outside the boundary wires of our houses nearly every plant had some medical culinary or beauty use coming down from the ages The first medicinal compendium in the East was written more than 5000 years ago in India and before that in China In the West also Western Wise men especially in Greece more than 3000 years ago began noting down the knowledge of the nature of plants and they are medicinal value and remedies taught to them by their teachers and masters One blesses the time dedication energy and effort taken in writing down all this knowledge because in prehistoric times all this knowledge was passed down through word of mouth And most of it got lost because nobody had any visible and readable records of that knowledge But the moment human beings got to know about writing materials like clay tablets wax tablets dried palm leaves and papyri as well as paper in China this knowledge was preserved for the generations to come We just needed to interpret it and use it in the best way of which we knew Most of this knowledge when read from a scientific viewpoint is scoffed as quack remedies and sheer silly ignorance I remember one of my acquaintances scoffing about an ancient Egyptian remedy in which Egyptian grandmothers used to apply a paste of moldy bread to a wound in order to cure it That was done 4000 years ago My sophisticated 21st century totally scientifically minded friend shuddered at this idea full of ignorance but what could you expect from such barbarians When I told her that this remedy had passed down through the ages and was still in use to cure infections In 16th century Russia every house had a moldy bread culture Any bread catching a mold would be put in a glass utensil in which there was a little bit of water and some more moldy bread And this culture was allowed to flourish Anybody suffering from any cuts and wounds were immediately bandaged after the wound was washed and treated to a moldy bread paste When I told her that that same moldy bread was the basis of penicillin and other powerful antibiotics discovered by Alexander Fleming in the 20th century she blinked These are the penicillins and sulfa drugs which are being used by modern day doctors In the same way she was equally surprised to know that the Gauls used to go to war with huge quantities of fresh moss The moment they suffered from wounds while fighting those Romans those Vikings those Juts Firbolgs and perhaps even those Picts but not the Tuatha Danaan they immediately scooped up a handful of moss squeezed it tied it on to the wound bandaged it with a piece of any cloth or rope to keep it in place and continued fighting on

Introduction Lemon trees are very pretty and the lemon's flower is sweet but the fruit of the lemon is impossible to eat This song was very popular in the 60s and 70s but the songwriter was wrong Just not eating a lemon because it is sour in taste is going to prevent you from experiencing all the natural benefits of this versatile citrus fruit Lemons are considered to have originated in Asia China and Burma from where they managed to conquer the world Christopher Columbus brought lemon seeds back to Europe from his travels It thus began to be cultivated in Europe where before it was a rarity It was only in the 1740s that people in the West began to understand that there was some power in the lemons which prevented sailors from suffering from scurvy and beriberi They had not heard of vitamins C at that time of course but sailing tradition spread the word through word of mouth that whenever sailors reached some islands they had to eat of the fruit and the grasses there That would prevent their gums from bleeding pain in the muscles and in the bones and make them feel healthier These fruits were citrus fruits including lemons This cause and effect apparent result made European Navies make it a rule that every ship sailing out of harbor should have a plentiful supply of lemons green grasses and other citrus fruits to feed to the sailors and the officers during the voyage However lemons have been known since 10 A D in Persia where they were used for beautifying culinary and medical purposes Also their gardens used to have lemon trees and plenty of their traditional poetry described the lemon flower along with pomegranate flowers as a symbol of beauty and grace The characteristic sourness of the lemon is due to the citric acid content in it That is why lemon juice as well as its rind and pulp is used in culinary preparations all over the world The whole of the lemon fruit can be used with the rind ground to add a flavor to special baked dishes Lemon juice or even the peel of the dried lemon can be used for preparing beauty products and also in natural herbal remedies
