The Hurried Child Growing Up Too Fast Too Soon By Elkind David:

The Hurried Child David Elkind, 2010-09-07 With the first edition of *The Hurried Child* David Elkind emerged as the voice of parenting reason calling our attention to the crippling effects of hurrying our children through life. He showed that by blurring the boundaries of what is age appropriate by expecting or imposing too much too soon we force our kids to grow up too fast to mimic adult sophistication while secretly yearning for innocence. In the more than two decades since this book first appeared new generations of parents have inadvertently stepped up the assault on childhood in the media in schools and at home. In the third edition of this classic 2001 Dr Elkind provided a detailed up to the minute look at the Internet classroom culture school violence movies television and a growing societal incivility to show parents and teachers where hurrying occurs and why. And as before he offered parents and teachers insight advice and hope for encouraging healthy development while protecting the joy and freedom of childhood. In this twenty fifth anniversary edition of the book Dr Elkind delivers important new commentary to put a quarter century of trends and change into perspective for parents today.

The Commodification of Childhood Daniel Thomas Cook, 2004-04-20 Through a study of industry publications over much of the century shows how the U S children's clothing industry produced increasingly refined categories of childhood.

Ways of Being in Literary and Cultural Spaces Leo Loveday, Emilia Parpală, 2016-09-23 In accordance with the notion that identity is absolutely central to ontological and discursive practices this volume explores a multiplicity of ways of being including the adoption of an ethnic position the enactment of gender the conception of childhood and artistic visions of urban life in addition to other pivotal modes of existence. Beyond discourses of identity featured in the first section of this work ways of performing identity in literature are brought to light in the second half through studies into for instance the roles of enunciator and reader the depiction of villainy and the portrayal of rebellious victimhood. Integrating research from Great Britain Bulgaria Iraq Japan Romania Spain and Ukraine this collection of fifteen chapters offers innovative and inspiring insights from a comparative stance into the complex dynamics and parameters which govern the construction of identity in cultural and literary space.

Role of Media in Nation Building Anand Shanker Singh, 2016-09-23 The concept of nation building is a multi dimensional process addressing various components simultaneously. It takes into account the various historical and geographical perspectives of the country in question noting the peculiarities and diversity of its cultural ethos including its social economic and political structures. This volume addresses these inter linked aspects and the innovative development of these structures and institutions. However such changes and development must be directed to create a more culturally homogenous and productive society so that basic human needs like food shelter healthcare and education are fulfilled at the optimum level. All round development and growth for the nation can be achieved only with a robust economy and political stability. As such the process of nation building and development is a multifaceted phenomenon. In the context of India this process is associated with the central values embodied in the preamble of the country's constitution which

advocates for the establishment of secular socialist and democratic society based on well defined fundamental rights This anthology reflects these academic spirits and vistas
