works in early reading materials Ana Robledo,Amber Gove,2019-02-25 Access to books is key to learning to read and
sustaining a love of reading Yet many low and middle income countries struggle to provide their students with reading
materials of sufficient quality and quantity Since 2008 RTI International has provided technical assistance in early reading
assessment and instruction to ministries of education in dozens of low and middle income countries The central objective of
many of these programs has been to improve learning outcomes in particular reading for students in the early grades of
primary school Under these programs RTI has partnered with ministry staff to produce and distribute evidence based
instructional materials at a regional or national scale in quantities that increase the likelihood that children will have ample
opportunities to practice reading skills and at a cost that can be sustained in the long term by the education system In this
paper we seek to capture the practices RTI has developed and refined over the last decade particularly in response to the
challenges inherent in contexts with high linguistic diversity and low operational capacity for producing and distributing
instructional materials These practices constitute our approach to developing and producing instructional materials for early
grade literacy We also touch upon effective planning for printing and distribution procurement but we do not consider the
printing and distribution processes in depth in this paper We expect this volume will be useful for donors policymakers and
practitioners interested in improving access to cost effective high quality teaching and learning materials for the early grades
