Preucel, Stephen A. genuine ways and channels of salvation for their adherents and that religions have a place in God's universal plan of salvation for humankind. The plausibility of this assertion can be exemplified by the concept of inclusive pluralism, a theological model developed by the Belgian-born Jesuit theologian Jacques Dupuis. This book expounds that concept and reflects on its implication for the Catholic Church's unwavering commitment to interreligious dialogue. **Deep-Time**

**Images in the Age of Globalization** Oscar Moro Abadía, Margaret W. Conkey, Josephine McDonald, 2024-05-13 This open access volume explores the impact of globalization on the contemporary study of deep time art. The volume explores how early rock art research's Eurocentric biases have shifted with broadened global horizons to facilitate new conversations and discourses in new post-colonial realities. The book uses seven main themes to explore theoretical, methodological, ethical, and practical developments that are orienting the study of Pleistocene and Holocene arts in the age of globalization. Compiling studies as diverse as genetics visualization with the proliferation of increasingly sophisticated archaeological techniques means that vast quantities of materials and techniques are now incorporated into the analysis of the world's visual cultures. *Deep Time Images in the Age of Globalization* aims to promote critical reflection on the multitude of positive and negative impacts that globalization has wrought in rock art research. The volume brings new theoretical frameworks as well as engagement with indigenous knowledge and perspectives from art history. It highlights technical, methodological, and interpretive developments and showcases rock art characteristics from previously unknown in the global north geographic areas. This book provides comparative approaches on rock art globally and scrutinises the impacts of globalization on research, preservation, and management of deep time art. This book will appeal to archaeologists, social scientists, and art historians working in the field as well as lovers of rock art. **Archaeological Theory in a Nutshell** Adrian

Praetzelis, 2023-06-21 This book provides a brief, readable introduction to archaeological theory. Adrian Praetzelis demystifies a pile of tricky contemporary concepts for the theory-phobic undergraduate or beginning graduate student. This new edition adds chapters on Indigenous cognitive and behavioral archaeologies and now covers 15 contemporary theories from neoevolutionism to queer theory. Each chapter begins with a description of the concept, its origin, and significance. Next up is an example of how an archaeologist has used the idea to understand their site, making the connection between the idea and the archaeology plain and unambiguous. Each chapter ends with discussion questions and suggestions for further reading. A glossary of postmodern discourse, including that word, concludes the book. Using plain English to clarify some of the more baffling ideas used in contemporary archaeology, this book is a vital resource for students studying archaeological theory and the discipline as a whole. *The Bloomsbury Handbook of the Philosophy of the Historical Sciences and Big History* Aviezer Tucker, David Cernín, 2025-08-21 This handbook examines the philosophy of the historical sciences and their synthesis in concepts like Big or Deep History. *Archaeological Theory* Norman Yoffee, Andrew Sherratt, 1993-07-22 This volume assesses the real achievements of archaeology in increasing an understanding of the past Without rejecting the insights either of traditional or more recent approaches it considers the issues raised in current claims and controversies about what is appropriate theory for archaeology The first section looks at the process of theory building and at the sources of the ideas employed The following studies examine questions such as the interplay between expectation and evidence in ideas of human origins social role and material practice in the formation of the archaeological record and how the rise of states should be conceptualised further papers cover issues of ethnoarchaeology visual symbols and conflicting claims to ownership of the past The conclusion is that archaeologists need to be equally wary of naive positivism in the guise of scientific procedure and of speculation about the unrecorded intentions of prehistoric actors [A History of Anthropological Theory](#) Paul A. *Artifacts and Ideas* Bruce Trigger, 2017-09-08 Prehistoric archaeologists cannot observe their human subjects nor can they directly access their subjects' ideas Both must be inferred from the remnants of the material objects they made and used In recent decades this incontrovertible fact has encouraged partisan approaches to the history and method of archaeology An empirical discipline emphasizing data classification and chronology has given way to a behaviorist approach that interprets finds as products of ecologically adaptive strategies and to a postmodern alternative that relies on an idealist cultural relativist epistemology based on belief and cultural traditions In *Artifacts and Ideas* Bruce G. Trigger challenges all partisan versions of recent developments in archaeology while remaining committed to understanding the past from a social science perspective Over 30 years Trigger has addressed fundamental epistemological issues and opposed the influence of narrow theoretical and ideological commitments on archaeological interpretation since the 1960s Trigger encourages a relativistic understanding of archaeological interpretation Yet as post-processual archaeology influenced by postmodernism became increasingly influential Trigger countered nihilistic subjectivism by laying greater emphasis on how in the long run the constraints of evidence could be expected to produce a more comprehensive and objective understanding of the past In recent years Trigger has argued that while all human behavior is culturally mediated the capacity for such mediation has evolved as a flexible and highly efficient means by which humans adapt to a world that exists independently of their will Trigger agrees that a complete understanding of what has

shaped the archaeological record requires knowledge both of past beliefs and of human behavior. He knows also that one must understand humans as organisms with biologically grounded drives, emotions, and means of understanding. Likewise, even in the absence of data supplied in a linguistic format by texts and oral traditions, at least some of the more ecologically adaptive forms of human behavior and some general patterns of belief that display cross-cultural uniformity will be susceptible to archaeological analysis. Advocating a realist epistemology and a materialist ontology, *Artifacts and Ideas* offers an illuminating guide to the present state of the discipline as well as to how archaeology can best achieve its goals.
