The Hunger Crop Poverty And The Sugar Industry:

The Hunger Crop Belinda Coote, 1987 *The Mediality of Sugar*, 2022-10-24 The Mediality of Sugar probes the potential of reading sugar as a mediator across some of the disciplinary distinctions in early twenty first century research in the arts literature architecture and popular culture Selected artistic practices and material cultures of sugar across Europe and the Americas from the sixteenth to the twenty first century are investigated and connected to the transcontinental and transoceanic history of the sugar plants cane and beet their botanical and cultural dissemination and global sugar capital and trade under colonialism and in decoloniality The collection contributes to the vision of a Transnational and Postdisciplinary Sugar Studies **The Visionary Realism of German Economics** Erik S. Reinert, 2019-02-15 The Visionary Realism of German Economics forms a collection of Erik S Reinert s essays bringing the more realistic German economic tradition into focus as an alternative to Anglo Saxon neoclassical mainstream economics Together the essays form a holistic theory explaining why economic development by its very nature is a very uneven process Herein lie the important policy implications of the volume *The Political Economy of the Sugar Industry in Zimbabwe, 1920-90* A. S. Mlambo, E. S. Pangeti, 1996 **Resource Sustainability and Caribbean Development** Duncan F. M. McGregor, David Barker, Sally Lloyd-Evans, 1998 Resource Sustainability and Caribbean Development follows on from Barker and McGregor s earlier edited volume Environment and Development in the Caribbean Geographical Perspectives 1995 and aims to focus more specifically on the theme of sustainability and to examine research contributions of geographers to problems of sustainability in the Caribbean region While the problems of environmental degradation have increased in recent decades the ability of Caribbean governments to cope with the consequences appears to have been eroded There is however a growing recognition within the region of the need for development strategies that focus on the social needs of the people yet simultaneously protect the fragile natural environment It is hoped that the research presented here will serve to inform the wider research and decision making community of the main problems associated with resource sustainability in the region and of some of the major research directions crucial to the alleviation of these problems Preface **The Other Canon of Economics, Volume 1** Erik Reinert, 2024-02-13 Other Canon Economics Essays in the Theory and History of Uneven Economic Development brings together key essays on development economics from one of the most prolific and important development economists and historians of economic policy today Erik S Reinert argues through essays ranging from 1994 to 2020 that neo classical economics damages developing countries the theory of comparative advantage leaves out a number of factors which make economic activities qualitatively different as carriers of economic growth Based on a long intellectual tradition started by the Italian economists Giovanni Botero 1589 and Antonio Serra 1613 and later used in virtually all presently industrialised countries Reinert shows that the country which exports increasing returns goods e g high end manufacture has advantages over the country which exports diminishing returns goods e g commodities This has important implications for today s

development strategies that Reinert argues should be seen as industrial strategies The Condition of Sustainability Ian Drummond, Terry Marsden, 2005-06-23 This book examines the political economy of sustainable development The authors consider why most approaches to sustainable development have proved inadequate Bringing together key ideas from social theory food regimes and sustainability debates the book presents a new and more dynamic way of thinking about sustainable development and a methodology for applying these ideas Case study material focuses on the food system particularly the sugar industry in Australia and Barbados King Sugar Michele Harrison, 2001-08 What is life like on a sugar plantation at the end of the twentieth century What will happen if the sugar industry collapses How do the poverty stricken cane cutters of rural Jamaica fit into the global economy And how does sugar make its way from the canefield to our kitchens The Caribbean's history is inseparable from sugar In Jamaica entire communities depend on the sugar industry earning a precarious living on old fashioned plantations For many the crop even doubles as currency But as the advanced nations reassess the economic policies that keep sugar alive time is running out for the island's industry King Sugar looks at the world sugar business identifying the key players producers markets and transnational companies and explaining how the industry works It explores the economics and politics of trading agreements the mysteries of the futures market and the technology of sugar production Based on interviews with traders buyers and producers it provides a unique look at the history of this commodity King Sugar also looks in detail at how ordinary people fit into this global industry Through interviews with workers on a plantation she provides a vivid picture of producers and the crises they face The book finally assesses the future of sugar both in Jamaica and the wider world and considers the options for those still ruled by King Sugar Gender and Rural Globalization Jose Quero-Garcia, Amy Iezzoni, Joanna Pulawska, Gregory A Lang, 2017-08-11 This book explores how rural gender relations are changing in a globalizing world that fundamentally impacts on the structure of agricultural life in rural areas and urban rural relations It analyses the development of rural gender relations in specific places around the world and looks into the effects of the increasing connectivity and mobility of people across places The themes covered are gender and mobility gender and agriculture Gender and rural politics rurality and Gender identity and women and international development Each theme has an overview of the state of the art in that specific thematic area and integrates the case studies that follow *Sweet and Sour* Karen Frances, 2000 **Sugar** Elizabeth Abbott, 2011-09-27 This dramatic history of an ingredient that changed the world offers up a number of fascinating stories The New York Times Book Review Sugar explores the history behind the sweetness revealing among other stories how powerful American interests deposed Queen Lili uokalani of Hawaii how Hitler tried to ensure a steady supply of beet sugar when enemies threatened to cut off Germany's supply of overseas cane sugar and how South Africa established a domestic ethanol industry in the wake of anti apartheid sugar embargos The book follows the role of sugar in world events and in individual lives up to the present day showing how it made eating on the run socially acceptable and played an integral role in today's fast food culture and obesity epidemic Impressively researched and

commandingly written *Sugar* will forever change perceptions of this tempting treat A highly readable and comprehensive study of a remarkable product The Independent Epic in ambition and briskly written The Wall Street Journal Readers will never again be able to casually sweeten tea or eat sweets without considering the long and fascinating history of sugar

Booklist [Food Fights \(Routledge Revivals\)](#) , **Biological Diversity** Paul E. Hatcher,Nick Battey,2011-03-23 Biological Diversity takes a fresh innovative approach to the teaching of biodiversity Rather than detailing and cataloguing the major taxa and their evolutionary relationships the authors have selected 18 groups of organisms and used these as a framework in which to discuss the species and their interactions with man and each other There is a strong narrative theme throughout the exploited and the exploiters and in many cases there is emphasis on the historical context A wide range of organisms are covered from the unicellular to birds and mammals and with an equal consideration of plants and animals Species have been chosen for their ability to best illustrate particular biological principles and for their strong interaction with other species After an introduction the book is divided into two parts Exploited and Exploiters Each of the chapters although linked to each other forms a stand alone essay They are scientifically rigorous up to date and do not shy away from addressing some controversial issues Chapters have text boxes highlighting important issues and concepts lists of further reading and references In addition to tables and figures the book has a selection of original illustrations drawn by leading artist Steven Appleby This fresh approach will appeal to all those interested in the biological sciences and aims to be accessible to people with a diversity of backgrounds It will prove particularly useful to biology students enabling them to get to grips with important biological principles and concepts that underpin the diversity of life and the interrelationship of humans with other groups of organisms

The Global South and Literature Russell West-Pavlov,2018-03-08 The Global South has largely supplanted the Third World in discussions of development studies postcolonial studies world literature and comparative literature respectively The concept registers a new set of relationships between nations of the once colonized world as their connections to nations of the North diminish in significance Such relationships register particularly clearly in contemporary cultural theory and literary production The Global South and Literature explores the historical cultural and literary applications of the term for twenty first century flows of transnational cultural influence tracing their manifestations across the Global Southern traditions of Africa Asia and Latin America This collection of interdisciplinary contributions examines the origins development and applications of this emergent term employed at the nexus of the critical social sciences and developments in literary humanities and cultural studies This book will be a key resource for students graduates and researchers working in the field of postcolonial studies and world literature

Agriculture International ,1987 [The Philippines](#) James K. Boyce,1993-07-01 This book analyzes the Philippine economy from the 1960s to the 1980s During this period the benefits of economic growth conspicuously failed to trickle down Despite rising per capita income broad sectors of the Filipino population experienced deepening poverty Professor Boyce traces this outcome to the country s economic and

political structure and focuses on three elements of the government's development strategy: the green revolution in rice agriculture, the primacy accorded to export agriculture and forestry, and massive external borrowing. James Boyce is the author of *Agrarian Impasse in Bengal* and co-author of *A Quiet Violence View from a Bangladesh Village*. *Abstracts on Rural Development in the Tropics*, 1993

Living in History Luke Roberts, 2024-05-31 Challenging received ideas about the British Poetry Revival, Luke Roberts presents a new account of experimental poetry and literary activism. Drawing on a wide range of contexts and traditions, *Living in History* begins by examining the legacies of empire and exile in the work of Kamau Brathwaite, J. H. Prynne, and poets associated with the Communist Party and the African National Congress. It then focuses on the work of Linton Kwesi Johnson, Denise Riley, Anna Mendelssohn, and others in the development of liberation struggles around gender, race, and sexuality across the 1970s. Tracking the ambivalence between poetic ambition and political commitment, and how one sometimes interferes with the other, Luke Roberts troubles the exclusions of British Poetry as a category and tests the claims made on behalf of avant-garde and experimental poetics against the historical record. Bringing together both major and neglected authorships and offering extended close readings, fresh archival research, and new contextual evidence, *Living in History* is an ambitious and exciting intervention in the field.

The Illusion of Progress Alexander Gillespie, 2014-10-14 Is sustainable development a charade sold to an increasingly misled public? This book presents a wide-ranging, penetrating critique of sustainability and what it actually means. The author argues that despite the rhetoric of socially and environmentally sustainable development, and the ever-increasing number of legislative environmental policies, the real issues such as consumption, population growth, and equity are either sidestepped or manipulated in international policy and law. Analyzing the main areas of concern—economic growth, market structure, trade, aid, debt, security, and sovereignty—he shows that the entire development structure and the underpinnings of the debate are leading down quite a different path to that intended by sustainability.

Choosing Our Future Ann Taylor, 2024-06-28 First Published in 1992, *Choosing Our Future* presents a personal but highly rigorous account of the environmental problems facing us and of the ways in which they can be tackled. Ann Taylor's approach centres on the traditional values of democratic socialism, establishing their inherent compatibility with modern concerns of sustainable economic development and environmental protection. She argues that people and planet are interdependent and that ensuring a balance between the needs of both is the historic role of the Labour Party. Lucid and topical, this book will appeal to anyone who is interested in realistic, hard-headed solutions to environmental problems. It will be of interest to general readers and to members of the Labour movement, environmentalists, and professionals in environmental management and regulation. It will also be useful to students of politics and development.
