*Rolls-Royce: The Magic of a Name* Peter Pugh, 2015-10-01 The Magic of a Name tells the story of the first forty years of Britain's most prestigious manufacturer Rolls Royce Beginning with the historic meeting in 1904 of Henry Royce and C S Rolls and the birth in 1906 of the legendary Silver Ghost Peter Pugh tells a story of genius skill and dedication that gave the world cars and aeroengines unrivalled in their excellence In 1915 100 years ago Royce produced the first of many aero engines the Eagle which proved itself in battle in the First World War Twenty five years later the totemic Merlin was installed in the Spitfire and built in a race against time to help win the Battle of Britain With unrivalled access to the company's archives this is a unique portrait of both an iconic name and of British industry at its best      Rolls-Royce I. *Sir Henry Royce* Peter Reese, 2022-05-12 It's hard to imagine a history of British engineering without Rolls Royce there would be no Silver Ghost no Merlin for the Spitfire no Alcock and Brown Rolls Royce is one of the most recognisable brands in the world But what of the man who designed them The youngest of five children Frederick Henry Royce was born into almost Dickensian circumstances the family business failed by the time he was 4 his father died in a Greenwich poorhouse when he was 9 and he only managed two fragmented years of formal schooling But he made all of it count In *Sir Henry Royce* Establishing Rolls Royce from Motor Cars to Aero Engines acclaimed aeronautical historian Peter Reese explores the life of an almost forgotten genius from his humble beginnings to his greatest achievements Impeccably researched and featuring almost 100 illustrations this is the remarkable story of British success on a global stage      **The Birth of Military Aviation**

Hugh Driver, 1997 A survey of the development of British military aviation from 1903 to 1914 revealing the consequences of its annexation by the state as a branch of armaments as an underlying cause of aircraft inadequacies on the outbreak of war A mine of information drawing on an impressive range of archives It will become an important point of reference ENGLISH HISTORICAL REVIEW This book aims to demonstrate how the crisis evident in British military aviation in the early years of the First World War was inherent in the entire development of aviation in the years preceding the conflict After outlining the work of the early pioneers and the growth of an aviation industry as a branch of armaments Dr Driver considers the

objectives of the War Office in increasingly seeking to divert design development to their research establishment at Farnborough. He shows how the resultant virtual state monopoly in design and procurement had disastrous consequences for aircraft innovation and development, suffocating both competition and initiative and leading to the maintenance of inadequate aircraft by the Royal Flying Corps following the outbreak of war. The continuing dispute and its culmination in the Fokker Scourge controversy of 1915-1916 graphically characterise the strained development of military industrial relations in this area. Dr HUGH DRIVER gained an MA in War Studies from King's College London and a D Phil in modern history at Oriel College Oxford.

*The Life of the Automobile* Steven Parissien, 2014-05-13. *The Life of the Automobile* is the first comprehensive world history of the car. The automobile has arguably shaped the modern era more profoundly than any other human invention and author Steven Parissien examines the impact, development and significance of the automobile over its turbulent and colorful 130-year history. Readers learn the grand and turbulent history of the motor car from its earliest appearance in the 1880s as little more than a powered quadricycle and the innovations of the early pioneer carmakers. The author examines the advances of the interwar era, the Golden Age of the 1950s and the iconic years of the 1960s to the decades of doubt and uncertainty following the oil crisis of 1973, the global mergers of the 1990s, the bailouts of the early twenty-first century and the emergence of the electric car. This is not just a story of horsepower and performance but a tale of extraordinary people, of intuitive carmakers such as Karl Benz, Sir Henry Royce, Giovanni Agnelli, Fiat, André Citroën and Louis Renault, of exceptionally gifted designers such as the eccentric Ohio-born Chris Bangle, BMW, and of visionary industrialists such as Henry Ford, Ferdinand Porsche, the Volkswagen Beetle and Gene Bordinat, the Ford Mustang among numerous other game-changers. Above all, this comprehensive history demonstrates how the epic story of the car mirrors the history of the modern era from the brave hopes and soaring ambitions of the early twentieth century to the cynicism and ecological concerns of a century later. Bringing to life the flamboyant entrepreneurs, shrewd businessmen and gifted engineers that worked behind the scenes to bring us horsepower and performance, *The Life of the Automobile* is a globe-spanning account of the auto industry that is sure to rev the engines of entrepreneurs and gearheads alike.

**Rolls-Royce Motor Cars, 1903-1969**, 1969

*Rolls-Royce and Bentley* Malcolm Bobbitt, 2024-11-28. In 1998, Rolls-Royce celebrated the 60th anniversary of the opening of its Crewe factory, the home of the company's car production since World War II. This illustrated history celebrates Rolls-Royce and Bentley cars and the company that produced them. Motoring writer Malcolm Bobbitt has brought together a varied collection of photos to create this visual account. The text explains the move of the company's car production from Derby to Crewe just after the war and takes the story through the successful 1950s and 1960s. He recalls the near bankruptcy of the company in the 1970s and its subsequent recovery and finishes with a description of the company and its cars today in light of the 1998 sale to Volkswagen and the acquisition of the Rolls-Royce name by BMW. The author concentrates on the

evolution of the characteristic models the Bentley Mk VI and the R Types the Silver Wraith and Silver Dawn the Silver Cloud and Silver Shadow and Silver Spirit and he looks at the recent revival of the Bentley marque which recaptures the spirit of the cars pre war sporting history The book also remembers the notable individuals who played a vital part in the creation of these famous vehicles and it describes the company s organization and its meticulous methods of design testing and construction
