Motivation and Opportunity Augustus C. Ouano, 2006 Life is indeed uncertain it's an odyssey subject to natural social and economic pressures which influence its course However it's the inner fire and drive in each individual that ultimately govern and determine the whole course of each human life If an individual's motivation is sufficiently strong it will weather through the ever changing environment until an opportunity opens which can allow one's desires to be fulfilled This is the story of a third world country immigrant who came to the United States to quench his thirst for knowledge and his desire to participate in and to contribute to the science and technology of the twenty first century It tells about his struggles his pain of failures and the ecstasy of his successes to become a renowned scientist and technologist and a major contributor to modern science and technology It also tells about love the celebration of life and the grief of losing his most beloved wife through cancer Finally it describes how he escaped from the corrosive grip of extreme bitterness into gratefulness for an exceptionally fulfilling life and the promise of the future generation he is holding in his arms It Only Takes A Minute To Change Your Life Willie Jolley, 1997-03-15 Your Life A motivational and inspirational revolution that will show you how to release the power within you

Cognitive Motivation David Beswick, 2017-08-10 Motivation and cognition were treated as separate concepts throughout most of twentieth century psychology. However, in recent years, researchers have begun viewing the two as inextricably intertwined: not only does what we want affect how we think, but how we think affects what we want. In this innovative study, Beswick presents a new general theory of cognitive motivation synthesizing decades of existing research in social cognitive and personality psychology. New basic concepts are applied to a wide range of purposive behaviour. Part I of the volume reviews different forms of cognitive motivation such as curiosity, cognitive dissonance, achievement motivation, and the search for purpose and meaning, while Part II examines the basic processes that underlie it such as working memory, attention, and emotion. The central concept is the incomplete gestalt in which motivation is generated by a universal striving to integrate information and make sense at all levels of cognitive organization.

Motivation - Mechanisms of the Mind and their Quest for Expression Menno A. Mennes, 2025-10-01 This volume presents a first introduction to a thought-provoking Model of Motivation developed by Menno Mennes over a period of almost thirty years. The Model of Motivation in its approach presents a radical departure from everything that has appeared so far in literature on the subject. And yet it provides a surprisingly detailed account of how motivation works, which appears to be supported by findings from theories and research from current literature. In an unparalleled analysis, the Model seamlessly integrates these major theories into a consistent, comprehensive approach to motivation, explaining not only the essentials of each theory but also providing explanations for controversies that have hitherto remained largely unresolved. Motivation appears to be an inner dialogue, a stepwise, partly cyclical Process in which

we deal with our surroundings that often interfere in our ambitions our wishes and desires Deep personal insights into those Mechanisms of the Mind reveal implications that may lead to a fundamental new understanding of the origins of many disturbing issues we witness in present day society including neglect and denial intolerance discord and polarization
