that European Americans brought to the West Such complexity is what historical geographer Richard Francaviglia unravels in this book Since the publication of Edward Said's book *Orientalism* the term has come to signify something one dimensionally negative In essence the orientalist vision was an ethnocentric characterization of the peoples of Asia and Africa and the Near East as exotic primitive others subject to conquest by the nations of Europe That now well established point which expresses a postcolonial perspective is critical but Francaviglia suggest that it overlooks much variation and complexity in the views of historical actors and writers many of whom thought of western places in terms of an idealized and romanticized Orient It likewise neglects positive images and interpretations to focus on those of a decadent and ostensibly inferior East We cannot understand well or fully what the pervasive orientalism found in western cultural history meant says Francaviglia if we focus only on its role as an intellectual engine for European imperialism It did play that role as well in the American West One only need think about characterizations of American Indians as Bedouins of the Plains destined for displacement by a settled frontier Other roles for orientalism though from romantic to commercial ones were also widely in play In *Go East Young Man* Francaviglia explores a broad range of orientalist images deployed in the context of European settlement of the American West and he unfolds their multiple significances

groups to save the local economy Efforts to reindustrialize in the mid 1960s brought unregulated growth unsafe working conditions and pollution Starting in 1968 new strip mines were built to produce metallurgical coal for Asia Pacific steelmakers Not only is this an interesting regional history but the consideration of the role of labour unions local communists and grassroots environmentalists makes it especially compelling Today with technological change in steel manufacturing on the horizon propelled by the climate crisis Langford argues that the Crowsnest Pass and Elk Valley must look toward ecosystem restoration sustainable economic activities and the inclusion of First Nations in decision making in order to embrace a future beyond coal **Humanities** ,2008 The Dreamer and the Doctor Jack Nisbet,2018-10-23 In the turn of the twentieth century Northwest the lives and passions of an American physician and her Swedish naturalist husband helped shape a territory on the cusp of change from the author of Sources of the River and The Collector Dr Carrie Leiberg a pioneer physician fought hard for public health while nurturing both a troubled son and a fruit orchard Her husband John Leiberg was a Swedish immigrant and self taught naturalist who transformed himself from pickax Idaho prospector to special field agent for the US Forest Commission and warned Washington DC of ecological devastation of public lands The Leiberg story opens a window into the human and natural landscape of a century past that reflects all the thorny issues of our present time
