Art in Consumer Culture Grace McQuilten, 2017-07-05 Written with beautiful clarity Art in Consumer Culture Mis Design asks the contemporary art world to be honest about the pervasive effects of commodification and the difficulty of staging critique The book examines the collusion of art and design in contemporary artistic practices in order to find avenues of critique in a commercially driven cultural landscape Grace McQuilten focuses on the work of Takashi Murakami Andrea Zittel Adam Kalkin and Vito Acconci four contemporary artists who claim to be working in the field of design rather than the traditional art world McQuilten argues that Zittel Acconci and Kalkin engage with design only to reactivate the critical practice of art in a more direct engagement with capital and conceives of and affirms a future for art outside of the art world as a parasite in the complex beast of late capitalism This book is an important and timely provocation to a cynical and apathetic consumer culture and a call to arms for creative freedom and critical thought

The Ends of History Amy Swiffen, Joshua Nichols, 2013-05-02 The Ends of History considers how despite the fact that events in the past 20 years have called Francis Fukuyama's infamous announcement of the end of history into question the issue of the end of history is now a matter of renewed interest and debate Two decades ago we were confronted by the end of the Soviet Union and collapse of the geo political divisions that had defined much of the twentieth century From this particular end the end of history was proclaimed But is it still possible to argue that liberal democracy and free market capitalism are the final form of law and mode of production in human history Recent events have called this thesis into question from 9 11 and the War on

Terror to the current global economic collapse and looming ecological crises it seems that history is far from over. And yet oddly enough the question of the end has returned. For example in the often predicted but still uncertain establishment of either a new international American Empire or a new era of International Law and the global resurgence of religion as a dominant source of political identification. On the other hand perhaps the end is still yet to come slowly accumulating mustering at the periphery of the geo political landscape and outside the productive sphere. Responses taking up these questions range from a return to Universalism political theology Messianism and even the old specter of communism. This volume assesses these responses exploring what is at stake in proclaiming the end in the current historical moment. Is it a matter of reading the writing on the wall. Or is the proclamation itself a political act. Furthermore is there a desire for the end. In addressing these questions the contributors to *The Ends of History* confront the various ends that we now live and in so doing they open new lines of sight into the future.

Tokyo Phantasmagoria Kenny Loui, 2008. As the sun set on the 20th century a new age dawned in Japan. This new era symbolized by the postmodern city of Tokyo has ushered in not only technological innovation and economic prowess but changing attitudes and values among Japanese young people. This transformation is not an uncommon or even new phenomenon but simply the result of modern life. And one of the symptoms of modernity is the prevalence of an ethics of materialism the ever increasing concern for the acquisition of wealth and commodity goods sometimes at the expense of the concern for human life itself. Walter Benjamin 1892-1940 was a German Jewish philosopher whose writings examined topics including but not limited to art history and politics. His life's work published posthumously as *The Arcades Project* is a literary montage combining excerpts from written works related to life in 19th century Paris and Benjamin's own commentaries and reflections. Benjamin's project on Paris of the 19th century foreshadows what is now occurring in 21st century Tokyo and Japan in general. Like the Paris of yesteryear life in modern Tokyo is essentially a dream image that warps people's perception of the world in which they live. The public thus finds itself trapped in what Benjamin refers to as the phantasmagoria an illusory reality of a relatively flawless society. But this phantasmagoria shrouds the grotesqueness of underlying truths such as the failure of advances in science and philosophy to eradicate poverty discrimination and other social inequities. Drawing from a selection of Benjamin's writings including *The Arcades Project* this thesis explores the social consequences as well as the political implications of the rise of commodity capitalism in modern Japan concluding with a discussion on how political action can re-humanize a citizenry that has been commodified by their materialistic desires. Walter Benjamin wrote about a past generation while appealing to his own and as this discourse on the *Tokyo Phantasmagoria* will reveal Benjamin appeals to our generation as well.
