents the pinnacle of our shared hopes for renewal and our deepest suspicions about the intransigence of human nature

The Making of Mexican Modernist Architecture Celia Esther Arredondo Zambrano, 2023-05-03 This book presents the making of Mexican Modernist architecture through five power structures academic social status economic political gender and postcolonial and by interviews and analysis of 13 key Mexican architects These include Luis Barrag n Jos Villagr n Garc a Juan O Gorman Pedro Ram rez V zquez Agust n Hern ndez Abraham Zabludovsky Carlos Mijares Ricardo Legorreta Juan Jos D az Infante Enrique Norton Alberto Kalach Javier Sordo Madaleno and Clara de Buen Although the five power structures framed what was built the testimony of these Mexican architects helps us to recognize and discover subtleties and nuances Their views thereby shed light on what contributed to making Mexican Modernist architecture so distinctive globally Even if these architects were not always aware of the power structures their projects nonetheless supported discrimination marginalization and subjugation In that sense the book also reveals the extent to which these power structures are still present today The Making of Mexican Modernist Architecture s uniqueness lies in uncovering the remarkable buildings that arose amid the five power structures while at the same time questioning their validity It also voices the urgent need today for a new kind of architecture outside these boundaries The book is essential reading for anyone studying Mexican and Latin American architecture

Labour, Nature and Capitalism Silpa Satheesh, 2025-04-03 Labour Nature and Capitalism traces how the alliance between labour and capital manifests in the form of conflicts between organised trade unions and a local environmental movement in the context of the much acclaimed Kerala model of development It explores the history of the area s local industrialisation the presence of varied economic interests and exposes the barriers to forming solidarity networks among the working classes Situated in the backdrop of the Eloor Edayar industrial belt this book delves deeper into the ways in which capitalism infiltrates and manipulates the social movement landscape in Kerala It shows how the hegemonic coalition between the state industries and institutionalised trade unions enable capitalist rationality to mediate and control social movements in postcolonial settings Using an ethnographic approach the book seeks to embark on a journey to understand the tensions between two progressive social movements a trade union collective and a local environmental movement foregrounding the experiences of members of the respective groups The analysis presented here shows how the contestations conflicts between the movements stem from interpretive as well as ideological differences surrounding economic development and environmental justice Praise for Labour Nature and Capitalism Labour Nature and Capitalism is a carefully researched as well as theoretically astute book on a subject of vital importance to India and the world Based on fieldwork in Kerala Dr Silpa Satheesh studies the tensions between grassroots environmental groups and trade unions analysing how factory labour finds itself in opposition to other even more vulnerable sections of the working class Importantly she explores both the organizational as well as affective aspects of struggle allowing activists to speak loud

and clear in their own voices Through her work Dr Satheesh convincingly demonstrates that the conventional polarity of environment versus development is false and even pernicious Ramachandra Guha author of *Speaking with Nature The Origins of Indian Environmentalism* This work is an important contribution to an understudied and weakly understood arena the relationship between trade unions and environmental movements While anecdotal accounts of the tensions and sometimes complementarities between the two movements are common detailed and systematic studies are not Given the urgent need to bring these movements together to challenge capitalist exploitation and unsustainability this study is very timely Ashish Kothari environmental activist and author There are many environmental grassroots movements in the state of Kerala This fascinating book focuses on the Periyar River gravely and persistently polluted by discharges of company water Competent activists have denounced the environmental and public health damages for many years counting on support from farmers and fishers However another section of the working class smaller in number but more powerful politically the industrial trade unions together with factory owners and the state administration accuses them of being at the service of anti national interests By poignant long outspoken interviews with members of both opposite groups and thorough documentation the sociologist Silpa Satheesh brilliantly answers a question of world relevance is there an environmentalism of the working class Joan Martinez Alier Autonomous University of Barcelona Silpa Satheesh s book is a very welcome addition to environmental labour studies for many reasons It adds a case from the Global South to the growing literature on labour and the environment it examines the dynamics between labour and environment through an ethnographic approach that provides nuance and empathy and demonstrates that labour is not homogeneous as workers are central to both the labour and environmental side of her story In that sense it alerts us to the fact that workers people who need to work to reproduce themselves are not just one category amongst others but the largest category short of human beings and citizens of one country or another From such a starting point the tensions between labour and environmental priorities are not solely conflicts between categories of people but also within the very broad category of labour As a result of the above Dr Satheesh s well written book broadens and enriches environmental labour studies and should be read widely and productively Dr Dimitris Stevis Colorado State University USA Strong alliances between the labour and the environmental movement are an essential precondition for combatting the climate crisis At the same time they are far from being easy to build Labour Nature and Capitalism brilliantly demonstrates why this is the case Based on deep empirical insights and sound theoretical reflections it illuminates labour environment relationships and explores how they can be turned into a force of socio ecological transformation Markus Wissen Berlin School of Economics and Law 2017 Mariana Aguirre, Rosa Sarabia, Renée M. Silverman, Ricardo Vasconcelos, 2017-04-24 Futurism Studies in its canonical form has followed in the steps of Marinetti s concept of *Futurisme mondial* according to which Futurism had its centre in Italy and a large number of satellites around Europe and the rest of the globe Consequently authors of textbook histories of Futurism focus their attention on Italy add a

chapter or two on Russia and dedicate next to no attention to developments in other parts of the world Futurism Studies tends to see in Marinetti's movement the font and mother of all subsequent avant gardes and deprecates the non European variants as mere derivatives Vol 7 of the International Yearbook of Futurism Studies will focus on one of these regions outside Europe and demonstrate that the heuristic model of centre periphery is faulty and misleading as it ignores the originality and inventiveness of art and literature in Latin America Futurist tendencies in both Spanish and Portuguese speaking countries may have been in part influenced by Italian Futurism but they certainly did not derive from it The shift towards modernity took place in Latin America more or less in parallel to the economic progress made in the underdeveloped countries of Europe Italy and Russia have often been described as having originated Futurism because of their backwardness compared to the industrial powerhouses England Germany and France According to this narrative Spain and Portugal occupied a position of semi periphery They had channelled dominant cultural discourses from the centre nations into the colonies However with the rise of modernity and the emergence of independence movements cultural discourses in the colonies undertook a major shift The revolt of the European avant garde against academic art found much sympathy amongst Latin American artists as they were engaged in a similar battle against the canonical discourses of colonial rule One can therefore detect many parallels between the European and Latin American avant garde movements This includes the varieties of Futurism to which Yearbook 2017 will be dedicated In Europe the avant garde had a complex relationship to tradition especially its primitivist varieties In Latin America the avant garde also sought to uncover and incorporate alternative i.e indigenous traditions The result was a hybrid form of art and literature that showed many parallels to the European avant garde but also had other sources of inspiration Given the large variety of indigenous cultures on the American continent it was only natural that many heterogeneous mixtures of Futurism emerged there Yearbook 2017 explores this plurality of Futurisms and the cultural traditions that influenced them Contributions focus on the intertextual character of Latin American Futurisms interpret works of literature and fine arts within their local setting consider modes of production and consumption within each culture as well as the forms of interaction with other Latin American and European centres 14 essays locate Futurism within the complex network of cultural exchange unravel the Futurist contribution to the complex interrelations between local and the global cultures in Latin America and reveal the dynamic dialogue as well as the multiple forms of cross fertilization that existed amongst them

EXPOSE The Reality—Then Deal With It! Latavian Gardner, 2015-03-16 EXPOSE THE REALITY If you were to conduct an emotional self evaluation what obstacles would you recognize as the most prevalent pain pride stubbornness egotism selfishness or lack of consideration for others What negative encounters do you find repeating themselves Which one of these stumbling blocks are preventing you from living a life of spiritual freedom Is it an embedded thought experience practice or encounter that has defined who you are I encourage you to DEAL WITH IT How do we deal with the psychological repeating of our past One obstacle problem and

obstruction at a time **Philosophy of an Angel** Edward Allen Horton, 2007-09 Join first time author Edward Allen Horton as he shares his autobiographical story in Philosophy of an Angel His poetry prose style is sure to stretch the minds of the reader as he tells the story of how he confronts the demons in his life from his childhood to adulthood Horton puts a unique spin on his story by believing that his hardships were a part of God's master plan for him to endure in order to survive and become a strong Christian and to regain the love of his life **Fateful Triangle** Noam Chomsky, 2016-09-20 With an extended new preface by the author One of the most important intellectuals alive Independent One of Noam Chomsky's most important and renowned works Fateful Triangle is a devastating indictment of American and Israeli foreign policy which covers a sustained period of Middle East history from the formation of the State of Israel to the Oslo Peace Accords With a foreword by the late Edward Said this powerful book belongs in the hands of anyone who wants a deep understanding of Israel and its relationship to Western power Mobile Pervasive Computing Satheeshkumar, Sekar, 2023-12-02 Satheeshkumar Sekar Project Manager Mphasis Corporation USA *Nepal's Power Elites* Gaurav Bhattarai, 2025-09-26 To the ambitious Shah Rajah like Prithvi Narayan foreign was Muglan the abode of non believers Foreign was Bhot the Nepali term for Tibet Foreign was Firangi the British colonizers To the Rana ruler like Jung Bahadur foreign was a little broader crossing the sea reaching Europe meeting Queen Victoria consuming foods prohibited by the then Nepali State stucco palaces English language ballroom and many more Even those Shah Rajahs susceptible to the prowess of both the regent queens and Rana rulers were thrilled by the domain of foreign either by seeing the British Residents in Durbar or by gazing at the menus of the European departmental stores Following the Indian independence however King Tribhuvan had the pleasure and privilege of swotting up more about the realm of foreign be it during the ball dance with Erica or in Boris's Club 300 or during his stay in Hyderabad House His son Mahendra dared and darted Nepal's foreign across the post war international system through his visits and interlocutors At the height of the Cold War to Eton educated Birendra the sphere of foreign had to be dealt with the know how of negotiation and conciliation As the experiences exposure and escapade of ruling groups steadily descended and spread to the larger public domain the leaders and ministers from the political parties brazenly branded elites ploys in dealing with the external world as foreign policy and the elites interests as the national interests **Behavior Modification in Black Populations** Samuel M. Turner, 2012-12-06 During the past decade research and practice in the field of behavior modification have experienced phenomenal growth Behavioral intervention strategies that were considered strictly experimental a few years ago are now accepted therapeutic modalities and behavioral methodology has been instrumental in creating an atmosphere conducive to the development of scientific rigor in the area of mental health But behavioral influence has not been limited to mental health There has been considerable impact in education industry government and general health care Although behavior modification has made a significant impact on psychology in general there has been a noticeable lack of theorizing and empirical research on issues primarily related to black populations

In fact the black community in general and black psychologists in particular often have viewed behavioral approaches with suspicion We hope that the material presented in this volume will serve to clarify what the behavioral approach is and what it is not and that it will help to foster an understanding of the behavioral approach Moreover empirical data demonstrating the effectiveness of behavioral procedures with black populations are presented It is our hope that the material will provide some insight into how behavioral theory methodology and therapeutic strategies can be used to the benefit of black mental health in particular and the overall psychological health of the black community in general

Civil Rights in Black and Brown

Max Krochmal, Todd Moye, 2021-11-09 Not one but two civil rights movements flourished in mid twentieth century Texas and they did so in intimate conversation with one another Far from the gaze of the national media African American and Mexican American activists combated the twin caste systems of Jim Crow and Juan Crow These insurgents worked chiefly within their own racial groups yet they also looked to each other for guidance and at times came together in solidarity The movements sought more than integration and access they demanded power and justice Civil Rights in Black and Brown draws on more than 500 oral history interviews newly collected across Texas from the Panhandle to the Piney Woods and everywhere in between The testimonies speak in detail to the structure of racism in small towns and huge metropolises both the everyday grind of segregation and the haunting acts of racial violence that upheld Texas's state sanctioned systems of white supremacy Through their memories of resistance and revolution the activists reveal previously undocumented struggles for equity as well as the links Black and Chicana organizers forged in their efforts to achieve self determination

Panda

Nation E. Elena Songster, 2018-03-16 Panda Nation demonstrates how the giant panda's transformation from an obscure animal into a national treasure reflects China's efforts to distinguish itself as a nation Through government directed science and popular nationalism the story of the panda's iconic rise offers a striking reflection of China's dramatic ascent in global status

Imagination

José Van Dijck, 1998-01-31 Genetics seems more popular than ever DNA technology not only sustains large areas of biomedicine and business but also prevails in social and legal practices and takes root in cultural products Since the late 1950s the public image of genetics metamorphosed from a suspect branch of research into a thriving well funded field of biomedicine Images and imaginations have played a crucial role in the popularization of genetic knowledge The media played up images of engineered bugs scientists promoted images of selfish genes and science fiction writers infested the imagination with stories of cloned monsters Image nation examines the role of science journalism and fiction in the popularization of genetics
