Conflicts of Interest and Complexity in the Context of Organizational Communication Timo Lenk,2025-08-26 Conflicts of interest and competing demands are a defining feature of complex rapidly changing societies They shape all forms of organizations which are confronted both internally and externally with a multitude of heterogeneous and often incompatible interests and expectations For example companies are expected to become climate neutral while remaining profit oriented politics must drive societal transformation without jeopardizing prosperity and jobs and NGOs operate within the context of conflicting geopolitical interests Drawing on paradox perspectives in organizational research and employing complexity theory and assemblage theory this study explores the social complexity of such conflicts of interest and competing demands The focus lies on organizational communication Through international and interdisciplinary references the study reveals the diversity and multidimensionality of these contradictions Exploratory expert interviews with consultants provide insights into concrete conflicts of interest as well as the intricate tensions that arise for organizations The resulting model is an assemblage theory

of contradictions The Hubris Hazard, and How to Avoid It Eugene Sadler-Smith, 2024-03-15 Hubris is something we've all seen in action and experienced all too often. It's a significant occupational hazard and a serious potential derailment factor for leaders, organisations and civil society. Hubristic leaders, intoxicated as they are with power, praise and success, behave in ways that if left unchecked invite unintended and unforeseen negative consequences which impact destructively on individuals, industries, economies and nations. Despite numerous examples throughout history of hubris destructive consequences, it nonetheless appears to be an ever-present and growing danger. Many leaders seem to be blind to the hazards of hubris and oblivious to the lessons of history. Prevention is better than cure, and understanding the nature of the hubris hazard and the associated risk factors will help leaders and managers improve their personal performance and avoid derailment and even more importantly protect the well-being of employees and the resilience of their organisations over the long term. This book explains the characteristics, causes and consequences of hubris and shows how to combat the significant hazard it poses to managers, leaders, organisations and society. With contemporary examples, each chapter explores a particular hubris risk factor and shows how the risk can be managed and mitigated and exposure to the hubris hazard minimised. The Hubris Hazard and How to Avoid It offers practical guidance and action points for managers and leaders on how to recognise hubris in themselves and others and what to do to combat it when it arises. It will also be useful for business and executive coaches and leadership trainers and developers. Hubristic Leadership Eugene Sadler-Smith, 2018-10-27 Investigating the societal, economic, financial and reputational costs of hubristic leadership with insights into the characteristics and causes of this phenomenon and recommended safeguards to avoid hubris from happening in the first place. As research into hubristic leadership becomes increasingly popular following recent political developments, the book adopts an interdisciplinary approach to investigating this form of leadership. Outlining what causes hubristic leadership in the first place, the author looks at how its potentially destructive consequences can be anticipated and avoided through an informed stance of moderation, critical analysis and reflexivity. Examples are drawn from business and politics, including the Lehmann Brothers, BP and Deepwater Horizon, Blair and Bush in the Iraq Invasion, NASA and Donald Trump. Ideal reading for undergraduate and postgraduate students in business and management, leadership and organizational behaviour.
