Takamatsu Killing Moon:

Takamatsu Killing Moon Takamatsu,1998-12-31 *Architecture for a Free Subjectivity* Dr Simone Brott,2013-06-28 Architecture for a Free Subjectivity reformulates the French philosopher Gilles Deleuze's model of subjectivity for architecture by surveying the prolific effects of architectural encounter and the spaces that figure in them For Deleuze and his Lacanian collaborator Félix Guattari subjectivity does not refer to a person but to the potential for and event of matter becoming subject and the myriad ways for this to take place By extension this book theorizes architecture as a self-actuating or creative agency for the liberation of purely impersonal effects Imagine a chemical reaction a riot in the banlieues indeed a walk through a city Simone Brott declares that the architectural object does not merely take part in the production of subjectivity but that it constitutes its own This book is to date the only attempt to develop Deleuze's philosophy of subjectivity in singularly architectural terms Through a screening of modern and postmodern American and European works this provocative volume draws the reader into a close encounter with architectural interiors film scenes and other arrangements while interrogating the discourses of subjectivity surrounding them and the evacuation of the subject in the contemporary discussion The impersonal effects of architecture radically changes the methodology just as it reimagines architectural subjectivity for the twenty first century **Responding to Chaos** David N Buck,2014-04-04 A celebration of a unique culture and its experience of design this sensitive text is a timely examination of Japanese design at the start of a new century The country's economic boom in the 1980s produced a surge of interest in land and building and consequently in design in all its forms From restaurant interiors to products from private housing to recreational spaces design received an unprecedented degree of attention However the bursting in the early 1990s of this so called bubble economy has prompted a re-examination of design and its role in urban society **AA Files** ,1989 田口雄一 ,1986 田口雄一 ,1993 **Felix Guattari** Gary Genosko,2002-08-01 This is the first detailed assessment of the life and work of Felix Guattari Mr Anti as the French press labelled him the friend of and collaborator with Gilles Deleuze Jacques Lacan and Antonio Negri and one of the 20th Century's last great activist intellectuals Guattari is widely known for his celebrated writings with Deleuze but these writings do not represent the true breadth and impact of his thinking writing and activism Guattari's major work as a clinical and theoretical innovator in psychoanalysis was closely linked to his participation in struggles against European right wing politics Felix Guattari introduces the reader to the diversity and sheer range of Guattari's interests from anti psychiatry to Japanese culture political activism and his theorizing of subjectification Highlighting why Guattari's work is of increasing relevance to contemporary political psychoanalytical and philosophical thought Felix Guattari An Aberrant Introduction presents the reader with an adventurous and provocative introduction to this radical thinker **The Architect's Dream** Sean Pickersgill,2023-09-29 Sean Pickersgill demonstrates that the goal of creating meaningful architecture can take a variety of critical and philosophical paths The importance of architecture as an expression of broad complex social drivers is

complemented by the equally popular idea that architecture as an intellectual pursuit retains its own autonomy as a self referential culture This book uniquely places the emphasis for innovation in architecture within the domain of critical thinking generally and a specific understanding of the semantics of built form The book draws on a broad range of subject areas from film to philosophy to anthropology to mathematics and economics to show that the path to meaningful creative practice is always based in an understanding of the principal drivers for change and meaning in society It is not a simple recipe book or workshop manual for others to reproduce It requires the engaged reader to employ their own creative abilities to find what potential lies in each of the propositions and it will encourage the scholastic architect to continue to mine the rich veins of intellectual culture to demonstrate the latent purposiveness inherent in all meaningful architecture EAR,1994 **Transfiguration** ,1989 **Envisioning Architecture** Iain Fraser,Rod Henmi,1993-12-16 Examples of world renowned masters of architecture are used in this enlightening book that explores the why of architectural drawing rather than the how By emphasizing the value of drawing over technique the authors demonstrate how the drawing itself influences the designer s processes of thought and exerts its own pull on the evolution of the concept **Shin Takamatsu** Anthony G. White,1990 **The Killing Moon and Other Projects** Shin Takamatsu,1988-01-01 **The Idea of the City** Robin Middleton,Architectural Association (Great Britain),1996 This tribute to the late Alvin Boyarsky Chairman of the Architectural Association School of Architecture in London from 1971 to 1990 offers insights into the city by a roster of leading architects from the United States Australia and Europe in the form of visual projects analytical essays on **The Architects' Journal** ,1990 *Shinkenchiku* ,1987 New Publications for Architecture Libraries ,1989 **Architecture Series: Bibliography** ,1990 **Avery Index to Architectural Periodicals. 2d Ed., Rev. and Enl** Avery Library,1986 *Design Without Boundaries* Rick Poynor,1998 On graphic communication
