The Improvement of the Estate Alistair M. Duckworth, 2020-03-24 Originally published in 1994 In *The Improvement of the Estate* Alistair Duckworth contends that understanding *Mansfield Park* is fundamental to appreciating Jane Austen's body of work Professor Duckworth understands *Mansfield Park* as underscoring the central uniting theme in Austen's work her concept of the estate and its improvement The author illustrates Austen's connection to the values of Christian humanism which she conveys through the uniting theme of estate improvement According to Duckworth the estate represents moral and social heritage so the manner in which individuals seek to improve their estates in Jane Austen's novels represents the direction in which she saw the state and society moving Finally Duckworth underscores Austen's awareness of the importance of a society of individuals whose behavior is socially informed

Revelations shows that the nonhuman is fundamental to Romanticism's political responses to climatic catastrophes. Exploring what he calls post-apocalyptic Romanticism, Chris Washington intervenes in the critical conversation that has long defined Romanticism as an apocalyptic field. Apocalypse means the revelation of a perfected world which sees Romanticism's back to nature environmentalism as a return to paradise and peace on earth. Romantic Revelations however demonstrates that the destructive climate change events of 1816, the year without a summer, changed Romantic thinking about the environment and the end of the world. Their post-apocalyptic visions correlate to the beginning of the Anthropocene, the time when humans initiated the possible extinction of their own species and potentially the earth. Rather than constructing paradises where humans are reborn or human existence ends, the later Romantics are interested in how to survive in the ashes after great social and climatic global disasters. Romantic Revelations argues that Percy Shelley, Mary Shelley, Lord Byron, John Clare, and Jane Austen sketch out a post-apocalyptic world that in contrast to the sunnier Romantic narratives is paradoxically the vision that offers us hope. In thinking through life after disaster, Washington contends that these authors craft an optimistic vision of the future that leads to a new politics.

The Cambridge Companion to English Literature, 1740–1830 Thomas Keymer, Jon Mee, 2004-06-17. This 2004 volume offers an introduction to British literature that challenges the traditional divide between eighteenth century and Romantic studies. Contributors explore the development of literary genres and modes through a period of rapid change. They show how literature was shaped by historical factors including the development of the book trade, the rise of literary criticism, and the expansion of commercial society and empire. The first part of the volume focuses on broad themes including taste and aesthetics, national identity and empire, and key cultural trends such as sensibility and the gothic. The second part pays close attention to the work of individual writers including Sterne, Blake, Barbauld, and Austen, and to the role of literary schools such as the Lake and Cockney schools. The wide scope of the collection juxtaposing canonical authors with those now gaining new attention from scholars makes it essential reading for students of eighteenth century literature and Romanticism.
