The Oxford History of Life Writing: Volume 2. Early Modern Alan Stewart,2018-05-10 The Oxford History of Life Writing Volume2 Early Modern explores life writing in England between 1500 and 1700 and argues that this was a period which saw remarkable innovations in biography autobiography and diary keeping that laid the foundations for our modern life writing The challenges wrought by the upheavals and the sixteenth century English Reformation and seventeenth century Civil Wars moulded British and early American life writing in unique and lasting ways While classical and medieval models continued to exercise considerable influence new forms began to challenge them The English Reformation banished the saints lives that dominated the writings of medieval Catholicism only to replace them with new lives of Protestant martyrs Novel forms of self accounting came into existence from the daily moral self accounting dictated by strands of Calvinism to the daily financial self accounting modelled on the new double entry book keeping This volume shows how the most ostensibly private journals were circulated to build godly communities how women found new modes of recording and understanding their disrupted lives how men started to compartmentalize their lives for public and private consumption The volume doesn t intend to present a strict chronological progression from the medieval to the modern nor to suggest the triumphant rise of the fact based historical biography Instead it portrays early modern England as a site of multiple sometimes conflicting possibilities for life writing all of which have something to teach us about how the period understood both the concept of a life and what it mean to write a life

Life Cycles in England 1560-1720 Mary Abbott,2020-09-23 This book plots the human career in England between 1560 and 1720 from birth to old age It provides a collection of extracts from texts written in the period as well as collection of photographs of images and artefacts made in England between the period

A Short History of Medical Ethics Albert R. Jonsen,2000 A physician says I have an ethical obligation never to cause the death of a patient another responds My ethical obligation is to relieve pain even if the patient dies The current argument over the role of physicians in assisting patients to die constantly refers to the ethical duties of the profession References to the Hippocratic Oath are often heard Many modern problems from assisted suicide to accessible health care raise questions about the traditional ethics of medicine and the medical profession However few know what the traditional ethics are and how they came into being This book provides a brief tour of the complex story of medical ethics evolved over centuries in both Western and Eastern culture It sets this story in the social and cultural contexts in which the work of healing was practiced and suggests that behind the many different perceptions about the ethical duties of physicians certain themes appear constantly and may be relevant to modern debates The book begins with the Hippocratic medicine of ancient Greece moves through the Middle Ages Renaissance and Enlightenment in Europe and the long history

Lynne Bradley, 2016-03-16 Questioning whether the impulse to adapt Shakespeare has changed over time Lynne Bradley argues for restoring a sense of historicity to the study of adaptation Bradley compares Nahum Tate's History of King Lear 1681 adaptations by David Garrick in the mid eighteenth century and nineteenth century Shakespeare burlesques to twentieth century theatrical rewritings of King Lear and suggests latter day adaptations should be viewed as a unique genre that allows playwrights to express modern subject positions with regard to their literary heritage while also participating in broader debates about art and society In identifying and relocating different adaptive gestures within this historical framework Bradley explores the link between the critical and the creative in the history of Shakespearean adaptation Focusing on works such as Gordon Bottomley's King Lear's Wife 1913 Edward Bond's Lear 1971 Howard Barker's Seven Lears 1989 and the Women's Theatre Group's Lear's Daughters 1987 Bradley theorizes that modern rewritings of Shakespeare constitute a new type of textual interaction based on a simultaneous double gesture of collaboration and rejection She suggests that this new interaction provides constituent groups such as the feminist collective who wrote Lear's Daughters a strategy to acknowledge their debt to Shakespeare while writing against the traditional and negative representations of femininity they see reflected in his plays
