Maps of the Imagination Peter Turchi, 2011-06-01 Maps of the Imagination takes us on a magic carpet ride over terrain both familiar and exotic Using the map as a metaphor fiction writer Peter Turchi considers writing as a combination of exploration and presentation all the while serving as an erudite and charming guide He compares the way a writer leads a reader through the imaginary world of a story novel or poem to the way a mapmaker charts the physical world To ask for a map says Turchi is to say Tell me a story With intelligence and wit the author looks at how mapmakers and writers deal with blank space and the blank page the conventions they use or consciously disregard the role of geometry in maps and the parallel role of form in writing how both maps and writing serve to re create an individual's view of the world and the artist's delicate balance of intuition with intention A unique combination of history critical cartography personal essay and practical guide to writing Maps of the Imagination is a book for writers for readers and for anyone interested in creativity Colorful illustrations and Turchi's insightful observations make his book both beautiful and a joy to read

James Rennell,1783 **Petroleum Exploration: A Quantitative Introduction** Ray L. Sengbush,2012-12-06 This book is about exploration for oil and gas and focuses particularly on seismic exploration in the hunt for hydrocarbons The first part The Hunt for Hydrocarbons gives general background information with an introductory chapter on the beginnings of the oil business followed by three chapters that include elements of petroleum geology geophysical methods and drilling and logging The second part Seismic Exploration for Hydrocarbons consists of two chapters that describe rudiments of the seismic method and velocity measurements two chapters discussing theory based on wave propagation and the convolutional model and a chapter devoted to each of the three phases of seismic exploration acquisition processing and interpretation I have concentrated on seismic exploration because most of the oil and gas that has been found has been located by this method and it is the only method that has the potential for the increased precision needed in what Halbouty 1982 calls the deliberate search for the subtle trap In contrast to elementary and introductory books that present the seismic method superficially and qualitatively this book develops the method quantitatively using only elementary mathematics algebra and trigonometry so that readers should be able to do things afterwards that they couldn't do before and thereby get a deeper appreciation of the business of hunting for hydrocarbons The book also probes into some sophisticated topics that wouldn't be mentioned IX x use in short courses at a variety of levels Maps of Heaven, Maps of Hell Edward J. September 1 1862 continues Bradley M Gottfried s efforts to study and illustrate the major campaigns of the Civil War This is the tenth book in the ongoing Savas Beatie Military Atlas Series President Abraham Lincoln s frustration with George B McClellan s inability to defeat Robert E Lee and capture Richmond dramatically increased after the unsuccessful Seven Days Battles In response Lincoln combined three small armies into the new Army of Virginia and placed it under Maj Gen John Pope who had overseen several successes in the Western Theater Pope s aggressiveness and McClellan s passivity on the Peninsula convinced Lee to send Thomas Stonewall Jackson s wing of the Army of Northern Virginia to confront Pope A bloody battle at Cedar Mountain on August 9 halted Pope s move south and Jackson s raid on the vast stores at Manassas Junction triggered another confrontation this time at Kettle Run When McClellan s troops abandoned the Peninsula Lee moved his other wing under James Longstreet rapidly north Pope missed an opportunity to prevent the junction of Lee s wings by not stopping Longstreet at Thoroughfare Gap The battle of Second Bull Run began on the evening of August 28 when Jackson tangled with Union troops at the Brawner Farm Pope spent much of the next day hammering Jackson s front with no idea that Longstreet was arriving on the field The Union assaults continued on August 30 until Longstreet launched a massive assault that rolled up the Union left flank and collapsed Pope s army The retreat was briefly interrupted by some of Jackson s units at Chantilly which ended the campaign The Maps of Second Bull Run plows new ground by breaking down the entire campaign into 24 map sets or action sections enriched with 122 detailed full page color maps These cartographic originals bore down to the regimental and battery level They include the march to and from the battlefields and virtually every significant event in between including cavalry actions At least two and as many as ten maps accompany each map set Keyed to each piece of cartography is a full facing page of detailed text describing the units personalities movements and combat including quotes from eyewitnesses depicted on the accompanying map all of which make the cavalry actions come alive This presentation allows readers to easily find a map and text on any portion of the sprawling campaign Serious students will appreciate the extensive endnotes and complete orders of battle and take the book with them to the battlefields A final bonus is that the maps unlock every other book or article written on any aspect of the campaign Perfect for the easy chair or for stomping the hallowed grounds The Maps of Second Bull Run is a seminal work that belongs on the bookshelf of every serious and casual student of the battle *Memoir of a Map of Hindoostan; Or, The Mogul Empire* James Rennell,1788 **Transactions of the South Eastern Union of Scientific Societies** ,1908
