The Intellectual Resistance In Europe:

The Intellectual Resistance in Europe James D. Wilkinson, 1981 Camus Sartre and Beauvoir in France Eich Richter and Boll in Germany Pavese Levi and Silone in Italy These are among the defenders of human dignity whose lives and work are explored in this widely encompassing work James D Wilkinson examines for the first time the cultural impact of the anti Fascist literary movements in Europe and the search of intellectuals for renewal for social change through moral endeavor during World War II and its immediate aftermath It was a period of hope Wilkinson asserts and not of despair as is so frequently assumed Out of the shattering experience of war evolved the bracing experience of resistance and a reaffirmation of faith in reason Wilkinson discovers a spiritual revolution taking place during these years of engagement and views the participants the engagers as heirs of the Enlightenment Drawing on a wide range of published writing as well as interviews with many intellectuals who were active during the 1940s Wilkinson explains in the fullest context ever attempted their shared opposition to tyranny during the war and their commitment to individual freedom and social justice afterward Wilkinson has written a cultural history for our time His wise and subtle understanding of the long range significance of the engagers is a reminder that the reassertion of humanist values is as important as political activism by intellectuals

German Intellectuals and the Challenge of Democratic Renewal Sean A. Forner, 2017-03-23 This book examines how democracy was rethought in Germany in the wake of National Socialism the Second World War and the Holocaust Focusing on a loose network of public intellectuals in the immediate postwar years Sean Forner traces their attempts to reckon with the experience of Nazism and scour Germany's ambivalent political and cultural traditions for materials with which to build a better future In doing so he reveals they formulated an internally variegated but distinctly participatory vision of democratic renewal a paradoxical counter elitism of intellectual elites Although their projects ran aground on internal tensions and on the Cold War their commitments fueled critique and dissent in the two postwar Germanys during the 1950s and thereafter The book uncovers a conception of political participation that went beyond the limited possibilities of the Cold War era and influenced the political struggles of later decades in both East and West **Europe's Intellectuals and the Cold War**

Nancy Jachec, 2015-07-31 In 1950 nearly 300 of Europe's leading artists philosophers and writers formed an international society intended to end the Cold War The European Society of Culture was composed of many of Western Europe's best known intellectuals including Theodor Adorno Julien Benda Albert Camus Benedetto Croce Andre Gide J B Haldane Karl Jaspers Carl Jung Thomas Mann Henri Matisse Francois Mauriac Maurice Merleau Ponty Jean Paul Sartre Giuseppe Ungaretti and Albert Schweitzer among many others over the next twenty years it would also include many luminaries from the East such as Bertolt Brecht Ernst Bloch Ilya Ehrenburg and Georg Lukacs Pioneering the earliest political discussions between intellectuals in Eastern and Western Europe that would serve as a model for the activities of the better known CCF in its efforts to end communism the ESC went on to create an informal but powerful 1 600 member strong cultural and

political network across the world in pursuit of dialogue between the Marxist East and the liberal West and in pursuit of peace and shared cultural values Here in this first comprehensive history of the SEC s early years Nancy Jachec demonstrates the influence its members had not only on preventing the isolation of Europe s eastern states but on enabling the flow of people publications and ideas from the West into the East thus playing a vital role in introducing the ideals of human rights and cultural rights in the East in the run up to the signing of the Helsinki Accords of 1975 She also shows the profound impact that the SEC had on the development of post colonial theory through the exchanges it organised between European and African intellectuals directly shaping the expectations statesmen like Leopold Sedar Senghor revolutionaries like Frantz Fanon and institutions such as Unesco would have of culture in newly emerging countries **Romain Rolland and the Politics of the Intellectual Engagement** David James Fisher,1988 Romain Rolland and the Politics of the Intellectual Engagement David Fisher,2017-07-05 This intellectual portrait of Romain Rolland 1866 1944 French novelist musicologist dramatist and Nobel prizewinner in 1915 focuses on his experiments with political commitment against the backdrop of European history between the two world wars Best known as a biographer of Beethoven and for his novel Jean Christophe Rolland was one of those nonconforming writers who perceived a crisis of bourgeois society in Europe before the Great War and who consciously worked to discredit and reshape that society in the interwar period Analyzing Rolland s itinerary of engaged stands David James Fisher clarifies aspects of European cultural history and helps decipher the ambiguities at the heart of all forms of intellectual engagement Moving from text to context Fisher organizes the book around a series of debates Rolland s public and private collisions over specific committed stands introducing the reader to the polemical style of French intellectual discourse and offering insight into what it means to be a responsible intellectual Fisher presents Rolland s private ruminations extensive research and reexamination of the function and style of the French man of letters He observes that Rolland experimented with five styles of commitment oceanic mysticism linked to progressive democratic politics free thinking linked to antiwar dissent pacifism and ultimately Gandhism antifacism linked to anti imperialism antiracism and all out political resistance to fascism and most controversially fellow traveling as a form of socialist humanism and the positive side of antifascism Fisher views Rolland s engagement historically and critically showing that engaged intellectuals of that time were neither naive propagandists nor dupes of political parties David James Fisher makes a case for the committed writer and hopes to re ignite the debate about commitment For him Romain Rolland sums up engagement in a striking dialectical formula French Intellectuals Against the Left Michael Scott Christofferson,2004 Christofferson argues that French anti totalitarianism was the culmination of direct democratic critiques of communism revisions of the revolutionary project after 1956 He offers an alternative interpretation for the denunciation of communism Marxism by the French intellectual left in the late 1970s *French Intellectuals and Politics from the Dreyfus Affair to the Occupation* D. Drake,2005-04-05 A companion volume to Drake s *Intellectuals and Politics in Post War France* 2002 French

Intellectuals from the Dreyfus Affair to the Occupation traces the political positions adopted by French writers and artists from the end of the 19th century to the Liberation Drawing on a wide range of primary and secondary sources it offers a clear and accessible analysis of the intellectuals engagement with nationalism pacifism communism anti communism surrealism fascism and anti fascism which is located within the evolving national and international context of the period

China's Intellectuals and the State Merle Goldman, Timothy Cheek, Carol Lee Hamrin, 2020-10-26 Today's intellectuals in China inherit a mixed tradition in terms of their relationship to the state Some follow the Confucian literati watchdog role of criticizing abuses of political power Marxist intellectuals judge the state's practices on the basis of Communist ideals Others prefer the May Fourth spirit dedicated to the principles of free scholarly and artistic expression The Chinese government for its part has undulated in its treatment of intellectuals applying restraints when free expression threatened to get out of control relaxing controls when state policies required the cooperation good will and expertise of intellectuals In this stimulating work twelve China scholars examine that troubled and changing relationship They focus primarily on the post Mao years when bitter memories of the Cultural Revolution and China's renewed quest for modernization have at times allowed intellectuals increased leeway in expression and more influence in policy making Specialists examine the situation with respect to economists lawyers scientists and technocrats writers and humanist scholars in the climate of Deng Xiaoping's policies and speculate about future developments This book will be a valuable source of information for anyone interested in the changing scene in contemporary China and in its relations with the outside world

Antifascist Humanism and the Politics of Cultural Renewal in Germany Andreas Agocs, 2017-07-14 A study of German traditions of cultural renewal from their origins in antifascist activism in German exile communities in Europe and Latin America during World War II to their failure during the emerging Cold War in occupied Germany and the early German Democratic Republic

Psychology, Art, and Antifascism Louis Rose, 2016-10-25 A vivid portrait of two remarkable twentieth century thinkers and their landmark collaboration on the use and abuse of caricature and propaganda in the modern world In 1934 Viennese art historian and psychoanalyst Ernst Kris invited his mentee E H Gombrich to collaborate on a project that had implications for psychology and neuroscience and foreshadowed their contributions to the Allied war effort Their subject caricature and its use and abuse in propaganda Their collaboration was a seminal early effort to integrate science the humanities and political awareness In this fascinating biographical and intellectual study Louis Rose explores the content of Kris and Gombrich's project and its legacy

Dwight MacDonald and the Politics Circle Gregory D. Sumner, 1996 Sumner finds the clearest expression of MacDonald's creative power and of the political thinking that would eventually bridge the Old Left and the New

Worlds Apart? A Postcolonial Reading of post-1945 East-Central European Culture Cristina Sandru, 2013-01-16 This study explores the relation of the Eastern European problematic to postcolonial critical practice interrogating the extent to which postcolonialism can help illuminate instances of imperial domination in non Third World contexts It argues that

colonisation is to be understood principally as a condition of ideological domination that has engendered similar forms of literary and cultural resistance consequently it offers a comparative framework which enables a reading in differential contexts of texts that ostensibly have little in common but which on close examination reveal a shared imaginative space rhetoric and narrative agency The book consists of two interrelated parts Part one is a critical discussion of the ideologies cultural imaginaries and representational practices articulated in a diverse range of representative postcolonial and post 1945 East Central European texts these are shown to share despite dissimilar conditions of production uncannily related narrative modes and thematic emphases Part two is a comparative literature case study which discusses two authors whose work is both highly representative of the cultural formations discussed in the first part Milan Kundera and Salman Rushdie and at the same time highly controversial The chapters dedicated to Kundera's and Rushdie's work examine the cultural geography of their novels particularly in the writers use of memory and story telling to reconfigure history and personal identity in conditions of literal and metaphorical displacement While their novels thrive on ironic subversion and ambiguity they simultaneously gesture towards a redemptive space of the imagination transcending the constraints of both locality and history

An Avant-garde Theological Generation Jon Kirwan, 2018-03-09 An Avant garde Theological Generation examines the Fourvière Jesuits and Le Saulchoir Dominicans theologians and philosophers who comprised the influential reform movement the nouvelle théologie Led by Henri de Lubac Jean Daniélou Yves Congar and Marie Dominique Chenu the movement flourished from the 1930s until its suppression in 1950 It aims to remedy certain historical deficiencies by constructing a history both sensitive to the wider intellectual political economic and cultural milieu of the French interwar crisis and that establishes continuity with the Modernist crisis and the First World War Chapter One examines the modern French avant garde generations that have shaped intellectual and political thought in France providing context for a historical narrative of the nouvelle théologie Chapters Two and Three examine the influential older generations that flourished from 1893 to 1914 such as the Dreyfus generation the generation of Catholic Modernists and two generations of older Jesuits and Dominicans which were instrumental in the Fourvière Jesuits development Chapter Four explores the influence of the First World War and the years of the 1920s during which the Jesuits and Dominicans were in religious and intellectual formation relying heavily on unpublished letters and documents from the Jesuits archives in Paris Vanves Chapter Five analyses the crises of the interwar period and the emergence of the wider generation of 1930 to which the nouveaux théologiens belonged and its intellectual thirst for revolution Chapter Six examines the emergence of the ressourcement thinkers during the tumultuous years of the 1930s The decade of the 1940s explored in Chapter Seven saw the rise to prominence of the members of the generation of 1930 who thanks to their participation in the resistance emerged from the Second World War with significant influence on the postwar French intellectual milieu Finally the monograph concludes in Chapter Eight with an examination of the triumph of French Left Catholicism and the nouvelle théologie during the 1960s at

the Second Vatican Council George Orwell: A Reassessment Ira B Nadel, Peter Buitenhuis, 1988-11-24 **German POWs, Der Ruf, and the Genesis of Group 47** Aaron D. Horton, 2013-12-11 This work explores the experiences of Hans Werner Richter and Alfred Andersch authors who served in the German army during World War II were captured by U S forces and enlisted into a secret program to promote American democracy to their fellow POWs while imprisoned in the United States Upon repatriation they brought their experiences with the POW publication Der Ruf back to Germany where they founded a periodical of the same name Having grown disillusioned with the American occupation the authors stark criticisms of U S policies led to their dismissal from the second Der Ruf after only fifteen issues This study attempts to understand their journey from acceptance and endorsement of American democratic ideals to disappointment and opposition to U S occupation policies This transition played a crucial role in the foundation of the most influential West German literary circle Group 47 organized a few months after the authors dismissal **Federalism and European Union** Michael Burgess, 2006-04-10 One of the most frequent criticisms levelled at the European Community is the discrepancy between federalist rhetoric and the intergovernmental response between its ideological aspirations and contemporary political reality The federalist heritage of the European Community has become discredited by contemporary political thinkers and yet it still forms an important part of the community s ideological foundations Within this book the contrasting theories of Spinelli and Monnet are subjected to rigorous criticism examining the benefits and pitfalls of their proposals for a unified Europe and the probability of the gap between theory and actuality ever being bridged in the future **Europe in the Twentieth Century** Robert O. Paxton, 1975 *Bearing Witness* John R. Carpenter, 2017-11-14 It has been said that during times of war the Muses fall silent However anyone who has read the major figures of mid twentieth century literature Samuel Beckett Richard Hillary Norman Mailer Albert Camus Jean Paul Sartre and others can attest that it was through writing that people first tried to communicate and process the horrors that they saw during one of the darkest times in human history even as it broke out and raged on around them In *Bearing Witness* John Carpenter explores how across the world those who experienced the war tried to make sense of it both during and in its immediate aftermath Writers such as Alexander Solzhenitsyn and Theodore Plievier questioned the ruling parties of the time based on what they saw Correspondents and writer soldiers like John Hersey and James Jones revealed the chaotic and bloody reality of the front lines to the public And civilians many of who remain anonymous lent voice to occupation and imprisonment so that those who didn t survive would not be forgotten The digestion of a cataclysmic event can take generations But in this fascinating book Carpenter brings together all those who did their best to communicate what they saw in the moment so that it could never be lost **The French-German Dynamic in an Age of Conflict, 1925-1963** Elana Passman, 2025-02-04 This book investigates the radical transformation of the relationship between Germany and France neighbors whose border constituted one of the deepest fault lines of European history For generations the French and the Germans believed they were eternal enemies and this myth of

primordial hatred was the lens through which they interpreted each other's every move. Yet today a Franco-German war is unimaginable. Passman locates the reshaping of the French-German dynamic in the civic organizations that made the very notion of cooperation credible. After World War I and in the decades to follow, Franco-German associations kept calling for an end to their animus. Through journals, cultural exchanges, events, and charitable ventures, activists opened up the possibility of imagining friendship with the enemy. The pursuit of French-German cooperation did not begin with politicians after World War II. It took flight in the 1920s and persisted through decades of turmoil. In anchoring the history of collaboration in a longer arc of French-German cooperation, Passman illuminates how entangled were the histories of 1920s rapprochement, Nazi-era collaborationism, and postwar reconciliation. This volume will appeal to scholars, students, and general readers interested in the histories of modern France and modern Germany, European integration, and peace studies.

Shaping the Future Horst Hutter, 2006-01-01. *Shaping the Future* maps out the ascetic practices of a Nietzschean way of life. Hutter argues that Nietzsche's doctrines are attempts and temptations that aim to provoke his free-spirited readers into changing themselves by putting philosophy into practice in their lives.
