**Tairora Culture** James Bennett Watson, 1983 *From Primitive to Postcolonial in Melanesia and Anthropology* Bruce Knaft, 2025-10-01 What have anthropologists taught us about Melanesia one of anthropology's most important and intensively studied world regions In this book Professor Bruce Knaft draws together and critically reanalyzes what we know about major features of Melanesian cultural history warfare and politics gender bodily practices and spirituality as discerned from more than a century of academic study *From Primitive to Postcolonial in Melanesia and Anthropology* is arguably the most comprehensive single reassessment of Melanesia as an ethnographic world area to have been published in several decades Written for students as well as professional scholars this work further broadens our understanding by analyzing the history of Melanesian ethnography and relating this history to the larger relationship between Melanesia as a contemporary world area and anthropology as a field of contemporary human study Bruce M Knaft is Professor of Anthropology Emory University and the author of three previous books as well as some thirty journal articles and chapters Knaft's interests span a wide range of issues in the anthropology of Melanesia and he is articulate with general issues of cultural theory and anthropological history

**Anyan's Story** Virginia Drew Watson, 2012-12-18 Anyan was born in the mid 1920s into the pre metal culture of the Tairora of what is now called Papua New Guinea Her early life was rooted in the traditions of her remote village where she worked the land and took part in the rituals connected with raising food but she lived at the time of first contact between her people and those from outside and she saw the traditional ways begin to change At her marriage she moved to the government station at Kainantu where she was exposed to more Western influences even as she tried to hold on to her past and her ties to her village Before she died in the mid 1970s this woman of indomitable spirit rode in an airplane and voted in a Western style election When Virginia Watson began her anthropological fieldwork in the eastern highlands of New Guinea in 1954 she needed an interpreter for the unwritten language of the Tairora Fortune sent her Anyan In their work together as Watson researched the role of Tairora women Anyan gradually painted a picture of her society using events from her own life Over many years of collaboration and deepening friendship a remarkable life history was told one that bridged the periods before and after contact with Western culture When Watson suggested the book to Anyan she was elated She was anxious that everyone know about Tairora Her pride in her upbringing in her culture in her beautiful corner of the world was apparent Individuals experience the shock of cultural transplantation in many ways As Watson writes some of those forced to make the move from one culture to another were consumed by it and some were consigned to straddling the dark void that the cultural disparities created Others like Anyan were able to maintain equilibrium in both cultures Anyan's Story will be of interest to anthropologists and other social scientists It is a valuable study of gender roles women's experience in cross cultural societies and culture shock

*Anthropological Perspectives On Kinship* Ladislav Holy, 1996-10-20 This authoritative introductory text takes into account the changes in the conceptualisation of kinship

brought about by new reproductive technologies and the growing interest in culturally specific notions of personhood and gender. Holy considers the extent to which Western assumptions have guided anthropological study of kinship in the past. In the process he reveals a growing sensitivity on the part of anthropologists to individual ideas of personhood and gender and encourages further critical reflection on cultural bias in approaches to the subject.

Hierarchy in the Forest Christopher BOEHM, Christopher Boehm, 2009-06-30 Are humans by nature hierarchical or egalitarian? Hierarchy in the Forest addresses this question by examining the evolutionary origins of social and political behavior. Christopher Boehm, an anthropologist whose fieldwork has focused on the political arrangements of human and nonhuman primate groups, postulates that egalitarianism is in effect a hierarchy in which the weak combine forces to dominate the strong. The political flexibility of our species is formidable: we can be quite egalitarian, we can be quite despotic. Hierarchy in the Forest traces the roots of these contradictory traits in chimpanzee, bonobo, gorilla, and early human societies. Boehm looks at the loose group structures of hunter-gatherers, then at tribal segmentation, and finally at present-day governments to see how these conflicting tendencies are reflected. Hierarchy in the Forest claims new territory for biological anthropology and evolutionary biology by extending the domain of these sciences into a crucial aspect of human political and social behavior. This book will be a key document in the study of the evolutionary basis of genuine altruism.

Reviews of this book: This well-written book, geared toward an audience with background in the behavioral and evolutionary sciences but accessible to a broad readership, raises two general questions: What is an egalitarian society, and how have these societies evolved? Christopher Boehm takes the reader on a journey from the Arctic to the Americas, from Australia to Africa, in search of hunter-gatherer and tribal societies that emanate the egalitarian ethos: one that promotes generosity, altruism, and sharing but forbids upstartism, aggression, and egoism. Throughout this journey, Boehm tantalizes the reader with vivid anthropological accounts of ridicule, criticism, ostracism, and even execution—prevalent tactics used by subordinates in egalitarian societies to level the social playing field. Hierarchy in the Forest is an interesting and thought-provoking book that is surely an important contribution to perspectives on human sociality and politics.

Ryan Earley, American Scientist  
Reviews of this book: Combining an exhaustive ethnographic survey of human societies from groups of hunter-gatherers to contemporary residents of the Balkans with a detailed analysis of the behavioral attributes of nonhuman primates (chimpanzees, gorillas, bonobos), Boehm focuses on whether humans are hierarchical or egalitarian by nature. Boehm's hypotheses are invariably intriguing and well-documented. He raises topics of wide interest, and his book should get attention. Publishers Weekly

Boehm has been the first to look at egalitarianism with a cold, unromantic eye. He sees it as a victory over hierarchical tendencies, which are equally marked in our species. I would

predict that his insightful examination will reverberate within anthropology and the social sciences as well as among biologists interested in the evolution of social systems Frans de Waal Emory University Hierarchy in the Forest is an original and stimulating contribution to thinking about the origins of egalitarianism I personally find Boehm's ideas convincing but whether one agrees with him or not he has formulated his hypotheses in such a way that this book is likely to set the terms of the discussion for the foreseeable future Barbara Smuts University of Michigan The most unique and interesting feature of this clear well written book is the way Boehm links the study of nonhuman primates particularly chimpanzees to traditional concepts of political anthropology As a political scientist I was intrigued by Boehm's suggestion that democracy both ancient and modern could be understood as the expression of the same natural dispositions that support the egalitarianism of nomadic bands and sedentary tribes I expect that many scholars in biology anthropology and the social sciences would learn from this stimulating book Even those who disagree with Boehm's arguments are likely to be provoked in instructive ways Larry Arnhart Northern Illinois University Chris Boehm boldly and cogently attacks a whole orthodoxy in anthropology which sees hunter gatherer egalitarianism as somehow the basic form of human society No praise can be too high for Boehm's brilliant and courageous book Robin Fox Rutgers University

*Women as Unseen Characters* Pascale Bonnemère,2013-03-26 Rituals have always been a focus of ethnographies of Melanesia providing a ground for important theorizing in anthropology This is especially true of the male initiation rituals that until recently were held in Papua New Guinea For the most part these rituals have been understood as all male institutions intended to maintain and legitimate male domination Women s exclusion from the forest space where men conducted most such rites has been taken as a sign of their exclusion from the entire ritual process Women as Unseen Characters is the first book to examine the role of females in Papua New Guinea male rituals and the first systematic treatment of this issue for any part of the world In this volume leading Melanesian scholars build on recent ethnographies that show how female kin had roles in male rituals that had previously gone unseen Female seclusion and the enforcement of taboos were crucial elements of the ritual process forms of presence in their own right Contributors here provide detailed accounts of the different kinds of female presence in various Papua New Guinea male rituals When these are restored to the picture the rituals can no longer be interpreted merely as an institution for reproducing male domination but must also be understood as a moment when the whole system of relations binding a male person to his kin is reorganized By dealing with the participation of women a totally neglected dimension of male rituals is added to our understanding

**The Give and Take of Sustainability** Michelle Hegmon,2017-04-24 Sustainability strives to meet the needs of the present without compromising the future but increasingly recognizes the tradeoffs among these many needs Who benefits Who bears the burden How are these difficult decisions made Are people aware of these hard choices This timely volume brings the perspectives of ethnography and archaeology to

bear on these questions by examining case studies from around the world Written especially for this volume the essays by an international team of scholars offer archaeological and ethnographic examples from the southwestern United States the Maya region of Mexico Africa India and the North Atlantic among other regions Collectively they explore the benefits and consequences of growth and development the social costs of ecological sustainability and tensions between food and military security Ku Waru Francesca Merlan, Alan Rumsey, 1991-03-29 The highlanders of New Guinea are renowned for their elaborate systems of ceremonial exchange Although much has been written about them previous accounts have concentrated far less on the conduct of exchange events than on the structure of exchange systems This 1991 book deals centrally with the conduct of particular exchange events and shows through examination of them how larger social structures are reproduced and transformed As part of the emphasis on exchange as social action the book closely examines the oratory that plays a crucial part in the events Basing their study on original fieldwork carried out in the Nebilyer Valley Francesca Merlan and Alan Rumsey focus on an inter related set of large scale compensation payments which arose out of an episode of warfare This book furthers our understanding of the interaction between social structures and historical events and particularly of the crucial role of talk It will be of special interest to anthropologists and linguists The Powerful Presence of the Past Jacqueline Knörr, Wilson Trajano Filho, 2010-10-25 This book conceptualizes integration and conflict as interrelated dimensions of social interaction impacted by specific historical experiences Contributions aim at a better understanding of the social mechanisms affecting processes of integration and conflict at the local national and regional levels

*Peace-Making and the Imagination* Andrew Strathern, Pamela J. Stewart, 2012-07-01 A compelling new book that presents a thoughtful and creative approach to transforming violent discordances this work examines the intractable issues of revenge and restitution in a conflict context It argues that in communities where violence must be paid for through compensation violent conflict can be contained With primary reference to the Highlands of Papua New Guinea and comparisons to cases from Africa Pakistan and other arenas of tribal social formations the account explores how rituals such as wealth disbursement oath taking sacrifice and formal apologies are often used as a means of averting or transcending acts of vengeance after violence Through exploration of the balance between revenge and compensation at different junctures in the peace making process this compelling text devises a thought provoking and inventive analysis that would benefit countless communities in conflict around the world *The Subject of Anthropology* Henrietta L. Moore, 2013-04-23 In this ambitious new book Henrietta Moore draws on anthropology feminism and psychoanalysis to develop an original and provocative theory of gender and of how we become sexed beings Arguing that the Oedipus complex is no longer the fulcrum of debate between anthropology and psychoanalysis she demonstrates how recent theorizing on subjectivity agency and culture has opened up new possibilities for rethinking the relationship between gender sexuality and symbolism Using detailed ethnographic material from Africa and Melanesia to explore the strengths and weaknesses of a range of theories in

anthropology feminism and psychoanalysis Moore advocates an ethics of engagement based on a detailed understanding of the differences and similarities in the ways in which local communities and western scholars have imaginatively deployed the power of sexual difference She demonstrates the importance of ethnographic listening of focused attention to people's imaginations and of how this illuminates different facets of complex theoretical issues and human conundrums Written not just for professional scholars and for students but for anyone with a serious interest in how gender and sexuality are conceptualized and experienced this book is the most powerful and persuasive assessment to date of what anthropology has to contribute to these debates now and in the future

Resolving a decades long divide between what are often held to be incommensurate paradigms *Social Bonding and Nurture Kinship* unites cultural and biological approaches to social life and kinship The synthesis is non reductive respecting the core tenets of both paradigms and also incorporates psychological attachment theory into the account Praised by adherents of both perspectives the work provides a thorough survey of the theoretical debates and empirical findings across a wide array of disciplines providing students of social behaviour and kinship with a rich and comprehensive resource This work is a powerful example of how social and physical sciences can unite on equal terms without the danger of one being subsumed by the other Both approaches emerge stronger as a result
