The Manuscript Papers Of British Scientists 1600 194:

Ashgate Critical Essays on Early English Lexicographers John Considine, 2017-03-02 Three major developments in English lexicography took place during the seventeenth century the emergence of the first free standing monolingual English dictionaries the making of new kinds of English lexicons that investigated dialect or etymology or that keyed English to invented philosophical languages and the massive expansion of bilingual lexicography which not only placed English alongside the European vernaculars but also handled the languages of the new world The essays in this volume discuss not only the internal history of lexicography but also its wider relationships with culture and society *Historical Dictionaries and Historical Dictionary Research* Julie Coleman, Anne McDermott, 2012-10-24 This volume is a collection of papers from the 1st International Conference on Historical Lexicography and Lexicology at the University of Leicester in 2002 The purpose of the conference was to bring together scholars and academics from around the world working as scholars and editors on historical dictionaries or as practising lexicographers The papers are accordingly arranged in two sections reflecting the distinction between those individuals working on the historical development of dictionaries and those considering the lexicological problems and challenges facing the lexicographer in attempting to represent as fully and justly as possible historical forms of the English language **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), A Guide to the Principal Sources for Early American History (1600-1800) in the City of New York Evarts Boutell Greene, Richard Brandon Morris, 1929 **British Military History** Gerald Jordan, 1988 *Walford's Guide to Reference Material: Science and technology* Albert John Walford, Library Association, 1996 **Information Sources in the History of Science and Medicine** Pietro Corsi, Paul Weindling, 1983 British Books in Print, 1985 Annual Bibliography of the History of Natural History, 1982 *Guide to Reference Books* Robert Balay, Vee Friesner Carrington, Murray S. Martin, 1996 Presents an annotated bibliography of general and subject reference books covering the humanities social and behavioral sciences history science technology and medicine Dictionary of Commemorative Plant Generic Names Sudhir Chandra, 1992 **The Manuscript Papers of British Scientists, 1600-1940** Great Britain. Manuscript Division, Grace Gardner Griffin, 1946 Arts & Humanities Citation Index, 1997 **The Nature of the Page** Joshua Calhoun, 2020-01-24 An innovative study of books and reading that focuses on papermaking in the Renaissance In *The Nature of the Page* Joshua Calhoun tells the story of handmade paper in Renaissance England and beyond For most of the history of printing paper was made primarily from recycled rags so this is a story about using old clothes to tell new stories about plants used to make clothes and about plants that frustrated papermakers best attempts to replace scarce natural resources with abundant ones Because plants like humans are susceptible to the ravages of time it is also a story of corruption and the

hope that we can preserve the things we love from decay Combining environmental and bibliographical research with deft literary analysis Calhoun reveals how much we have left to discover in familiar texts He describes the transformation of plant material into a sheet of paper details how ecological availability or scarcity influenced literary output in the sixteenth and seventeenth centuries and examines the impact of the various colors and qualities of paper on early modern reading practices Through a discussion of sizing the mixture used to coat the surface of paper so that ink would not blot into its fibers he reveals a surprising textual interaction between animals and readers He shows how we might read an indistinct stain on the page of an early modern book to better understand the mixed media surfaces on which readers writers and printers recorded and revised history Lastly Calhoun considers how early modern writers imagined paper decay and how modern scholars grapple with biodeterioration today Exploring the poetic interplay between human ideas and the plant animal and mineral forms through which they are mediated *The Nature of the Page* prompts readers to reconsider the role of the natural world in everything from old books to new smartphones

The Protohistoric Pueblo World, A.D. 1275-1600 E. Charles Adams, Andrew I. Duff, 2016-04 In the centuries before the arrival of Europeans the Pueblo world underwent nearly continuous reorganization Populations moved from Chaco Canyon and the great centers of the Mesa Verde region to areas along the Rio Grande the Little Colorado River and the Mogollon Rim where they began constructing larger and differently organized villages many with more than 500 rooms Villages also tended to occur in clusters that have been interpreted in a number of different ways This book describes and interprets this period of southwestern history immediately before and after initial European contact A D 1275 1600 a span of time during which Pueblo peoples and culture were dramatically transformed It summarizes one hundred years of research and archaeological data for the Pueblo IV period as it explores the nature of the organization of village clusters and what they meant in behavioral and political terms Twelve of the chapters individually examine the northern and eastern portions of the Southwest and the groups who settled there during the protohistoric period The authors develop histories for settlement clusters that offer insights into their unique development and the variety of ways that villages formed these clusters These analyses show the extent to which spatial clusters of large settlements may have formed regionally organized alliances and in some cases they reveal a connection between protohistoric villages and indigenous or migratory groups from the preceding period This volume is distinct from other recent syntheses of Pueblo IV research in that it treats the settlement cluster as the analytic unit By analyzing how members of clusters of villages interacted with one another it offers a clearer understanding of the value of this level of analysis and suggests possibilities for future research In addition to offering new insights on the Pueblo IV world the volume serves as a compendium of information on more than 400 known villages larger than 50 rooms It will be of lasting interest not only to archaeologists but also to geographers land managers and general readers interested in Pueblo culture

Nicholson,1819 AIDS Orphans and Vulnerable Children in Africa United States. Congress. House. Committee on International Relations,2002 **Thomas Gray among the Disciplines** Ruth Abbott,Ephraim Levinson,2024-12-31

Throughout the 250 years that have passed since Thomas Gray s death he has primarily been celebrated as a poet This makes sense because although he published relatively little verse he published less indeed precisely nothing of his abundant polymathic writing in other fields His place within the history of scholarship has therefore been obscured Like many eighteenth century antiquaries however he shared his learning through correspondence and manuscript circulation and thereby influenced intellectual as well as literary life This book explores Gray s scholarship within the changing norms of eighteenth century disciplines at once locating him within histories of specialisation and examining the ways in which he challenges their narratives Scholars from across the humanities reveal his methods and global interests and analyse many newly uncovered manuscripts Offering fresh understanding of broader fields through focused investigation of Gray s multidisciplinary writings the book will appeal to scholars of eighteenth century literary intellectual and scientific history
