Douglas E. Hough

The Market For Human Blood:

The Market for Human Blood Douglas E. Hough, 1978 *The Economics of the Market for Human Blood* Douglas Earle Hough, 1976 **Last Best Gifts** Kieran Healy, 2010-08-15 More than any other altruistic gesture blood and organ donation exemplifies the true spirit of self sacrifice Donors literally give of themselves for no reward so that the life of an individual often anonymous may be spared But as the demand for blood and organs has grown the value of a system that depends solely on gifts has been called into question and the possibility has surfaced that donors might be supplemented or replaced by paid suppliers Last Best Gifts offers a fresh perspective on this ethical dilemma by examining the social organization of blood and organ donation in Europe and the United States Gifts of blood and organs are not given everywhere in the same way or to the same extent contrasts that allow Kieran Healy to uncover the pivotal role that institutions play in fashioning the contexts for donations Procurement organizations he shows sustain altruism by providing opportunities to give and by producing public accounts of what giving means In the end Healy suggests successful systems rest on the fairness of the exchange rather than the purity of a donor's altruism or the size of a financial incentive *Exchanging Human Bodily Material: Rethinking Bodies and Markets* Klaus Hoeyer, 2013-01-05 This book addresses the debate usually tagged as being about markets in human body parts which is antagonistically divided into pro market and anti market positions The author provides a set of propositions about how to approach this and shows a way out of the concrete impasse of it Assumptions about markets and bodies that characterize this debate are analyzed and described while the author argues that these assumptions are in fact constitutive for exchanges of human bodily material but in unacknowledged ways It is concluded that what we need is a different analytical approach to better understand the mechanisms at play when organizations exchange organs tissues and cells for use in transplantation and fertility medicine *Markets without Limits* Jason F. Brennan, Peter Jaworski, 2015-08-20 May you sell your vote May you sell your kidney May gay men pay surrogates to bear them children May spouses pay each other to watch the kids do the dishes or have sex Should we allow the rich to genetically engineer gifted beautiful children Should we allow betting markets on terrorist attacks and natural disasters Most people shudder at the thought To put some goods and services for sale offends human dignity If everything is commodified then nothing is sacred The market corrodes our character Or so most people say In *Markets without Limits* Jason Brennan and Peter Jaworski give markets a fair hearing The market does not introduce wrongness where there was not any previously Thus the authors claim the question of what rightfully may be bought and sold has a simple answer if you may do it for free you may do it for money Contrary to the conservative consensus they claim there are no inherent limits to what can be bought and sold but only restrictions on how we buy and sell *The economic of the market for human blood* Douglas Earle Hough, 1976 **The Politics of Blood** Anne-Maree Farrell, 2012-05-24 How best to manage risk involving multi valued human biological materials is the overarching theme of this book which draws on the sourcing and supply of blood as a case study Blood has ethical social

scientific and commercial value This multi valuing process presents challenges in terms of managing risk therefore making it ultimately a matter for political responsibility This is highlighted through an examination of the circumstances that led to HIV blood contamination episodes in the US England and France as well as their consequences The roles of scientific expertise and innovation in managing risks to the blood system are also analysed as is the increased use of precautionary and legal strategies in the post HIV blood contamination era Finally consideration is given to a range of policy and legal strategies that should underpin effective risk governance involving multi valued human biological materials

The Oxford Handbook of Reproductive Ethics Leslie Francis, 2017 Intimate and medicalized natural and technological reproduction poses some of the most challenging ethical dilemmas of our time This volume brings together scholars from multiple perspectives to address both traditional and novel questions about the rights and responsibilities of human reproducers their caregivers and the societies in which they live

Blood, Plasma, and Plasma Proteins José Luis Valverde, 2006 Labile blood products and plasma derived products are very sensitive from a social viewpoint Along with the challenges faced by all medicinal products there is an added challenge due to the lack of raw material and the social problems with regards to their acquisition Obtaining them depends on blood and plasma donations which are insufficient Europeans as a whole fail to even cover 40 % of their needs in plasma for fractionation The aspiration that all donations shall be voluntary free and unpaid is an altruistic objective which reality unfortunately contradicts every day Governments and all social Agencies should promote to the maximum its actions in order to achieve the greatest number of donation each day Even from a humanitarian or ethical viewpoint nobody can deny a possible donor accepting incentives This incentive discussion plus the concept of self sufficiency of countries and more are discussed in this volume

Human Dna: Law and Policy Bartha Maria Knoppers, Claude M LaBerge, Marie Hirtle, 1997-07 Human DNA Law and Policy provides the first international debate on a topic of universal concern No book has brought together such a diverse range of multidisciplinary ethical and legal expertise on the highly controversial issues surrounding the use storage exchange and sale of the very stuff of which we are made human genetic material Testing of human genetic material involves a variety of samples pathological samples newborn screening samples samples leftover after testing and research samples shared around the world This places consent issues on an individual familial and societal level The comparative and international perspectives presented reveal the transnational nature of genetic studies This book focuses on the issues of DNA sampling and testing consent and confidentiality banking policies genetic epidemiology and diversity Since financial and technological pressures are inextricably linked to human genetics research commercialization and patents are also examined Academic researchers policy makers and industry will benefit from the learned papers and reports of the discussion which is rich in diversity of opinion controversial in the diversity of policy and approaches presented anchored on scientific facts and yet sensitive to cultural political and economic differences

Federal Trade Commission Decisions United States. Federal Trade Commission, 1977 Five Bodies John

O'Neill, 2004-02-21 Offers an introduction to some of the most urgent contemporary concerns within the sociology of the body. It examines how embodied figures of policy, economy and society represent the contested notions of identity, desire, wholeness and fragmentation. **The Cambridge Handbook of Human Dignity** Marcus Düwell, Jens Braarvig, Roger Brownsword, Dietmar Mieth, 2014-04-10 This introduction to human dignity explores the history of the notion from antiquity to the nineteenth century and the way in which dignity is conceptualised in non-Western contexts. Building on this, it addresses a range of systematic conceptualisations, considers the theoretical and legal conditions for human dignity as a useful notion and analyses a number of philosophical and conceptual approaches to dignity. Finally, the book introduces current debates, paying particular attention to the legal implementation of human rights, justice and conflicts of medicine and bioethics, and provides an explicit systematic framework for discussing human dignity. Adopting a wide range of perspectives and taking into account numerous cultures and contexts, this handbook is a valuable resource for students, scholars and professionals working in philosophy, law, history and theology. **Sustainable Market Economy** Hermann Witte, 2015 The Lingener Studies of Management and Technology have mainly two objectives. First, there is the objective to stimulate and to support a critical and balanced integration of two different orientated disciplines of science. The second objective is to overcome the monistic approach of science and to promote a pluralistic and holistic approach. The holistic approach leads to an enlarged knowledge, bringing better decision advice of science for practice. This particular enlarged knowledge does not only give a better foundation to realize solution for the overcoming of crises, but it also can prevent crises in democratic economic systems. The sustainable market economy is based on the idea of the United Nations to install a worldwide sustainable development process. The objective of this process is to reduce the difference between poor and rich countries. The concept of the sustainable market economy is founded on the basic idea of economics to realize market equilibria. Adam Smith. It is shown that economic equilibria also ensure economic sustainability. Because economic crises are present in economic disequilibria, the realization of the economic sustainability prevents systemic self-made economic crises and also ensures welfare. So it is logical to realize economic sustainability consequently in spite of the dominance of political compromises in democratic societies. **Dietary Fibers and Human Health** Megan A. McCrory, 2018-07-04 This book is a printed edition of the Special Issue Dietary Fibers and Human Health that was published in *Nutrients*. **Economic Lives** Viviana A. Zelizer, 2010-09-27 Revealing the human side of economic life. Over the past three decades, economic sociology has been revealing how culture shapes economic life, even while economic facts affect social relationships. This work has transformed the field into a flourishing and increasingly influential discipline. No one has played a greater role in this development than Viviana Zelizer, one of the world's leading sociologists. *Economic Lives* synthesizes and extends her most important work to date, demonstrating the full breadth and range of her field-defining contributions in a single volume for the first time. *Economic Lives* shows how shared cultural understandings and interpersonal relations shape everyday economic

activities Far from being simple responses to narrow individual incentives and preferences economic actions emerge persist and are transformed by our relations to others Distilling three decades of research the book offers a distinctive vision of economic activity that brings out the hidden meanings and social actions behind the supposedly impersonal worlds of production consumption and asset transfer Economic Lives ranges broadly from life insurance marketing corporate ethics household budgets and migrant remittances to caring labor workplace romance baby markets and payments for sex These examples demonstrate an alternative approach to explaining how we manage economic activity as well as a different way of understanding why conventional economic theory has proved incapable of predicting or responding to recent economic crises Providing an important perspective on the recent past and possible futures of a growing field Economic Lives promises to be widely read and discussed

Welie, 2013-11-11 This is the first book in healthcare ethics addressing the moral issues regarding ownership of the human body Modern medicine increasingly transforms the body and makes use of body parts for diagnostic therapeutic and preventive purposes The book analyzes the concept of body ownership It also reviews the ownership issues arising in clinical care for example donation policies autopsy and biomedical research Societies and legal systems also have to deal with issues of body ownership A comparison is made between specific legal arrangements in The Netherlands and France as examples of legal approaches In the final section of the book different theoretical perspectives on the human body are analyzed libertarian personalist deontological and utilitarian theories of body ownership

Morals and Markets Viviana A. Rotman Zelizer, 2017-08-08 Life insurance the promise of an insurer to pay a sum upon a person's death in exchange for a regular premium is a bizarre enterprise How can we monetize human life Should we What statistics do we use what assumptions do we make and what behavioral factors do we consider First published in 1979 *Morals and Markets* is a pathbreaking study exploring the development of life insurance in the United States Viviana A. Rotman Zelizer combines economic history and a sociological perspective to advance a novel interpretation of the life insurance industry The book pioneered a cultural approach to the analysis of morally controversial markets Zelizer begins in the mid nineteenth century with the rise of the life insurance industry a contentious chapter in the history of American business Life insurance was stigmatized at first denounced in newspapers and condemned by religious leaders as an immoral and sacrilegious gamble on human life Over time the business became a widely praised arrangement to secure a family's future How did life insurance overcome cultural barriers As Zelizer shows the evolution of the industry in the United States matched evolving attitudes toward death money family relations property and personal legacy

The Oxford Handbook of Cultural Sociology Jeffrey C. Blood Feuds : AIDS, Blood, and the Politics of Medical Disaster Eric Feldman Associate Director New York University's Institute for Law and Society, Columbia University Ronald Bayer Professor Joseph L.
