Russia's economic system are offered and the specifics of the problem of socio-economic differentiation of the Russian population in the conditions of technological progress are shown. Based on this it is proved that the digital economy has a contradictory influence on society: increasing the accessibility of goods and services in particular hi-tech ones but also causing an urgent need for adapting to the new economic conditions. This adaptation is largely determined by capabilities of people: flexibility of their thinking and ability for learning and development. Thus instead of the expected provision of balance of society its disproportions could grow in practice. Also specific features of regional migration in modern Russia in the context of digitization are determined. The role of emotional intellect in formation of the critical thinking of a company's employees is outlined. Due to this it is shown that so-called human factor which is traditionally treated as a source of economic risks and costs acquires a new role in the conditions of the digital economy: a source of value creation and reduction of risks of technological progress due to justified opposition to unfavorable changes. Informal labor relations based on digital communications as the highest form of evolution of these relations that is achieved in the conditions of Industry 4.0 is considered. The central role of higher education in the process of social adaptation to the conditions of Industry 4.0 is outlined. The economic and legal issues of the digital economy are considered in particular the issue of democracy in the digital society in the conditions of e-government.

*The Decalogue and a Human Future* Paul L. Lehmann, 2002-03-15. An important book for theology, ethics and the church. James H. Cone. This book displays all the depth, penetrating insight and clarity of thinking that have become the hallmarks of Lehmann's writing. It mercilessly and wonderfully exposes the superficiality and frivolousness of many of the arguments surrounding the Decalogue. Theologically instructive, intellectually satisfying and spiritually uplifting. Allan Boesak. Paul Lehmann was one of the greatest of America's Christian ethicists and one of its most influential teachers. His work has had a profound impact on many persons, especially pastors and lay folk. This final work brings him back to some of his major themes: the relation of the gospel and law, the commitment to a truly human life in this world that is shaped by God's just and loving activity in Jesus Christ, and the need for the gift of discernment to see what it is that makes and keeps human life human. One does not expect to hear much that is fresh on such worked-over moral issues as abortion and homosexuality, but in these pages Lehmann makes us think afresh and challenges us even on those familiar topics. It is sad to think that we shall hear no more from this deeply Christian and moral thinker. Patrick D. Miller, Princeton Theological Seminary. This is vintage Lehmann. His koinonia ethic continues to make enormous sense, not least in South Africa and other transitional situations where people are seeking moral discernment amid complexity and ambiguity in the quest for social justice. This book's development of Lehmann's ethic around the Ten Commandments makes it more than a textbook for students. It is a book for pastors, the laity and the general public. It is also a wonderful culmination to the work of a great theologian. Charles Villa-Vicencio, University of Cape Town, South Africa.
